Introduction

History

In 1969 the Legislature passed and the Governor signed into law a bill which created Statute Sections 165.83 and 165.84. These Sections provided that the Division of Law Enforcement Services (DLES) in the Department of Justice establish a central repository of identification information and provided that all criminal justice agencies in the state cooperate and provide information to the repository. The Attorney General and the Administrator of the Division created the Crime Information Bureau (CIB) to implement and maintain the Identification Information system provided for by the Statutes.

The Wisconsin Identification System was established July 1, 1971, and is designed to serve Wisconsin law enforcement and criminal justice agencies as a central repository for identification information and is compatible with the historic Identification Division activities of the FBI. The Wisconsin system is designed to allow for the coordinated exchange of state and national information of interest throughout the United States and the identifying data in the CIB files has proven to be extremely vital to Wisconsin law enforcement and criminal justice operations.

Identification Manual Overview

The Crime Information Bureau (CIB), an agency of the Division of Law Enforcement Services within the Wisconsin Department of Justice, is charged with the responsibility of maintaining complete and accurate identification information. In accordance with the Wisconsin State Statutes 165.83 and 165.84, the CIB must process, and all persons in charge of Wisconsin law enforcement agencies must obtain, or cause to be obtained; fingerprints, descriptions, photographs, and other available identifying data on persons who have been arrested or taken into custody pursuant to s. 165.83 (2); for an offense which is a felony; for an offense which is a misdemeanor or a violation of an ordinance involving burglary tools, commercial gambling, dealing in gambling devices, contributing to the delinquency of a child, dealing in stolen property, controlled substances under Chapter 961, firearms, dangerous weapons, explosives, pandering, prostitution, sex offenses where children are victims, worthless checks; for an offense charged as disorderly conduct but which relates to an act connected with one or more of the above listed offenses; or as a fugitive from justice. Additionally, the Crime Information Bureau must process fingerprints and identifying data taken at the discretion of law enforcement agencies

on persons arrested or taken into custody for other offenses and obtain fingerprints and identifying data on unidentified human corpses found in the state. **Fingerprints obtained pursuant to Wisconsin Stats. 165.83 and 165.84 must be forwarded to the Crime Information Bureau within 24 hours after they are obtained.** In addition, persons not arrested or taken into custody by law enforcement agencies for mandatory fingerprintable offenses, but who are summoned or issued a citation for a mandatory offense, shall have fingerprints obtained at the initial appearance before a judge in accordance with s. 970.02 (7).

Wisconsin State Statute 165.83 (2) 5 authorizes the Attorney General to designate other offenses not included in s. 165.83 (2). On December 10, 1993 the Wisconsin State Legislature enacted Wisconsin Act 96 which created statutes relating to and providing penalties for stalking. State Statutes 165.829 requires the Department of Justice to gather and maintain information on arrests and judgments of convictions entered regarding all violations of s. 940.32 (stalking) and s. 947.013 (harassment). To complete the obligation imposed by this act, the Attorney General has designated s. 940.32 and s. 947.013 as mandatory fingerprintable offenses pursuant to s. 165.83 (2) 5. Any person arrested for a violation of s. 940.32 or 947.013 shall be fingerprinted and the fingerprint card shall be submitted to the Department of Justice. This includes all violations of these statutes, even if the penalties are misdemeanors and/or forfeitures that normally are not required to be reported.

There are three levels of criminal history records that may be created when a subject is arrested. The first level is the arrest and booking process at the local law enforcement agency. This process creates an arrest record and, if applicable, a court record. The second and third levels are created when the local law enforcement agency submits the arrestees fingerprints to the CIB (second level) and the Federal Bureau of Investigation (FBI) (third level). In October of 1998, CIB began receiving electronic fingerprint submittals from agencies using card scan and live scan equipment. These electronic records, when applicable, are forwarded electronically to the FBI after CIB completes processing.

It is important to remember that all arrest/conviction records in the CIB and FBI files are supported by fingerprint cards. The failure to submit fingerprints will result in an incomplete state and federal criminal history record.

Each individual appearing in the Wisconsin Identification Files is assigned a unique State Identification Number (SID) which should be retained by the local agency.

As provided by law, dispositions of criminal cases are received from the agency making the final disposition. At the time of arrest, law enforcement initiates a Final Disposition Report bearing fingerprint impressions and it is passed onto the prosecutor and/or to the court along with the case papers. When the final disposition is reached, whether it be by the prosecutor or by the court, the disposition report is forwarded to the Crime Information Bureau. In August of 1999, disposition reports began to flow to CIB electronically from the Consolidated Court Automation Program (CCAP) system from participating counties.

Based again on positive fingerprint identification, offender records are updated providing total information as to the final consequence of the criminal action. Wisconsin correctional agencies also report the receipt, transfer, and status of all persons under the supervision and custody of the State Division of Corrections.

In 1992 the State of Wisconsin contracted with North American MORPHO for the purchase of an Automated Fingerprint Identification System (AFIS). The implementation of AFIS has allowed the CIB to electronically scan the submission of ten print fingerprint cards for search and comparison against the existing arrest fingerprint card master file that is stored within the AFIS database. This eliminates the need to search fingerprint cards manually and the pulling of file jackets of known

offenders for identification. In addition, AFIS workstations are located at each Crime Laboratory in Madison, Wausau and Milwaukee. These devices allow the search of latent fingerprints obtained from crime scenes for potential identification against existing ten print fingerprint cards on file at CIB. Unidentified latent fingerprints are stored in the AFIS database for future comparison with subsequent ten print arrest fingerprint card submissions to CIB. Extensive research by the Department of Justice indicates that AFIS will become an indispensable tool not only in apprehending criminals and raising the rate of crime-solving in the state, but also in preventing crime and raising our conviction rate. Law enforcement agencies in Wisconsin collect more than 700 fingerprints at crime scenes each year. Fewer than 1 percent of those prints can be used to find the criminal. With an AFIS system, as many as 20 percent of the fingerprints found at crime scenes will help identify law breakers when evidence has been submitted to the Crime Laboratories for the lifting of latent fingerprint(s) and subsequent comparison to the ten print fingerprint cards maintained by CIB.

Technical Assistance and Training

State Statute 165.83 (2) (h) and (i) provides that the Division of Law Enforcement Services - Crime Information Bureau assist all agencies and provide instructions whenever practicable to all agencies to establish the state system of identification and to establish efficient local records systems. Trained Field Representatives are permanently assigned full time to offer instructional assistance, monitor fingerprint card submissions, aid administrators, train identification personnel, and are available for personal contact as required anywhere in law enforcement agencies, prosecutor's offices, courts, and correctional institutions. Assistance requests or inquiries concerning the Wisconsin Identification System should be addressed to:

Director
Crime Information Bureau
P.O. Box 2718
Madison, WI 53701-2718
608/266-7314

Handling Manual Revisions

The Wisconsin Identification manual will be updated and revised as needed in the future. Updates and revisions will be available for download via the Internet and will not be re-printed by the Department of Justice. Individual users of the manual will be responsible for the download and inclusion of all update material for each manual. Users will be notified when updates or revisions are available for download.

Fingerprint Card

Use of Fingerprint Card

The Crime Information Bureau utilizes one fingerprint card for the entire identification process. This card serves as the source document for submission of inked fingerprint impressions and descriptive data to the CIB for persons arrested or taken into custody, applicants, unknown deceased or other identification requests. As the primary form in the Identification system, all other transactions branch out from the fingerprint card. It is from the fingerprint card that criminal records are created, and updated with Final Disposition Reports.

Note: All information on the fingerprint card should be typed or legibly hand written.

CIB converts all arrest fingerprint cards not submitted electronically to electronic format. This allows a single fingerprint card to be processed by CIB and then submitted electronically to the FBI. Any agency still submitting paper arrest cards need only submit a single, legible fingerprint card.

Fingerprint Card Description

The fingerprint card is a single copy white card, 8" x 8", with green printing (ID form DJ-LE-241). The State card adopts the convention of calling one side of the fingerprint card the "Face" and the other side the "Impression" side. The "Face" side provides blocks for administrative and charge information. The "Impression" side provides blocks for descriptive information and the fingerprint impressions.

FINGERPRINT CARD
DJ-LE-241, REV. 1/96

fingerprint card - face side

Juvenile Fingerprint

If the individual is under the age of 17, the "YES" box relating to "SUBMISSION" should be checked. If the individual has been waived into or will be prosecuted in adult court, the "YES" box relating to "TREAT AS ADULT" should be checked.

Date of Arrest

REQUIRED This should be the date the individual is arrested. Must be numeric characters representing month, day, and year, separated by slashes, in that order. For paper fingerprint card submission, the year can be two or four characters (mm/dd/yy or mm/dd/ccyy). However, for electronic fingerprint card submissions, the year must be four characters without separators in the following order: ccyymmdd.

ORI Contributor

REQUIRED This block must contain the nine character NCIC agency identifier and name of the agency submitting the fingerprint card. A listing of Wisconsin ORIs is found in the Wisconsin Agency Identifier section of this manual.

Contributor OCA Number

REQUIRED "OCA" is an FBI/NCIC acronym meaning "originating agency's case number." This number must be unique to one person/one arrest. While the OCA is not required for electronic submissions, it is recommended.

Arrest Tracking Number

ATN is a unique identifier linking arrest, prosecution, and court disposition data. The ATN is unique for each person/arrest. ATN is a variable-length numeric identifier which can only be generated by a computer algorithm. It can be as small as six (6) digits and as large as fourteen (14) digits. ATN contains a four (4) digit agency identifier, a local sequence number which can be from one (1) to nine (9) digits, and a check digit. (See ATN Technical Document 20-TS/ATN-96.032)

Agencies submitting fingerprints electronically have the ATN generated by the card scan or live scan device. Those agencies submitting ink and roll fingerprint cards by mail should obtain and use the ATN generation software provided by CIB. Contact Joan Wolfe at (608) 264-9490 or wolfejk@doj.state.wi.us to obtain a copy.

Date of Offense

This should be the date or approximate date of the alleged offense. For submissions with multiple offense dates, only one need be reported. For paper submissions, must be numeric characters representing month, day, and year, separated by slashes in that order. The year can be two or four characters (mm/dd/yy or mm/dd/yyyy). However, for electronic fingerprint card submissions, the year must be four characters without separators in the following order: ccyymmdd.

Place of Birth

REQUIRED Must be two character alpha code indicating the state, territory or country of birth. For those individuals born in the United States, Mexico or Canada, the specific state or province should be listed. Valid codes may be found in the State & Country Data Codes section of this manual.

Country of Citizenship

REQUIRED Must be two character alpha code indicating the individual's current country of citizenship. Country of Citizenship is subject to change, however Place of Birth should never change.. Valid codes may be found in the State & County Data Codes section of this manual.

Miscellaneous Numbers

Must be a two character alpha code followed by the specific number. The Miscellaneous Identifying Numbers section of the manual contains a complete list of the prefix codes. Examples :

- Passport Number = PP-1234
- Alien Registration Number = AR-5678

- Drivers License Number = DL-XX C325-4755-0166-01 (where XX is state of issue)

Scars, Marks, Tattoos and Amputations

This block should be used to identify specific physical or mental characteristics of the individual fingerprinted. The following identifiers should be coded for submission on the fingerprint card: Artificial Body Parts or Aids; Deafness; Deformities; Abused Drugs; Eye Disorders; Fractured Bones or Healed Fractures; Medical Conditions or Diseases; Medical Devices or Body Implants; Missing Body Parts or Organs; Moles, Needle Marks; Scars; Skin Discolorations or Birthmarks; Tattoos or Removed Tattoos; Therapeutic Drugs used and any other physical characteristics. See the Scars, Marks, Tattoos and Other Characteristics section of this manual for complete coding information.

Residence/Complete Address

Complete address of the individual being fingerprinted.

City

City in which the individual being fingerprinted resides.

State

State in which the individual being fingerprinted resides. A listing of valid codes may be found in the State Code section of this manual.

Official Taking Fingerprints

This block should contain the name of the official taking the fingerprints and/or badge or ID number. Live scan devices should automatically populate this field.

ORI Arresting Agency

REQUIRED This block must be completed whenever the agency that is responsible for the arrest is different than the agency submitting the fingerprint card. Include the agency nine character NCIC agency identifier and the agency name as found in the Agency Identifier table in this manual.

Arresting Agency OCA No.

REQUIRED This block must be completed whenever the agency that is responsible for the arrest is different than the agency submitting the fingerprint card. "OCA" is an FBI/NCIC acronym meaning "originating agency's case number." This number should be unique for one person/one arrest.

Photo Available

If your agency has taken a photo of the individual being fingerprinted and you have that photo on file the "YES" box must be checked.

Palm Prints Taken

If your agency has taken palm prints of the individual being fingerprinted the "YES" box should be checked.

Employer

Include the name and address of the individuals current employer. If the person is unemployed list the last known employer. If U.S. Government employee, indicate specific agency. If in the military, list branch of service and serial number.

Occupation

Include the current occupation of the individual. If unemployed, indicate the type of work the individual has done in the past.

Charge/Citation Literal, Statute No. or Ordinance

REQUIRED This block must contain the appropriate abbreviation or full literal charge and, the statute number related to the literal charge. See the offense section of the manual for the correct literal language and statute number. In the case of an ordinance violation, "ORD" should be placed in the statute number block with a literal description of the offense in the literal block. Do not include ordinance numbers.

In many instances, criminal complaints include statute citations for both the offense and penalty sections. Fingerprint cards should be submitted using the offense statute rather than the penalty statute. Penalty statutes often state penalties for more than one specific offense. By including the offense statute the precise elements of the offense are reported and available. The severity of the offense will be indicated in the elsewhere on the fingerprint card. If the criminal complaint indicates the defendant is charged with Theft under 943.20(1)(a) and 943.20(3)(a), only the offense section; 943.20(1)(a) need be reported. 943.20(3)(a) identifies the offense as a class A misdemeanor.

Contributing Modifiers

Contributing modifiers on cards that are inked and rolled

Agencies that ink and roll fingerprints routinely add modifier information in the charge field. The statute number and literal is followed by the modifier number as in the following example for Party To A Crime of Criminal Damage to Property as Domestic Violence. In the instance of one or more modifier, the statute and literal should be separated by slash "/" .

CHARGE/CITATION LITERAL, STATUTE NO. OR ORDINANCE	NCIC CODE	COUNTS	FELONY	MISD	NON-C
1 PTAC/CRIMINAL DAMAGE PROPERTY/DV 939.05/943.01/968	2901	1		x	

Contributing modifiers on electronically submitted cards

Agencies using livescan or livescan or cardscan devices have the ability to add modifiers by typing in the modifier number. Literal description text will automatically populate the literal field. Commas and spaces are not allowed in the modifier field.

Date of Offense(CCYYMMDD): 20031030 Date of Disposition(CCYYMMDD):

Disposition Code/Literal:

Dispo Remarks:

NCIC Code

REQUIRED Record the appropriate NCIC code for the offense in this space. NCIC codes can be found in the NCIC Code section of the Identification Manual.

Counts

Record the number of counts of specified offense the subject is being charged with.

Felony, Misd, Non-C

REQUIRED Refer to the offense section of the Identification Manual to obtain the appropriate severity for each offense. Ordinance violations should always be listed as "NON-C". These blocks will distinguish the severity of each charge.

Disposition (Field)

Only include on juvenile transactions, probation/parole violations or arrest transactions where the final disposition is known at the time the fingerprint card is submitted.

- **JUVENILE DISPOSITION**. If the juvenile is being processed through the juvenile court system indicate "Ref Juv Authorities." If the juvenile is being waived into adult court, indicate "Waived to Adult Court" followed by the date of waiver.
- **PROBATION/PAROLE VIOLATIONS**. Indicate "TOT Prob/Par Authorities" on all holds for probation/parole authorities. NOTE: If the person was arrested for an offense that will be processed in the court system - process like any other adult arrest.
- **ARREST TRANSACTIONS NOT ALREADY SUBMITTED**. When the fingerprint cards have not been submitted to CIB and the final disposition is known, the "final disposition" information as reported by the court should be placed on the face of the fingerprint card.

Additional Information/Basis for Caution

This block can be used to record additional information regarding the arrest or the individual and/or any additional information that will not fit in any other block.

Private medical data is not appropriate as this information generally becomes public record.

Include information on which to base caution when dealing with person identified by this record.

FINGERPRINT CARD DJ-LE-241, REV 1/96

face side completed example

Impression Side

fingerprint card - impression side

PCN

The Process Control Number is a computer generated, unique numeric identifier preprinted on the card in a barcode format. It is a document/paper identifier. The number is used by CIB to track the document as it is processed, and may be used in the future for document imaging and retrieval. Do not write, mark or place staples in this block.

Leave Blank

This field is for CIB use and should be left blank by the submitting agency.

Local Identification No.

This is a number assigned to the individual who is the subject of the arrest by the arresting or booking agency, or assigned to the individual by the correctional system for prison admissions. The number belongs to the person and stays with that person no matter how many times he/she is arrested. It is the local equivalent of "State Identification Number" or "FBI Number.

Name

(REQUIRED) Always list the complete last and first names. If middle name is known it should also be included. Middle initial should be used when complete middle name is not known, or if the person only uses an initial. If the name is illegible the fingerprint card will be rejected. Printing or typing of the name is recommended.

Name Field - Suffixes

Suffixes are names that follow the last name, such as II, III, Jr., Sr., etc.

Examples: John Robert Smith III, John Smith Sr., John Smith Jr.

Name suffixes should not be confused with abbreviations following the name indicating some type of degree, such as MD, PhD, DDS, DVM, JD, etc.

Name Field - Prefixes

Prefixes precede the name and should not be included. Prefixes include Mr., Mrs., Ms., Miss and Dr.

Name Field - Compound or Hispanic Names

For compound names enter both surnames with or without the hyphen.

For Hispanic names, which usually contain compound surnames (paternal and maternal), the full name including both surnames, if known, should be entered in the name field. For example:

- Subject's Name - Jose Rodriguez-Gonzalez (Hyphenated)
  - Enter Name - RODRIGUEZ-GONZALEZ/JOSE
- Subject's Name - Jose Rodriguez Gonzalez (non-hyphenated)
  - Enter Name - RODRIGUEZ GONZALEZ/JOSE
- Subject's Name - Jose Rodriguez y Gonzalez (Spanish letter "y" in place)
  - Enter Name RODRIGUEZ Y GONZALEZ/JOSE

Additionally, each surname component of the full name should be entered individually as a separate alias to ensure the possibility of a hit should either surname be inquired upon.

When entering each surname component individually as an alias, enter the hyphen or letter "y" if present in the name. Using the above name as an example, the following two aliases would be appended to the base record: RODRIGUEZ/JOSE and GONZALEZ/JOSE.

Other compound surnames should be entered in the same manner as described above.

Name Field - Oriental Names

For Oriental names the last unit should be entered as the master last name. Each of the other units should be entered as a surname/alias, with the other units shown as first and middle name. For example:

- NAI/DONALD/LEE
- LEE/DONALD/NAI

- DONALD/LEE/NAI

Name Field - Single Names

For persons who use only one name; e.g., Moon, the name should be entered as the surname and X entered as the first name. For example:

- MOON/X

Name Field - Gang or Street Names

These types of names usually consists of a single name, making them difficult to index or search. These single name gang or street identifiers should be placed in the remarks section of the fingerprint card. Please identify the remark as a "street" or "gang" name.

Name Field - No Middle Name

If no middle name or initial exists, leave the field blank. Using None, NMN or NMI will cause the middle name field to be populated by those identifiers, rather than properly leaving it blank.

Signature of Person Fingerprinted

This space is to record the signature of the person fingerprinted. If a individual will not sign write "Refused" in this space.

Social Security No.

This number of the person fingerprinted should be included on the fingerprint card if available to your agency.

Aliases/Maiden

When you know that the individual has used other names or dates of birth they should be listed in this block. Maiden names are considered alias names. The master name on a given record is the primary name submitted on the first fingerprint card for that individual.

Maiden or alias names must contain both a first and a last name. If Janet Beth Aldrone marries John Smith and legally takes his name, the next fingerprint card contributed for this subject should have the name Janet Beth Smith listing Janet Beth Aldrone in the alias field. "Nee", indicating a former name, should not be included in the alias field.

FBI No.

The FBI number is assigned to an individual the first time the FBI receives an arrest fingerprint card. The number remains with that person as long as the FBI retains the file.

State Identification No.

The SID number is assigned to an individual the first time an arrest fingerprint card is received at the CIB. The number remains with that person as long as the CIB retains the file.

Some electronic fingerprint submission devices or record management systems may not be able to accommodate state identification numbers exceeding eight characters

(WI999999). In those instances, the preceding WI should be removed from the state identification number and only the seven digit number be submitted (1000020).

Date of Birth

REQUIRED Must be numeric characters representing month, day, and year. Should be separated by slashes for paper submissions in the order (mm/dd/yy or mm/dd/yyyy). However, for electronic fingerprint card submissions, the year must be four characters without separators in the following order: ccyymmdd.

Sex

REQUIRED Sex must be one character, either F (female) or M (male).

Race

REQUIRED Race must be recorded using one of the following codes:

- A-(Asian or Pacific Islander)
- B-(Black)
- I-(American Indian or Alaskan Native)
- W-(White)
- U-(Unknown)

For more information see the race codes in the Personal Descriptors section of this manual.

NOTE: Hispanics should be recorded using one of the above codes.

Height

REQUIRED Must be three numeric characters representing feet and inches. Do not use fractions. Round to the nearest inch. Height coding examples may be found in the Personal Descriptors section of this manual.

Weight

REQUIRED Must be three numeric characters representing weight. Do not use fractions. Round to the nearest pound. Examples for weight entries may be found in the Personal Descriptors section of this manual.

Eyes

REQUIRED Must be three character alpha code as listed in eye color section of Personal Descriptors in this manual.

Hair

REQUIRED Must be a three character alpha code as listed in hair color section of Personal Identifiers in this manual.

Use "XXX" for a completely bald individual and indicate in scar, mark, tattoo field "166" (BALD).

FBI Arrest Fingerprint Card

The State of Wisconsin fingerprint card is based on the FBI arrest fingerprint card. However, there are a few fields that appear on the FBI card that do not appear on the Wisconsin card. These fields all appear on the face side of the card. These fields include:

Reply Desired?

This field consists of a checkbox if the submitting agency would like a result of the FBI fingerprint search returned to them.

Send Copy To

The submitting agency may enter the ORI of any law enforcement agency they want a copy of the results of the FBI fingerprint search returned to. Listings of agency ORIs may be found in the Agency Identifier section of this manual.

State Bureau Stamp

This area if for CIB to indicate the fingerprints have been processed at the state level.

Arrest/Custody Submissions

General Information

The Crime Information Bureau utilizes one fingerprint card for the entire identification process. This card serves as the source document for submission of inked fingerprint impressions and descriptive data to the CIB for persons **ARRESTED OR TAKEN INTO CUSTODY, APPLICANTS, UNKNOWN DECEASED, or other IDENTIFICATION REQUESTS**. The individual completing the fingerprint card must clearly understand the reason that the fingerprints are being obtained and submitted. (Prior to the completions and submission of any fingerprint card ask the question, "Why is this card being submitted? Is this an arrest, custody, applicant, unknown deceased, identification request, or records check?")

The following sections detail the proper completion of the fingerprint card depending on the "type of transaction."

Submission Type

The following codes are to be used in the submission type field for those agencies submitting fingerprint cards electronically.

Submission Type	Submission Code
Arrest	AR
Death Notice	DN
DNA Sample Registration	DS
Jail Intake	JL
Parole Registration	PL
Prison Intake	PI
Probation Registration	PB
Sex Offender Registration	SO

Arrests

State statute. 165.83 Criminal identification, records, and statistics. This section requires the Department of Justice to obtain and file fingerprints, descriptions, photographs and other available data on persons who have been *arrested or taken into custody* in this state.

- For an offense which is a felony.
- For an offense which is a misdemeanor or a violation of an ordinance involving:
  - burglary tools
  - commercial gambling
  - dealing in gambling devices
  - contributing to the delinquency of a child
  - dealing in stolen property
  - controlled substances under Chapter 961
  - firearms
  - dangerous weapons
  - explosives
  - pandering
  - prostitution
  - sex offenses where children are victims
  - worthless checks
- For an offense charged as disorderly conduct but which relates to an act connected with one or more of the above listed offenses.
- As a fugitive from justice.
- For any other offense designated by the Attorney General; e.g., stalking and harassment.

State statute 165.84 Cooperation in criminal identification, records and statistics. This section requires law enforcement agencies to obtain fingerprints and photographs for the offense listed in 165.83, and the authority to submit fingerprints for other offenses at their discretion.

The fingerprint card is to be completed as an "arrest transaction" if the person whose fingerprints appear on the card is an individual who:

- has been arrested or taken into custody for a violation of a state law or local ordinance by the "contributing" agency, for having allegedly committed a violation in the jurisdiction of the "contributing" agency or
- has been arrested or taken into custody for a violation of a state law or local ordinance by an agency within the jurisdiction of the contributing agency; however, the "arresting" agency requests the "contributing" agency to submit the fingerprint card in behalf of the "arresting" agency. (This is not to be confused with the situation wherein the contributing/arresting agency has effected an arrest for another

jurisdiction (warrant, CIB, NCIC hit, APBD, etc.) in this case the transaction becomes a "custody." See Custody Transactions.)

Domestic Abuse Arrests

Fingerprint cards submitted to CIB that involve domestic abuse need to have that information included with the primary statute. Arrests involving incidents of domestic violence are disqualifying offenses for purposes of firearms transfers. Individuals committing a domestic abuse should be arrested for the specific offense that they violated, i.e., battery, 940.19 (1), and the literal should include the fact that domestic abuse was involved.

Literal wording that indicates domestic abuse should be included with the offense literal. The following abbreviations can be used to indicate domestic abuse:

DV	Domestic Violence
DAC	Domestic Abuse Contact
DA	Domestic Abuse
DAI	Domestic Abuse Injunction
DVIP	Domestic Violence in Progress

CIB has created an in-house modifier statute that equals domestic abuse - 968. That statute may also be included with the primary offense statute.

Examples of offenses including domestic abuse:

- Batt/DV 940.19 (1) / 968.
- DC-DAC 947.01/968.
- Dom Abuse/DC 968./947.01

Statute 968.075 (5) (a)

There is only one arrest statute within the Domestic Abuse Law. Statute 968.075 (5) (a) is indicated for an arrest when an individual has violated the 72 hour no contact provision. Under this circumstance, the offender should have been fingerprinted for the original charge which included domestic violence. The additional information block on the card should indicate that this new charge is a violation of the 72 hour no contact provision. Without an explanation to verify that this offense is a violation under the 72 hour no contact provision, the card will be returned to the contributing agency for clarification of the arrest charge. When an individual is in violation of the 72 hour no contact violation, complete the offense section of the arrest card as follows:

- Domestic Abuse Contact Vio 968.075 (5) (a)

The additional information block should indicate that this arrest is in violation of the 72 hour no contact provision.

Traffic Arrests

Crime Information Bureau will accept fingerprint cards for both felony and non-felony traffic offenses. Final disposition reports for non-felony traffic offense are

not accepted. Disposition information for these offenses is available from the Department of Transportation.

Fingerprinting Juveniles

Section 165.83(2), Stats., requires the Law Enforcement Services Division (Crime Information Bureau) of the Department of Justice to obtain and file fingerprints, descriptions, photographs, and other available identifying data on "persons" who have been arrested or taken into custody in this state for violation of offenses set forth in subsection (2)(a). Local law enforcement agencies are to cooperate and assist in the establishment of a state system of criminal identification by reason of sec. 165.83(2)(h) and sec. 165.84, Stats. The latter section requires local law enforcement to secure the information referred to in sec. 165.83(2), Stats., from each "person" arrested or taken into custody and to report the same to the Department of Justice.

The Crime Information Bureau will continue to accept and process juvenile fingerprint cards in accordance with s. 165.83 (2) and Attorney General Opinion 10-73, as follows:

Law Enforcement – Minors – Confidential Reports *– Identification records should be made by local law enforcement agencies of juveniles arrested or taken into custody pursuant to sec. 165.83(2), Stats., for confidential reporting to the Department of Justice.*

February 27, 1973

Gerald K. Anderson, District Attorney
Waupaca County

Deputy Assistant District Attorney Terry Rebholz has requested my opinion whether the identification records and statistics required by sec. 165.83, Stats., should be made and kept for juveniles

It is my opinion that they should.

Section 165.83 (2), Stats., requires the Law Enforcement services division of the Department of Justice to obtain and files fingerprints, descriptions, photographs, and other available identifying data on "persons" who have been arrested or taken into custody in this state for violation of offenses set forth in subsection (2) (a). Local law enforcement agencies are to cooperate and assist in the establishment of a state system of criminal identification by reason of sec. 165.83 (2) (h) and sec. 165.84, Stats. The latter section requires local law enforcement agencies to secure the information referred to in sec. 165.83 (2), Stats., from each " person" arrested or taken into custody and to report the same to the Department of Justice.

As used in these statutes, the words "person" or "persons" include human beings above and below the age of 18 years. Secs. 48.02 (3) and 990.01 (1), (20), (26), Stats.

The local law enforcement agency and the Law Enforcement Services Division should keep such records separate from records of persons 18 or older and should otherwise comply with provisions of sec. 48.26 (1) and (2), Stats., which provide:

> *"(1) Peace officers' records of children shall be kept separate from records of persons 18 or older and shall not be open to inspection or their contents disclosed except by order of the court. This subsection shall not apply to the representatives of newspapers or other reporters of news who wish to obtain information for purpose of reporting news without revealing the identity of the child involved or to the confidential exchange of information*

between the police and officials of the school attended by the child or other law enforcement or social welfare agencies or to children 16 or older who are transferred to the criminal courts.

(2) Juvenile court records shall be entered in books or deposited in files kept for that purpose only. They shall not be open to inspection or their contents disclosed except by order of the court."

The exchange of such information between the local law enforcement agency and the Law Enforcement Services Division is permitted under the "confidential exchange of information" exception in sec. 48.26, Stats. Without order of the court, the records are closed to inspection by the public as the provisions of sec. 48.26, Stats., permit.

It is my opinion that sec. 48.26, Stats., would not prohibit the local agency or the Law Enforcement Services Division from utilizing the information contained therein in reporting statistical information to the public which does not disclosed the identity of the child or children involved.

RRW:RJV

A fingerprint card submitted to CIB indicating the subject is a juvenile but is checked *treat as an adult* will cause the disposition to be left open waiting for a disposition from the court.

A fingerprint card submitted to CIB indicating the subject is a juvenile without an indicator to *treat as an adult* will automatically default to a disposition of *turned over to juvenile authorities.* The booking agency should still obtain and complete a disposition form, including the ATN, at the time of booking should the juvenile be subject to waiver at a later time. Local policy between the booking agency, prosecutor and court should determine whether the booking agency hold the disposition pending waiver or forward with the case file. If the subject is waived, the disposition should follow the case through court to eventually be reported to CIB. When the court submitted disposition is received by CIB, the submitted court disposition will be used to overwrite the automatically applied juvenile disposition. If the juvenile is not waived the disposition should be destroyed. This process eliminates the need for the booking agency to notify CIB independently that a juvenile has been waived.

Wisconsin law does not permit the submission of juvenile fingerprint cards to the FBI unless the juvenile has been waived.

Custody Transactions

Jail intake fingerprint cards are accepted through electronic submissions using live scan or card scan equipment. The submission type that should be used is "JL" and not "AR" for arrest. The intake card should include the charge statute and literal, and the length of sentence to be served.

Jail intake cards that are contributed by mail should indicate "JAIL INTAKE" in the "additional information" or "disposition" field. The intake card should include the charge statute and literal, and the length of sentence to be served.

Jail intake cards for individuals that are being held for or turned over to another *Wisconsin* agency should not be submitted. The originating agency should be contributing the arrest record.

Those agencies booking subjects arrested on warrants for other states (UCEA), or on federal charges should contribute a fingerprint card to CIB as a jail intake

(submission type “JL”) Please include the charge, and the agency the individual is being turned over to.

Individuals being housed temporarily or in transit for federal agencies may also be contributed to the Crime Information Bureau.

When submitting disposition or sentencing information on jail intake cards, it is important to remember that the disposition date reported cannot occur prior to the arrest date. Either the original arrest date should be reported with the date of the court sentence or the disposition date reported on the submission should be the same as the date of jail intake as indicated in the date of arrest field.

State Penal and Correctional Institutions

State penal and correctional institutions are required under Wis. Stats. 165.84(4) to "obtain fingerprints, according to the fingerprint system of identification established by the director of the FBI, and full face and profile photographs of all persons received on commitment to these institutions. The prints and photographs so taken shall be forwarded to the division, together with any other identifying data requested, within 10 days after the arrival at the institution of the person committed."

In these instances the only entry needed is "custody", the reason for the custody in the charge area, and in the disposition area the period of detention.

Probation and Parole Arrests

When an individual is arrested or taken into custody for a parole or probation violation at the request of a probation/parole officer, the charge block must properly reflect the specific literal charge, statute number and NCIC code, e.g.:

- Parole Violation, 304.06, NCIC 5011
- Probation Violation, 973.10, NCIC 5012

Do not indicate the offense for which the person is on probation/parole or the offense which necessarily caused the violation, (the offense that caused the violation should be processed as a separate arrest transaction, if that was the case). The final disposition area should indicate that the individual was "turned over to" probation/parole.

FINAL DISPOSITION REPORTS ARE NOT REQUIRED FOR PROBATION/PAROLE ARRESTS, THE FINAL DISPOSITION ON THESE ARRESTS IS ALWAYS, "TURNED OVER TO (TOT) PROBATION/PAROLE."

Identification Photos

Mug Shots from Correctional Facilities

Wisconsin Stats. 165.84(4) require that:

"All persons in charge of state penal and correctional institutions shall obtain fingerprints, according to the fingerprint system of identification established by the director of the FBI, and full and profile photographs of all persons received on commitment to these institutions. The prints and photographs so taken shall be forwarded to the division, together with any other identifying data requested, within 10 days after the arrival at the institution of the person committed. Full length

photographs in release dress shall be taken immediately prior to the release of such persons from these institutions. Immediately after release, these photographs shall be forwarded to the division."

When photographs are submitted it is essential that the contributing institution identify the photograph by printing legibly on the back of the photo the individual's name, sex, race, date of birth, and SID number (if known). This procedure will ensure placement of the photograph in the correct identification file.

Mug Shots from Law Enforcement Agencies

Electronic fingerprint submittals may include one or more Type-10 mug shot images. These images should be compressed using JPEG, and should conform to the National Institute of Standards and Technology (NIST) best practices for mug shot images.

Applicant Submissions

General

The Crime Information Bureau processes and checks applicant/licensee fingerprint cards for law enforcement positions, NCIC security clearance, watchman/guard (440.26), lottery positions, Indian gaming, and other employment requests that require fingerprinting as provided by State statute. These cards are processed, searched through the file, and returned to the law enforcement agency for filing along with any information obtained on whom the card was submitted. Prior to July 1, 1987, applicant cards for purposes other than law enforcement were processed at no cost to the requesting agency. Statute 165.82 mandates that the Crime Information Bureau imposes a search fee for each search of the criminal history files for purposes unrelated to criminal justice. Upon submission of an applicant card the contributing agency will receive one of two types of return information.

- **NO RECORD:** An applicant card received and processed that results in no discovery of a prior record in the CIB files will be stamped "APPLICANT" and returned to the contributing agency with the notation of "NO RECORD OUR FILES" stamped across the charge block of the fingerprint card.
- **RECORD ATTACHED:** An applicant card received and processed that results in the disclosure of a prior record in the CIB files will be stamped "APPLICANT" and returned to the contributing agency with the notation of "IDENTIFICATION TRANSCRIPT ATTACHED" stamped across the charge block of the fingerprint card.

Fingerprint-based background checks are also available from the FBI only when pursuant to a state statute approved by the United States Attorney General or by federal law.

All applicant fingerprint requests may be submitted on FBI applicant fingerprint cards. CIB will process applicant requests whether received on FBI applicant cards or CIB fingerprint cards clearly marked “applicant”.

Law Enforcement Applicant Card & NCIC Security Clearance

The administrative rules of the Law Enforcement Standards Board Chapter LES2 list Recruitment Qualifications for law enforcement agencies. LES2.01(f) states "the applicant shall be of good character" and LES2.01(f)(1)(A) further states that "good character" shall be determined in part from "the fingerprinting of all applicants with a search of local, state, and national fingerprint records." Pursuant to the administrative rules, law enforcement agencies must obtain the fingerprints of all applicants prior to employment with their law enforcement agency. The "law enforcement applicant" must be printed and two fingerprint cards submitted. These cards can either be one standard CIB card and the FBI applicant card, or two FBI applicant cards.

If used, the Crime Information Bureau's card must be completed with special attention given to indicating in the "final disposition" block that the individual fingerprinted is a law enforcement applicant or is for NCIC security clearance and noting the name of the law enforcement agency that will be employing the individual on the reverse side of the card in the "employer" block. Submission of the card to the Crime Information Bureau will result in one of the standard responses as indicated in the preceding section.

NCIC Security Clearance

Thorough background screening by the employing agency of personnel is required. State and national criminal history record checks by fingerprint identification must be conducted for terminal operators, programmers, and other persons employed or utilized effectuate access to or initiate transmission of NCIC information. CIB and NCIC Wanted Person Files must also be checked. Good management practices dictate that record checks should be completed prior to employment or assignment to a terminal with NCIC access.

Sworn personnel who have been fingerprinted and certified by the Law Enforcement Standards Board already meet this requirement.

Comments:

- The employing agency must complete and submit a CIB (green) and FBI (blue) applicant fingerprint card to the CIB.
- On the CIB (green) applicant fingerprint card “Purpose Code J-NCIC Security Policy" should be stated in the "Charge/Citation Literal" block of the fingerprint card.
- On the FBI (blue) applicant fingerprint card the “Purpose Code J-NCIC Security Policy” should be used in the "Applicant For" and "Reason Fingerprinted" block of the fingerprint card.
- If a criminal record or a wanted person record is found, the employing agency must delay granting NCIC access until the matter is reviewed.
- When identification of the applicant or employee has been established by fingerprint comparison and he/she appears to be a wanted person or to have an arrest history for a felony or serious misdemeanor, the matter will be referred to the agency head or designee for review and determination.

NOTE: A denial of NCIC access may not be sufficient grounds for denial of employment. Agencies must consider the provisions of Chapter 111, Wisconsin Statutes, relating to employment discrimination).

- Each criminal justice agency authorized to receive NCIC information must have appropriate written standards for discipline of NCIC policy violators.
- Each TIME System agency is required to maintain documentation relating to individual personnel security. This information must be available for compliance verification by CIB and or NCIC audit staff.

General Applicant Cards

Fingerprint cards may be submitted for watchman/guard licensing, pari-mutuel/lottery positions, Indian gaming, teacher licensing, caregiver or daycare, and other employment requests for licensing purposes as required by state statute. In addition, certain applicant cards may be submitted pursuant to federal law, such as the Volunteers for Children Act or Public Law 105-277 (Home Health Care and Nursing Facilities). These are processed in the same manner as the law enforcement applicants with the exception that a "search fee" will be imposed for each request. Minimum required data must be supplied with the appropriate fee on the card and submission of the card to the CIB will result in one of the standard responses.

Fingerprint cards for watchman/guard licensing, pari-mutuel/lottery positions, Indian gaming, teacher licensing, caregiver or daycare licensing are submitted using the ORI of the state agency authorized to request such background checks. Background checks for home health care and nursing facilities or submitted under the Volunteers for Children Act are submitted under CIB's ORI and the FBI responds directly to CIB.

Minimum Data Requirements

When an individual requests to be fingerprinted as an applicant, the person taking the fingerprints should always verify the identity of the person being fingerprinted prior to the taking of the prints. Some form of official photo identification is the best method of verifying identification. Applicant fingerprint cards contain the following required data:

Name

REQUIRED Indicate the full and complete name of the person who is being fingerprinted

Aliases

Indicate any alias or maiden names the person being fingerprinted has used.

Signature of Person Fingerprinted

REQUIRED The person being fingerprinted must sign the applicant card.

Residence of Person Fingerprinted

Fill in the complete address of the person being fingerprinted.

Contributor ORI and Name

REQUIRED All applicant fingerprint cards should come pre-printed with the ORI and name of the agency submitting the fingerprints. All responses on applicant fingerprints will be sent to the agency identified by the information in his field.

Date of Birth

REQUIRED Fill in the date of birth of the person being fingerprinted in the appropriate format.

Citizenship

Complete the field with the appropriate code for the country in which the person being fingerprinted holds citizenship status. This may or may not be the same country as indicated in the Place of Birth field.

Sex

REQUIRED Indicate the sex of the person being fingerprinted using the appropriate one-character alphabetic code.

Race

REQUIRED Indicate the race of the person being fingerprinted using the appropriate one-character alphabetic code.

Height

REQUIRED Indicate the height of the person being fingerprinted using the appropriate three digit numeric code.

Weight

REQUIRED Indicate the weight of the person being fingerprinted using the appropriate three digit numeric code.

Eye Color

REQUIRED Indicate the eye color of the person being fingerprinted using the appropriate three character alphabetic code.

Hair Color

REQUIRED Indicate the hair color of the person being fingerprinted using the appropriate three character alphabetic code.

Place of Birth

REQUIRED Indicate the place of birth using the appropriate two character alphabetic code.

Your No. (OCA)

Include any specific information necessary to further identify the applicant fingerprint card for your agency. CIB uses this field for billing purposes to record the submitter's billing account number. An account number is required in this field for any applicant fingerprint for which a fee is charged.

FBI No.

Include the applicant's FBI number, if known.

Armed Forces No.

Include the applicant's military service identification number, if applicable.

Social Security No.

Include the applicant's social security number.

Miscellaneous No.

Include any applicable miscellaneous identification numbers the applicant may use.

Date Fingerprinted

REQUIRED Indicate the month, day and year the fingerprints were obtained.

Official Taking Fingerprints

REQUIRED This field must contain the name of the official physically taking the applicant's fingerprints.

Employer and Address

Indicate the name and address of the employer for which the applicant is applying or has been hired for the position requiring submission of fingerprints.

Reason Fingerprinted

REQUIRED Indicate the reason applicant fingerprints are being submitted (police officer, jailer, NCIC security clearance, security guard, Volunteers for Children Act, teacher licensing, etc.)

[2] CIB fee of $15.00 and FBI fee of $18.00

Altering Applicant Fingerprint Cards

Many applicant card submitters have used highlight markers on applicant fingerprint cards to indicate fields to be filled out by the applicant. Use of any highlighters on fingerprint cards will cause the card to be rejected by the FBI.

Resubmitting Rejected FBI Applicant Cards

The FBI will allow applicant fingerprint cards rejected due to poor print quality to be submitted one time without additional charge provided the control number provided with the rejected card is submitted with the new card.

The FBI will not accept, without additional charge, resubmission of applicant fingerprint cards rejected for errors or omissions in the administrative data.

Other Fingerprint Submissions

Unknown Deceased

Law enforcement agencies must obtain and the Crime Information Bureau must process fingerprints from all unknown deceased human corpses found in Wisconsin (see Section 1, Wis. Stats 165.83(c) and 165.84).

When fingerprinting an unknown deceased for submission to the CIB, every effort must be made to include as many elements of minimum required data as possible. Basic elements are:

- NAME (In this block indicate "UNKNOWN DECEASED")
- SEX/RACE
- APPROXIMATE AGE
- HEIGHT AND WEIGHT
- EYE AND HAIR COLOR
- OCA NUMBER
- DATE RECEIVED

Law enforcement agencies should utilize the "Face" side of the card, "ADDITIONAL INFORMATION BLOCK", to supply details surrounding the death (e.g., approximate time and date of death, location of body, etc.) If the unknown deceased is positively identified by the local agency after submission of the fingerprint card, the local agency must notify the Crime Information Bureau by letter. When notifying by letter, indicate that the individual has been identified, who the individual is, and supply all the descriptive data that was furnished at the time of submission.

Probation and Parole Registration

Probation and parole registration cards are accepted at the Crime Information Bureau, processed, and retained in file. Fingerprints should be obtained for probation/parole registration if registration is the only reason for printing and this should not be confused with probation/parole violation or arrests. When obtaining fingerprints for a probation/parole registration make no entries in the charge, statute/ord, or NCIC blocks.

The reverse side of the fingerprint card, "additional information block" can be used to indicate the reason the individual is on probation/parole and the length of the probation/parole.

Probation/parole registration cards must contain the minimum required data for submission:

- NAME
- SEX/RACE
- HEIGHT AND WEIGHT
- EYE AND HAIR COLOR
- DATE OF BIRTH
- DATE RECEIVED
- CONTRIBUTOR ORI AND NAME

When submitting a paper fingerprint card for probation or parole registration, indicate either PROBATION REGISTRATION or PAROLE REGISTRATION in the Disposition field of the fingerprint card. If submitted the card electronically, the Disposition field should remain blank and the card submission type should be PROBATION/PAROLE REGISTRATION.

Probation/parole registration cards are processed at the CIB and retained in file. A STATE IDENTIFICATION NUMBER (SID number) will be assigned and the contributing agency will receive an "Agency Activity Report" indicating the SID number, agency OCA number, and the descriptive data relating to the card submitted.

Sex Offender Registration

Sex offender registration cards are accepted at the Crime Information Bureau, processed, and retained in file. When obtaining fingerprints for a sex offender registration make no entries in the charge, statute/ord, or NCIC blocks.

The reverse side of the fingerprint card, "additional information block" can be used to indicate the reason the individual is on the sex offender registry and the length of the registration.

Sex offender registration cards must contain the minimum required data for submission:

- NAME
- SEX/RACE
- HEIGHT AND WEIGHT
- EYE AND HAIR COLOR
- DATE OF BIRTH
- DATE RECEIVED
- CONTRIBUTOR ORI AND NAME
- SID (if one exists)

When submitting a paper fingerprint card for sex offender registration, indicate SEX OFFENDER REGISTRATION in the Disposition field of the fingerprint card. If

submitted the card electronically, the Disposition field should remain blank and the card submission type should be SEX OFFENDER REGISTRATION.

Sex offender registration cards will be processed at the CIB and retained in file. A STATE IDENTIFICATION NUMBER (SID number) will be assigned if none currently exists and the contributing agency will receive an "Agency Activity Report" indicating the SID number, agency OCA number, and the descriptive data relating to the card submitted.

If no SID and/or FBI number exist for the sex offender registrant and the agency contributing the sex offender registration is the arresting agency for the original sex offense, the contributing agency should attempt to reconstruct the information surrounding the original, underlying offense and submit the reconstructed arrest card in lieu of the sex offender registration card.

DNA Registration Transmittal

Criminal justice agencies that are required to collect and submit DNA specimens to the Wisconsin DNA Databank are asked to contribute a complete ten print fingerprint card of the individual if a no state identification number (SID) exists for the individual. This procedure ensures all DNA registrants within the state database will also be recorded at the Crime Information Bureau.

The fingerprint card should include the rolled images of all ten fingers, as well as the plain impressions. Additional required data includes:

1. THE NAME OF THE REGISTRANT
2. THE STATE IDENTIFICATION NUMBER (SID)

   If no SID exists for the subject leave blank. Agencies submitting DNA registration fingerprints electronically will receive a response containing the SID within minutes of submission. Ink and roll fingerprint submissions may take several weeks for the assignment of a SID number.
3. THE MONTH, DAY AND YEAR OF BIRTH
4. SEX/RACE
5. HEIGHT/WEIGHT
6. EYE AND HAIR COLOR
7. THE DATE OF THE REGISTRATION (RECORD IN THE DATE OF ARREST BLOCK)
8. THE CONTRIBUTING AGENCY
9. THE PLACE OF BIRTH AND COUNTRY OF CITIZENSHIP

The contributor should submit the fingerprints electronically using the DNA Registration template contained in their live scan device or, if submitting an inked fingerprint card, record “DNA Registration” within the charge block.

For questions relating to this procedure, please contact the WI DNA Databank at the Madison State Crime Laboratory, 4626 University Avenue, Madison, WI 53705, (608) 266-2031.

Additional DNA Guidelines

The Wisconsin Department of Justice, State Crime Laboratory-Madison is making a special request to all sheriffs' offices that collect biological specimens from obligated offenders. At issue are the savings to be realized by decreasing the number of duplicate specimens taken from one person.

Under current DNA collection procedures, you are asked to make an inquiry through the CIB computerized criminal history records (CCH) for a person before collecting a DNA specimen. Any person whose DNA specimen has already been taken will have a flag at the top of their criminal record stating that DNA is available. If this flag exists a second specimen is not required.

The collection process is as follows:

1. Verify the person's identity using some type of identification card containing a photo.
2. Determine the person's DNA status by searching the CIB computerized criminal history records (CCH).
3. If a DNA specimen has not already been taken, please obtain a specimen following the instructions in the WI DNA Databank Buccal Swab Collection Kit.
4. If no SID exists for the individual, submit a DNA Registration fingerprint card to CIB.

Identification Requests

A law enforcement agency may desire to check an individual's identity or past criminal record for an investigation being conducted before an actual arrest has been made. The Crime Information Bureau will process these fingerprint cards and return the completed card to the contributing agency with either "NO PREVIOUS RECORD" or "IDENTIFICATION TRANSCRIPT ATTACHED" stamped in the charge block of the fingerprint card.

The law enforcement agency submitting a fingerprint card for this purpose must indicate in the "final disposition block" the reason the card is being submitted as "criminal investigation." This will ensure proper processing of the fingerprint card.

Final Dispositions

Use of Final Disposition Form

Wisconsin Statute 165.83(2)(f) requires the Division of Law Enforcement Services (Crime Information Bureau) to "*collect information concerning the number and nature of offenses known to have been committed in this state, the legal action taken in connection with such offenses from the inception of the complaint to the final discharge of the defendant*." 165.84(5) states that "*All persons in charge of law enforcement agencies, all clerks of court, all municipal justices where they have no clerks, all persons in charge of state and county penal and correctional institutions, and all persons in charge of state and county probation and parole offices, shall supply the division with the information described in statute 165.83(2)(f) on the basis of the forms and instructions*" which are furnished by the Division of Law Enforcement Services (Crime Information Bureau).

It is mandatory therefore that "complete records" be maintained in the CIB files, and a record is not considered complete until a final disposition is reported to the CIB immediately after it is reached. A final disposition is "information disclosing that criminal proceedings have been concluded". This includes disclosing that law enforcement has elected not to refer a matter to the prosecutor, that the prosecutor has elected not to commence criminal proceedings or information disclosing that proceedings have been indefinitely postponed if the reason for such postponement is indicated.

If the law enforcement agency is aware of the "final disposition" of an arrest transaction at the time a fingerprint card is completed and submitted, the final disposition must be listed in the appropriate block on the fingerprint card.

FINAL DISPOSITION REPORTS ARE REQUIRED FOR ALL ARREST TRANSACTIONS.

When the law enforcement agency refers the matter to the prosecutor, the partially completed Final Disposition Report must accompany the case papers. If the prosecutor determines the disposition (e.g. no prosecution), the report must be completed and submitted to the CIB.

If proceedings commence, the prosecutor must furnish the court the partially completed Final Disposition Report received from the law enforcement agency. When the case is adjudicated, the clerk of court must complete the report and submit it to the CIB or report the disposition electronically through the Circuit Court Automation Program.

Juvenile Dispositions

Occasionally courts contribute juvenile disposition information to CIB. Unless provided for by statute, CIB is not authorized to receive juvenile disposition information from a court. Those circumstances under which courts are required to submit juvenile disposition information to CIB are:

1. s. 51.20(13)(cv)4 - When committed involuntarily by a court and ordered not to possess a firearm.
2. s. 938.396(8) - When adjudicated delinquent for an act that would be a felony if committed by an adult. This information may only be used as part of a firearms restriction search under s. 175.35(2g)(c).
3. s. 938.396(9) - When adjudicated delinquent for committing a serious crime as defined in s. 48.685(1)(c). This information may only be disclosed as part of a criminal history record search under 48.685(2)(am)1. or (b)1.a (daycare background check).

Other than these exceptions, no juvenile disposition information should be contributed to CIB. When required, juvenile disposition information for these exceptions should be submitted using for DJ-LE-FH9. This form is to be completed by the court and the green copy mailed to:

Crime Information Bureau
Attention: Handgun Hotline
P.O. Box 2718
Madison, WI 53701-2718

Any juvenile disposition information not meeting this criteria will not be retained by CIB.

Juvenile Waivers

A fingerprint card submitted to CIB indicating the subject is a juvenile but is checked *treat as an adult* will cause the disposition to be left open waiting for a disposition from the court.

A fingerprint card submitted to CIB indicating the subject is a juvenile without an indicator to *treat as an adult* will automatically default to a disposition of *turned over to juvenile authorities.* The booking agency should still obtain and complete a disposition form, including the ATN, at the time of booking should the juvenile be subject to waiver at a later time. Local policy between the booking agency, prosecutor and court should determine whether the booking agency hold the disposition pending waiver or forward with the case file. If the subject is waived, the disposition should follow the case through court to eventually be reported to CIB. When the court submitted disposition is received by CIB, the submitted court disposition will be used to overwrite the automatically applied juvenile disposition. If the juvenile is not waived the disposition should be destroyed. This process eliminates the need for the booking agency to notify CIB independently that a juvenile has been waived.

Final Disposition Description

The Final Disposition Report (DJ-LE-249) is a single copy white form, 8" x 8", with green colored printing. The left side of the Final Disposition Report provides blocks for descriptive information of the individual, the Contributing/Arresting Agency,

their OCA number, State Identification Number and arrest data. The right side provides space for action taken by the Prosecutor or Clerk of Court, along with the Court Case Number. This includes Findings & Sentence information or any additional information that explains actions taken by the court.

Only final disposition forms containing a field for the ATN (Arrest Tracking Number) are to be used. All other disposition forms should be destroyed.

Final Disposition Content

FBI No.

This space is for the arresting agency to record the FBI Number assigned to the person fingerprinted, if known. If a copy of the disposition is to be forwarded to the FBI an "X" must be placed into the related block.

CIB electronically forwards all adult arrests to the FBI. Non-criterion offenses are searched but not retained by the FBI.

FBI Checkbox

Check this box if fingerprint card was submitted or forwarded to the FBI for this offense.

CIB forwards all adult arrests to the FBI. Non-criterion offenses are searched but not retained by the FBI. All felony , misdemeanor and any offenses that disqualify the subject from obtaining a firearm are retained by the FBI.

Name (Last/First/Middle/Suffix)

REQUIRED This space is to record the name of the individual whose fingerprint impressions appear on the right portion of the Report. THE LAST, FIRST AND MIDDLE NAME MUST APPEAR AND BE SPELLED LETTER FOR LETTER EXACTLY AS IT IS SPELLED ON THE RELATED FINGERPRINT CARD.

Date of Birth

REQUIRED This space is to record the date of birth of the individual whose fingerprint impressions appear on the Final Disposition Report. The order of this data must be; Month (01 thru 12), Day (01 thru 31), and Year (00 thru 99). THE DATE OF BIRTH MUST BE INDICATED AND MUST BE NUMBER FOR NUMBER EXACTLY AS IT WAS RECORDED ON THE RELATED FINGERPRINT CARD SUBMITTED TO THE CIB.

Sex/Race

REQUIRED The appropriate codes for sex and race must be entered describing the person fingerprinted.

Arrest Tracking Number

REQUIRED This space is used to indicate the arrest tracking number relating to the original arrest.

WI Identification No. (SID)

This space is to record the Wisconsin State Identification Number assigned to the individual by the CIB, if known.

Contributor ORI

REQUIRED This space is to record the contributor of the fingerprints. The name of the contributing agency must be entered exactly as it appears on the related fingerprint card sent to the Crime Information Bureau. The nine digit ORI jurisdiction number assigned to the agency must be included.

Arresting Agency ORI

REQUIRED This space is to record the "arresting agency" if different than the "contributor" of the fingerprint card. The nine digit ORI jurisdiction number assigned to the agency must be included.

Contributor OCA No.

REQUIRED The "contributing agency" OCA (originating case agency number) must appear here and it must be the same as that recorded on the related fingerprint card submitted to the CIB.

Date of Arrest

REQUIRED This space must contain the date the person fingerprinted was arrested or fingerprinted and this date must be exactly the same as the date indicated on the related fingerprint card submitted to the CIB.

Date of Offense

REQUIRED This space should contain the date or approximate date of the alleged offense.

Offense Reported by Arresting Agency

REQUIRED This block is to record necessary data relating to the charge(s) for which the person fingerprinted was arrested or taken into custody. Space is provided for one arrest charge on each Final Disposition Report and it must appear exactly as it appears on the related fingerprint card submitted to the CIB. First record the "literal" charge, using authorized abbreviations. Also include the following:

Charge/Citation (Literal, Statute No. or Ordinance, NCIC Code)

REQUIRED This space is to record the state statute corresponding to the literal charge. When the charge is made for a local ordinance violation, enter "local ord"

rather than cite the specific number of the local ordinance. **The statute numbers must appear exactly the same as they appear on the fingerprint card submitted to the CIB.**

Record the NCIC OFFENSE code which corresponds to the "Literal Charge" and "statute/ord" information. THE NCIC OFFENSE CODE MUST BE EXACTLY THE SAME AS THE NCIC CODE ON THE RELATED FINGERPRINT CARD SUBMITTED TO THE CIB.

In many instances, criminal complaints include statute citations for both the offense and penalty sections. Fingerprint cards should be submitted using the offense statute rather than the penalty statute. Penalty statutes often state penalties for more than one specific offense. By including the offense statute the precise elements of the offense are reported and available. The severity of the offense will be indicated in the elsewhere on the fingerprint card. If the criminal complaint indicates the defendant is charged with Theft under 943.20(1)(a) and 943.20(3)(a), only the offense section; 943.20(1)(a) need be reported. 943.20(3)(a) identifies the offense as a class A misdemeanor.

Offense Charged by Prosecutor/District Attorney

This area is to be completed when the prosecutor or district attorney changes the charge the arresting agency originally filed against the individual this document relates to. The literal description of the offense is to be included, along with the Statute/Ordinance No. and NCIC Code.

Literal

List the literal offense for which the subject is being charged if other than the original arrest charge.

Statute/ORD. Citation

List the corresponding statute number for the offense now being charged. If an ordinance violation, the word “ORD” should be used.

In many instances, criminal complaints include statute citations for both the offense and penalty sections. Fingerprint cards should be submitted using the offense statute rather than the penalty statute. Penalty statutes often state penalties for more than one specific offense. By including the offense statute the precise elements of the offense are reported and available. The severity of the offense will be indicated in the elsewhere on the fingerprint card. If the criminal complaint indicates the defendant is charged with Theft under 943.20(1)(a) and 943.20(3)(a), only the offense section; 943.20(1)(a) need be reported. 943.20(3)(a) identifies the offense as a class A misdemeanor.

NCIC Code

List the NCIC code appropriate for the offense being charged.

Court Case/Docket

This space is for the Clerk of Court to record the case number that has been assigned to the person and case related to the arrest data furnished on the Final Disposition Report and corresponding to the arrest fingerprint card.

Final Disposition

REQUIRED This space is for reporting the final action the court or prosecutor is taking against the individual who this document relates to.

Date

REQUIRED Record the date on which the final action was taken. Remember the disposition date can never precede the date of arrest.

If Conviction, Indicate

These spaces are to indicate if the conviction being reported is a felony offense, misdemeanor offense, or non-criminal (forfeiture or ordinance) offense.

Disposition Completed By:

ORI: WI

REQUIRED This space is for the Clerk of Court or prosecutor to record their nine digit agency ORI jurisdiction number.

Agency

REQUIRED Indicate the employing agency of the person completing the final disposition form.

Date

REQUIRED Record the date the final disposition form was completed.

Name

Report the name of the person completing the final disposition form.

Title

Indicate the title of the person completing the final disposition form. (e.g. Clerk of Court, Law Enforcement Agency, District Attorney or Municipal Court.)

Right Four Fingers Taken Simultaneously

Inked fingerprint impressions of the person fingerprinted must be placed in this area by the contributing/arresting agency at the time the fingerprint impressions are taken on the related fingerprint card. The fingerprint impressions on the Final disposition Report are not rolled impressions, they are obtained by inking the right four fingers and placing them simultaneously in the appropriate area. If it is necessary to place impression(s) of other than the right four fingers, legibly record which fingers appear.

Contributing/Arresting Agency Completion of Final Disposition

When an individual is taken into custody for an offense the fingerprint card and Final Disposition Report must be completed for submission to the Crime Information Bureau. Final Disposition Reports are only retained in the CIB files when there is a related fingerprint card on file. The portions of the final disposition that must be completed by the contributing/arresting agency are shown following.

The contributing/arresting agency is required to complete the data on the left side of the Final Disposition Report with the exclusion of the charge blocks on the lower left side. These are for the use of the Prosecutor/District Attorney to complete when the charges are being changed to something other than those filled out by the contributing/arresting agency. The Final Disposition Report must be initiated at the time the original fingerprint card is completed and all required data must appear exactly as it appears on the related fingerprint card submitted. If the transaction(s) listed in the "offenses charged at arrest" block are disposed of by the contributing/arresting agency, the final disposition must be completed with the appropriate information and mailed to the Crime Information Bureau for processing. In the event the case goes to the prosecutor the Final Disposition Report must be forwarded to the prosecutor with the appropriate case papers. A separate Final Disposition Report must be completed for each arrest charge listed on the fingerprint

card. However, when an individual is being charged with multiple counts of the same offense (same state statute and subsections) they can be handled as one charge by indicating the number of counts next to the literal offense reported by the arresting agency.

When the prosecutor receives the final disposition form, they will note any changes or additions made to the arrest charges and forward to the clerk of court with the complaint, or indicate no prosecution and submit the CIB.

Prosecutor Completion of Final Disposition

The Final Disposition Reports are initiated by the contributing/arresting agency and forwarded with the appropriate case papers to the prosecutor. The prosecutor will receive a Final Disposition Report completed from the arresting agency. The prosecutor should make no changes to the information already completed on the final disposition by the contributing/arresting agency. If the charge is changed, amended, or revised that fact should be reflected by completing the charge blocks on the lower left side and/or the final disposition block on the right side of the form. If proceedings commence, the Final Disposition Report must be forwarded with the case papers to the Clerk of Court.

An amended charge or reduced to city ordinance is not a final disposition. In these cases the prosecutor should forward the Final Disposition Report with the case files to the appropriate municipal court officer for completion when a final disposition is reached.

Clerk of Court Completion of Final Disposition

The contents of this section give instructions for those courts that are submitting paper dispositions to CIB. For those courts submitting via the Consolidated Court Automation Program (CCAP), see Electronic Submission of Court Disposition.

The Final Disposition Report is filed along with other appropriate case papers with the Clerk of Court when proceedings commence. When the case is adjudicated and a final disposition is reached the Clerk of Court must indicate the final disposition by completing the Final Disposition block. The following are choices for completing this form with the required information.

1. Convicted or Guilty
2. No Prosecution (Complaint Denied)
3. No Prosecution (First Offender Program)
4. No Prosecution (Read In)
5. No Prosecution (Restitution) **Amount not needed**
6. No Prosecution (Restitution & Read In) **Amount not needed**

7. Dismissed
8. Dismissed (First Offender Program)
9. Dismissed (Read In)
10. Dismissed Restitution - **Amount not needed**
11. Dismissed Restitution & Read In - **Amount not needed**
12. Dismissed Consolidated - **List new charges**
13. Acquitted (Found Not Guilty)
14. Deferred Prosecution Submit final case disposition
15. Not Guilty by Reason of Mental Defect
16. Incompetent to Stand Trial
17. If probation state **"probation"** with length and effective date. NOTE: Whenever probation is revoked you should notify the CIB and give the new sentence.
18. If prison sentence state **"prison"** with length, effective date and location if known.
19. If waived to adult court state **"waived to adult court"** and give date of waiver.
20. If charge was amended from the original indicate **"amended charge"** and list new charge.
21. If charge was prosecuted as something other than the original charge indicate **"prosecuted charge"** and list new charge.
22. Fine - Amount not needed
23. Fine & Restitution - **Amount not needed**
24. Jail Sentence - State **"Jail"** and give length of sentence
25. Jail with Huber - State **"Jail with Huber"** and give length of sentence.
26. If original sentence has been **"Stayed" or "Withheld"** you should indicate as such and furnish the new sentence given.
27. Community Service - Do not need to list details.
28. Intensive Sanctions - State **"Intensive Sanctions"** and give length of sentence.
29. Electronic Surveillance - State **"Electronic Surveillance"** and give length of sentence.
30. Conditional Probation 961.47 (1) - State **"Conditional Probation"** and give length of sentence and fine. Notify if revoked.
31. Special Disposition 973.015 - State **"Special Disposition"** and give length of sentence and fine. Notify if revoked.

NOTE: All Final Disposition Reports that are not clearly or completely filled out will be returned to the clerk of court or agency that submitted them for clarification.

Electronic Submission of Court Disposition

Any Circuit Court using the Consolidated Court Automation Program (CCAP) to manage their criminal case files may submit disposition information electronically via CCAP to the Department of Justice. Disposition information is forwarded by CCAP upon the closing of the case.

Certain minimum data must be contained in the CCAP record to allow the disposition to post to the proper arrest event. Without this information the disposition must be submitted on the paper (DJ-LE-249) disposition forms. The minimum data required to allow the disposition to post successfully are either:

- The Arrest Tracking Number (ATN), or
- A matching name, sex, race, date of birth, contributing agency (contributor) ORI and arrest date to those contained in the arrest submission.

Those courts not using CCAP for case management must continue to submit paper disposition forms to the Department of Justice.

Completion of Final Disposition Report Involving Domestic Abuse

Dispositions submitted to CIB that involve domestic abuse need to have that information included with the primary statute. Individuals committing a domestic abuse should have that information included with the original arrest and if that offense is amended or prosecuted to a new final offense, domestic abuse should be included with that charge. You must list the specific offense that was violated, i.e., battery, 940.19 (1), and the literal should include the fact that domestic abuse was involved.

Literal wording that indicates domestic abuse should be included with the offense literal. The following abbreviations can be used to indicate domestic abuse:

DV	(Domestic Violence)
DAC	(Domestic Abuse Contact)
DA	(Domestic Abuse)
DAI	(Domestic Abuse Injunction)
DVIP	(Domestic Violence in Progress)

CIB has created an in-house modifier statute that equals domestic abuse - 968. That statute may also be included with the primary offense statute.

Examples of offenses including domestic abuse:

Battery/DV	DC-DAC	Dom Abuse/DC
940.19(1)/968	947.01/968	968/947.01

CIB Processing of Final Disposition Reports

When the Final Disposition Reports are received at the Crime Information Bureau they must go through a number of steps before they are added to the related criminal history record. First each final disposition is reviewed for complete and correct information. If any required data is missing or the CIB has questions about the information given the document will be returned for review by the submitting agency.

After the dispositions have been reviewed and are found to contain the required information they will processed through the data entry process to locate the related criminal history record. At this point the CIB will verify that we have a fingerprint card on file for the arrest in question. If no fingerprint card is on file CIB will return a copy of the disposition to the arresting/contributing agency with the proper form indicating "No fingerprint card on file for this arrest". The agency indicated as the contributing agency will be requested to submit an arrest fingerprint card when they return the disposition to CIB. Both the arrest and disposition information will then be added to the criminal history database.

When dispositions meeting all the requirements for acceptance, the CIB records will then be updated with this new information and the final disposition filed in the related jacket file.

Most of Wisconsin's circuit courts now contribute final disposition reports electronically through CCAP. This disposition information is then passed to the state courts, and forwarded to CIB via a server interface.

Once CIB receives these electronic dispositions, a number of edit checks are performed to ensure the quality of the data before it's posting to the criminal history database. CIB verifies arrest charges and a set of fingerprints exist for this disposition and proceed to posting the disposition to the arrest event.

If no fingerprint card exists, the disposition report will queue to error and must be manually reconciled through a similar process used for paper dispositions without fingerprint cards.

Conditional Discharge for Possession of Controlled Substance

By statute, Clerks of Court are required to notify the CIB of all probationary conditional discharges for first offenders charged with possession of a controlled substance. It is required that the CIB maintain accurate, up-to-date information for all probation reports under Wisconsin Statute 961.47 (1) and (2).

Subsection (1) of this law provides for the conditions under which the court may grant a probationary period for first offenders.

961.47 (1) Whenever any person who has not previously been convicted of any offense under this chapter, or of any offense under any statute of the United States or of any state or of any county ordinance relating to controlled substances or controlled substance analogs, narcotic drugs, marijuana or stimulant, depressant or hallucinogenic drugs, pleads guilty to or is found guilty of possession or attempted possession of a controlled substance or controlled substance analog under s. 961.41 (3g) (b), the court, without entering a judgment of guilt and with the consent of the accused, may defer further proceedings and place him or her on probation upon terms and conditions. Upon violation of a term or condition, the court may enter an adjudication of guilt and proceed as otherwise provided. Upon fulfillment of the terms and conditions, the court shall discharge the person and dismiss the proceedings against him or her. Discharge and dismissal under this section shall be without adjudication of guilt and is not a conviction for purposes of disqualifications or disabilities imposed by law upon conviction of a crime, including the additional penalties imposed for 2nd or subsequent convictions under s. 961.48. There may be only one discharge and dismissal under this section with respect to any person.

NOTE: Because there may be only one discharge and dismissal under this section with respect to any person, the fingerprint record is not eligible for expunction pursuant to s. 165.84 (1).

Pursuant to s. 961.47 (1), only those individuals convicted under s. 961.41 (3g) (b) are eligible for this disposition. The statutory additions of s. 961.41 (3g) (c), 961.41 (3g) (d), and 961.41 (3g) (e) were made without amending s. 961.47 (1) and are therefore not eligible for this disposition. The Crime Information Bureau will continue to process those dispositions that qualify under s. 961.47 (1). Final dispositions which do not qualify will be returned to the submitting agency for clarification.

Subsection (2) of s. 961.47 requires that all Clerks of Court shall give notification within 20 days after probation has been granted.

(2) Within 20 days after probation is granted under this section, the clerk of court shall notify the Division of Law Enforcement Services (Crime Information Bureau) in

the Department of Justice of the name of the individual granted probation and any other information required by the Division. This report shall be upon forms provided by the Division.

The Final Disposition Report form is utilized to fulfill these requirements and it must be completed when the court provides conditional probation as the disposition of the case.

When the Final Disposition Report is received at the CIB and conditional probation is indicated, the form will be copied on pink colored paper and this copy will be mailed back to the court of record with an instructional letter. This copy must be retained by the court until probation is successfully completed or a change in status occurs, at which time the clerk must complete the pink copy and mail it to the CIB. Notice of successful completion or a change in probation status must be reported on the pink colored report. The CIB cannot locate files if the report is not returned. DO NOT SEND COURT DOCUMENTS UNLESS THE PINK COPY OF THE FINAL DISPOSITION REPORT IS "STAPLED" TO IT.

Conditional discharge final disposition

Special Disposition under s. 973.015

S. 973.015 Misdemeanors, special disposition. (1) When a person is under the age of 21 at the time of the commission of an offense for which the person has been found guilty in a court for violation of a law for which the maximum penalty is imprisonment for one year or less in the county jail, the court may order at the time

of sentencing that the record be expunged upon successful completion of the sentence if the court determines the person will benefit and society will not be harmed by this disposition.

(2) A person has successfully completed the sentence if the person has not been convicted of a subsequent offense and, if on probation, the probation has not been revoked and the probationer has satisfied the conditions of probation. Upon successful completion of the sentence the detaining or probationary authority shall issue a certificate of discharge which shall be forwarded to the court of record and which shall have the effect of expunging the record.

Wisconsin Statute 973.015 and police records.

Wisconsin Statute 973.015 (1) states, "When a person under the age of 21 at the time of the commission of an offense for which the person has been found guilty in a court for violation of a law for which the maximum penalty is imprisonment for one year or less in the county jail, the court may order at the time of sentencing that the record be expunged upon successful completion of the sentence if the court determines the person will benefit and society will not be harmed by this disposition." The Supreme Court Decision, "In the Interest of E.C. 130 Wis. 2nd 376," has determined that s. 973.015 applies only to "court records" and the court states, "In sec. 973.015 (1), the legislature has determined that the only records which may be expunged are court records resulting from a misdemeanor conviction when the person was under the age of 21 at the time of the commission of the offense. In this situation, the court may expunge only the court records, and then, only if the court determines that the person will benefit and society will not be harmed by this disposition."

The case also discusses charges against juveniles and, in so doing, defines "expunction" in relationship to those charges as: "...that information regarding the charges against juveniles would be placed in a sealed envelope which would be kept in a separate, private location and could not be viewed by anyone except on order of the court.... Expunction does not require destruction of the juvenile records." This definition of expunction would logically apply to all records, not only those that are juvenile.

Consistent with this decision, the Crime Information Bureau (CIB) and local law enforcement agencies have no responsibilities with regard to s. 973.015. When the CIB receives notification of an adjudication consistent with s. 973.015, the record will be modified to indicate that the sentence was ordered under that particular statute. If the terms and conditions of s. 973.015 have been met, the record will indicate "successfully completed." If the subject was given probation or any other extended terms and conditions, a follow-up letter will be sent to the court indicating that the CIB is aware of the "special disposition" and requesting that the court notify the CIB of any status change. When the CIB receives follow-up information from the court, the record will be modified to indicate "successfully completed" or "special disposition revoked" as directed by the court. If the special disposition is revoked, the associated sentence will be appended to the record. State statutes do not allow CIB to remove arrests involving special dispositions under s. 973.015 from a person's criminal record.

The computer currently flags any record that has a "special disposition" and when the date of any special terms is reached, that "flag" is removed prior to the release of the record. If an agency inquires on a record that has an adjudication under s. 973.015 and the term has been reached, the computer will route the inquiry to a clearinghouse terminal. If the date of the terms has been reached without any subsequent notification from the court, CIB will assume that the terms have been met

and annotate the record with a "successfully completed" for release. If CIB receives notification after the fact that the terms were not "successfully completed", the Bureau will change the "successful completion" to "special disposition revoked" and append the associated sentence.

All Clerks of Court should be aware of the definition of "expunction" as clarified in this case. Records should be "sealed" and not destroyed to be in conformance with s. 973.015.

CIB Return of Final Dispositions to Submitting Agency

Upon receipt of a Final Disposition Report from either a Clerk of Court or a Prosecutor, the Crime Information Bureau will add the final disposition information to the relating fingerprint card in the Criminal History database. The disposition will be returned to the submitting agency if information is inaccurate or incomplete.

Other Disposition Reporting

Juvenile Adjudication

Wisconsin statutes require courts to report certain juvenile adjudication information to the Wisconsin Department of Justice. Courts must report for the following reasons:

Prohibited Firearms Possession

When a juvenile is adjudicated delinquent of an offense that would be a felony is committed by an adult, such adjudication prohibits the person from possession of a firearm. Section 938.396(8) of the Wisconsin Statutes requires the court report such adjudication to the Department of Justice. This information may be used by the Department only in determining whether or not a subject may legally possess a firearm. This adjudication should be reported using form DJ-LE-FH9, available from the Crime Information Bureau.

If the court later determines the person adjudicated is not likely to act in a manner dangerous to public safety and wishes to remove the adjudication from the file, that restoration of rights may also be reported to the Department of Justice using the same form.

Day Care Employment/Licensure Prohibition

When a juvenile is adjudicated delinquent of a serious crime as described by section 48.685(1)(c) of the Wisconsin Statutes, the juvenile if barred from licensure as a day care worker or provider.

> s.48.685(1) (c) "Serious crime" means a violation of s. 940.19 (3), 1999 stats., a violation of s. 940.01, 940.02, 940.03, 940.05, 940.12, 940.19 (2), (4), (5) or (6), 940.22 (2) or (3), 940.225 (1), (2) or (3), 940.285 (2), 940.29, 940.295, 948.02 (1) or (2), 948.025, 948.03 (2), 948.05, 948.055, 948.06, 948.07, 948.08, 948.11 (2) (a) or (am), 948.12, 948.13, 948.21 (1) or 948.30 or a violation of the law of any other state or United States jurisdiction that would be a violation of s. 940.19 (3), 1999 stats., or a violation of s. 940.01, 940.02, 940.03, 940.05, 940.12, 940.19 (2), (4), (5) or (6), 940.22 (2) or (3), 940.225 (1), (2) or (3), 940.285 (2), 940.29, 940.295, 948.02 (1) or (2), 948.025, 948.03 (2), 948.05, 948.055, 948.06, 948.07, 948.08, 948.11 (2) (a) or (am), 948.12, 948.13, 948.21 (1) or 948.30 if committed in this state.

Section 938.396(9) of the Wisconsin Statutes requires the court report such adjudication to the Department of Justice. This information may only be used by the Department in determining eligibility for licensure as a day care worker or provider. Such adjudication should be reported using form DJ-LE-FH9.

Involuntary Commitment

Wisconsin statute 51.20 (13) (cv) 1 states: "If the court makes the disposition under par. (a) 3., 4., 4m., or 5. http://folio.legis.state.wi.us/cgi-bin/om_isapi.dll?clientID=316542&infobase=stats.nfo&jump=51.20%2813%29%28a%293.&softpage=Document - JUMPDEST_51.20(13)(a)3.http://folio.legis.state.wi.us/cgi-bin/om_isapi.dll?clientID=316542&infobase=stats.nfo&jump=51.20%2813%29%28a%294.&softpage=Document - JUMPDEST_51.20(13)(a)4.http://folio.legis.state.wi.us/cgi-bin/om_isapi.dll?clientID=316542&infobase=stats.nfo&jump=51.20%2813%29%28a%294m.&softpage=Document - JUMPDEST_51.20(13)(a)4m.http://folio.legis.state.wi.us/cgi-bin/om_isapi.dll?clientID=316542&infobase=stats.nfo&jump=51.20%2813%29%28a%295.&softpage=Document - JUMPDEST_51.20(13)(a)5.and the court determines, based on evidence presented on the issue of the subject individual's dangerousness, that there is a substantial probability that the individual may use a firearm to cause physical harm to himself or herself or endanger public safety, the court shall prohibit the individual from possessing a firearm, order the seizure of any firearm owned by the individual and inform the individual of the requirements and penalties under s. 941.29http://folio.legis.state.wi.us/cgi-bin/om_isapi.dll?clientID=316542&infobase=stats.nfo&jump=941.29&softpage=Document - JUMPDEST_941.29."

S. 51.20 (13) (cv) 4 requires a court to report to the Department of Justice when such a determination is made. The Department may only use this information in determining whether or not the subject may legally possess a firearm. The court order should be reported to the Department of Justice using form DJ-LE-FH9.

If the court cancels the order pursuant to section 51.20 (13) (cv) 2, the cancellation of the order should be reported to the Department of Justice by using form DJ-LE-FH9.

Special Forms

Identification Return Form

A quality control check of administrative data and inked fingerprint impressions is a part of the processing procedure at the Crime Information Bureau (CIB). A similar check by each contributing agency before submission would eliminate many returns. If a return becomes necessary, the CIB utilizes form DJ-LE-251, stapling it to the fingerprint card which is being sent back to the submitting agency.

The upper portion of the form lists the administrative reason(s) for the return of the material. All of the information requested on fingerprint cards is essential to provide criminal justice agencies with accurate and complete identification information.

The lower portion of the form is used for the return of fingerprint cards which cannot be accurately classified and filed. The reason(s) for return is indicated on the returned fingerprint card. The larger a collection of fingerprints becomes, the more necessary ten legible fingerprint impressions are for a detailed analysis of all fingerprint characteristic details. There is little value in placing a fingerprint card in the CIB files with only an approximate, or an inaccurate classification. In order to properly file the fingerprint cards a complete and accurate classification formula must be obtained for each set of prints and this is dependant on clear and distinct impressions of each finger to determine the type of pattern, the ridge tracing or ridge count.

Administrative Returns

Omissions, or erroneous information will cause the material to be returned to the contributor with reason(s) for return indicated by check marks in the appropriate block(s) of the upper portion of the form.

Listed below are some of the more frequent reasons for administrative return of fingerprint cards:

- The literal charge, statute (including subsections)/ordinance number, NCIC code are not entered or the statute/NCIC does not agree with the literal charge.
- Severity of offense (felony, misdemeanor or non-criminal) doesn't agree with literal charge.
- POB/citizenship omitted.

- Illegible data.

The indicated corrections should be made immediately and the material returned to the CIB for processing.

Technical Returns

Inked and/or scanned fingerprint impressions may be technically unacceptable for search and retention in the state's AFIS.

Individual finger blocks which have been circled on the fingerprint card(s) correspond to the checked reasons on the Fingerprint Card Return Form DJ-LE-251, because of one or more of the various reasons that are discussed in the following.

Ink was unevenly distributed

Cause:	Dirty plate, improperly inked plate, unclean fingers, perspiring fingers
Solutions:	The plate should be cleaned to prevent a build-up of the ink, and particles of lint and dust.
	A thin, even coating of ink on the plate is necessary to obtain clear, distinct finger impressions.
	The fingers of the person fingerprinted should be clean before fingerprinting.
	Excessive perspiration will result in the failure of ink to adhere properly to the tips of the fingers. Wiping each finger with alcohol or other drying agent before inking and printing will reduce the amount of perspiration.

Fingers not fully rolled

Causes:	Failure to roll the finger from one side to the other (nail to nail) and the bulb of the finger from tip to joint on the inking plate.
	Failure to completely roll the inked finger on the fingerprint card
Solution:	Ink entire finger from side to side by rolling it from one side of the fingernail to the other; print in the same manner--nail to nail.

Too much ink

Cause:	Over inking of the plate, or excessive pressure in the printing process
Solutions:	Only a small amount of ink with adequate rolling will produce a thin even film on the plate.
	Pressing the fingers too hard on the inking plate, or when imprinting on the card will obliterate or obscure the ridges.

Insufficient ink

Causes:	Not re-rolling inked plate, or inking a finger in the identical spot on the plate where a previous inking just took place
Solution:	Re-roll or redistribute ink into a thin, even film on the inking plate after it has been used -- never ink a finger by rolling it over an area which was used to ink another finger.

Some impressions smudged, ridge characteristics not distinct

Cause:	Finger allowed to slip or twist during printing, or excessive perspiration on finger, or excessively dry fingers or worn ridge structure from work (e.g., masonry, carpentry, etc.) or physiological conditions (e.g., low level of perspiration).
Solutions:	To prevent slipping or twisting, always maintain control of the finger and hand of the individual being fingerprinted. Individual should try to relax and not attempt to help in the inking and rolling process.
	Remove excess perspiration from each finger immediately prior to inking; dry, ink and print one finger at a time.
	Consider using a drying agent (e.g., alcohol) to temporarily slow the rate of perspiration.
	For excessively dry fingers consider using a softening or moisturizing agent such as hand lotion or oil.

Hands have been reversed

Cause:	Inattention to printing.
Solutions:	Ink and print one finger at a time; do not ink several fingers and then print them. Develop and follow a set printing routine of inking and rolling digits in ascending order: digit #1 first, followed by 2, 3, 4, 5, 6, 7, 8, 9 and 10. Do not allow yourself to get distracted.
	An easy way to spot prints that are out of sequence is to compare the sequence or order of the rolled prints with the order of the plain impressions at the bottom of the card. Live scan devices have quality assurance settings that validate finger sequencing against the plain impressions. This function also ensures that the fingers are in the proper positions and should never be disabled.

One or more fingers printed twice

Cause:	Inattention to printing.
Solutions:	Ink and print one finger at a time; do not ink several fingers and then print them. Develop and follow a set printing routine of inking and rolling digits in ascending order: digit #1 first, followed by 2, 3, 4, 5, 6, 7, 8, 9 and 10. Do not allow yourself to get distracted.
	An easy way to spot prints that are out of sequence is to compare the sequence or order of the rolled prints with the order of the plain impressions at the bottom of the card. Live scan devices have quality assurance settings that validate finger sequencing against the plain impressions. This function also ensures that the fingers are in the proper positions and should never be disabled.

Plain impression inadequate, complete roll necessary

Cause:	Failure to take rolled impressions of all ten fingers.
Solution:	Complete entire fingerprint card to ensure timely, accurate and proper handling at both the State and Federal levels. Complete rolled fingerprints are needed to ensure a quality data base within the States AFIS and to allow for proper search

	of both tenprints and latents.

Missing or partially missing impressions, complete roll necessary

Cause:	No or missing notation of amputations, partial amputations, crippled or deformed fingers, bandaged fingers, fingers missing at birth, or failure to print finger.
Solutions:	In order to obtain an accurate search of the AFIS data base, it is necessary that missing fingers be clearly explained on the fingerprint card. Amputations should be notated in the proper finger block. If a portion of the first joint of a finger is amputated, the remaining portion of the first joint should be inked and printed and, in addition, a notation such as "TIP AMP" should be placed in the appropriate finger block.
	Crippled or bent fingers may be printed individually using a spoon or similar device onto Retabs (FBI approved) which are placed on the fingerprint card in their proper sequence. Only in those cases where the fingers are so badly bent or crippled that they are touching the palms and cannot be moved is the notation "Too crippled to print" appropriate. Cards which do not have all of the fingers printed because of fresh cuts or bandages will not be searched or retained in the AFIS data base unless identified with a card on file.
	Some individuals are born without certain fingers and, in those instances, the notation "Missing at birth" should be used rather than just using the word "Missing".

One or more plain impressions omitted

Cause:	Inattention to printing.
Solutions:	Ink all four fingers at the same time; print all four fingers at the same time. Do not print each finger individually. It is extremely important to print all four fingers simultaneously since this guarantees they are in the proper sequence. Plain impressions are used to double check the rolled impressions for proper sequence.
	Ink and print both thumbs at the same time. This will ensure that they are placed in the proper spaces provided.

Fingerprints not in sequence in spaces indicated

Cause*:*	Inattention to printing
Solutions:	Ink and print one finger at a time; do not ink several fingers and then print them. Develop and follow a set printing routine of inking and rolling digits in ascending order: digit #1 first, followed by 2, 3, 4, 5, 6, 7, 8, 9 and 10. Do not allow yourself to get distracted.
	An easy way to spot prints that are out of sequence is to compare the sequence or order of the rolled prints with the order of the plain impressions at the bottom of the card. Live scan devices have quality assurance settings that validate finger sequencing against the plain impressions. This function also ensures that the fingers are in the proper positions and should never be disabled.

Fingerprints on CIB & FBI cards do not match

Cause:	Inattention to printing.
Solution:	When fingerprinting, always ensure that you are printing the right individual on the right fingerprint card. Complete printing of all fingerprint cards needed for one individual before printing someone new.

No record by name, fingerprints unacceptable for search and retention

Cause:	Fingerprints submitted are of poor quality and may relate to one or more of the reasons listed above.
Solution:	The CIB always conducts a file search by name in order to determine if the person has been previously fingerprinted and assigned a State Identification Number (SID). If a "name hit" occurs, comparison of impressions and positive identification can usually be established. Therefore, most technical returns are made when the person does not have a SID and a complete and accurate coding of the fingerprints must be determined for file in the AFIS data base.

Disposition/Photo Return Form

A quality control check of disposition data is required at CIB prior to the record being updated. If a return becomes necessary, CIB utilizes form DJ-LE-256, and returns the disposition to the submitting agency.

Common types of returns are:

- Charge/date of arrest/contributing agency omitted.
- Disposition omitted/not a final disposition/or illegible.
- Unable to locate person. Card not received or has been returned. Please submit..

Special Disposition/Conditional Probation

Wisconsin Statute 973.015 (1) states, "When a person under the age of 21 at the time of the commission of an offense for which the person has been found guilty in a court for violation of a law for which the maximum penalty is imprisonment for one year or less in the county jail, the court may order at the time of sentencing that the record be expunged upon successful completion of the sentence if the court determines the person will benefit and society will not be harmed by this disposition." The Supreme Court Decision, "In the Interest of E.C. 130 Wis. 2nd 376," has determined that s. 973.015 applies only to "court records" and the court states, "In sec. 973.015 (1), the legislature has determined that the only records which may be expunged are court records resulting from a misdemeanor conviction when the person was under the age of 21 at the time of the commission of the offense. In this situation, the court may expunge only the court records and then, only if the court determines that the person will benefit and society will not be harmed by this disposition."

The case also discusses charges against juveniles and, in so doing, defines "expunction" in relationship to those charges as: "...that information regarding the charges against juveniles would be placed in a sealed envelope which would be kept

in a separate, private location and could not be viewed by anyone except on order of the court.... Expunction does not require destruction of the juvenile records." This definition of expunction would logically apply to all records, not only those that are juvenile.

Consistent with this decision, the CIB and local law enforcement agencies have no responsibilities with regard to s. 973.015. When the CIB receives notification of an adjudication consistent with s. 973.015, the record will be modified to indicate that the sentence was ordered under that particular statute. If the terms and conditions of s. 973.015 have been met, the record will indicate "successfully completed." If the subject was given probation or any other extended terms and conditions, a follow-up letter will be sent to the court indicating that the CIB is aware of the "special disposition" and requesting that the court notify the CIB of any status change. When the CIB receives follow-up information from the court, the record will be modified to indicate "successfully completed" or "special disposition revoked" as directed by the court. If the special disposition is revoked, the associated sentence will be appended to the record.

The computer currently flags any record that has a "special disposition" and when the date of any special terms is reached, that "flag" is removed prior to the release of the record. If an agency inquires on a record that has an adjudication under s. 973.015 and the term has been reached, the computer will route the inquiry to a clearinghouse terminal. If the date of the terms has been reached without any subsequent notification from the court, CIB will assume that the terms have been met and annotate the record with a "successfully completed" for release. If CIB receives notification after the fact that the terms were not "successfully completed," the Bureau will change the "successful completion" to "special disposition revoked" and append the associated sentence.

All Clerks of Court should be aware of the definition of "expunction" as clarified in this case. Records should be "sealed" and not destroyed to be in conformance with s. 973.015.

Juvenile Waiver Return Form

This form will be used to return dispositions relating to 973.015/961.47 (1) and juvenile waivers if they do not pass the quality control check process at CIB.

Death Notice

This form is used by law enforcement agencies to notify the CIB that an individual whose fingerprints are on file, is deceased. Upon receipt of this notice the CIB properly annotates the criminal history database to reflect this information.

Agencies who become aware of the death of any person having a State Identification Number (SID) must complete the form and send it to the CIB. Accuracy is essential and the SID must be included. If possible, an inked rolled fingerprint impression from the deceased can be placed on the form to provide positive identification.

Agencies investigating a death should obtain all ten inked impressions on a regular fingerprint card and the death notification should be forwarded to the CIB.

In cases where an unidentified corpse is found, all ten inked impressions must be obtained on a fingerprint card and submitted to the CIB, where a technical search will be made in an effort to determine an identification.

Expungement of Records

Wisconsin Statute 165.84 (1) states in part *"any person arrested or taken into custody and subsequently released without charge, or cleared of the offense through court proceedings, shall have any fingerprint record taken in connection therewith returned upon request."* An individual must be cleared of ALL offenses on a given arrest event in order to qualify for an expungement. The Crime Information Bureau (CIB) will remove the arrest from the criminal history database and return/destroy the fingerprints and photograph upon request, if the individual was *"released without charge, or cleared of the offense through court proceedings."* Under these circumstances, records will be expunged by, (1) Order of the Court, (2) Request from the contributing agency, or (3) Request from the individual whose name appears on the transcript. If an individual wishes to request to apply for an expungement, they must complete a "Fingerprint Record Return Request" form DJ-LE-250B. A legible inked fingerprint impression is mandatory to positively identify the record requested to be expunge.

In order to qualify, all offenses reported on the arrest fingerprint card must have resulted in the requestor being released without charge (or not prosecuted) or being cleared of the offenses through court proceedings. This would include dismissal of the case by the prosecutor or judge, or acquittal by a judge or jury. Dismissal of only some of the offenses but convictions on others precludes the removal of the record. Convictions on lessor offenses also precludes removal of the record. Completion of a first offender program which results in no prosecution or dismissal qualifies for removal, providing documentation is provided showing successful completion along with proof of dismissal or no prosecution.

A court ordered expungement does not qualify if the case resulted in any type of conviction. Court ordered expungement or sentencing under a youthful offender provision still results in a conviction. Any conviction precludes the removal of the record from the criminal history files. Court ordered expungement seals only the court files and has no effect on files maintained by the Wisconsin Department of Justice. Removal of arrest information from the Department of Justice files has no effect on the availability of the same information from court files or police records. If the arrest information being removed from the Department of Justice files was reported to the Federal Bureau of Investigation, the Department of Justice will notify the Federal Bureau of Investigation to remove that information from the FBI's file.

Not all offenses are reported to the Department of Justice. If a subject requests removal of a record that the Department of Justice does not have, it was not submitted by the arresting agency. All criminal history files maintained by the Department of Justice require submission of an arrest fingerprint card by the arresting agency. If a subject was not fingerprinted for the requested offense, the Department of Justice will not have a record of that offense and it does not appear on their criminal history.

Time to process a request varies. If a request qualifies and the disposition has been reported to the Department of Justice the request will be processed promptly. If the disposition has not been submitted by the court, prosecutor or arresting agency, staff will need to obtain the disposition, make sure the disposition qualifies the removal of the record, update the criminal history and then process the request. If the requestor has documentation regarding the dismissal of the offense(s) involved in the request, copies should included with the request to speed processing.

When an identification record or transcript entry is expunged all data pertaining to that particular transaction is destroyed and the contributing/arresting agency is notified of the expungement. If the FBI holds the same arrest, notification will be forwarded to them for removal of their record.

"Expungement Request Return" form DJ-LE-261C is used to return expungement request forms when they do not qualify for an expungement to be accomplished.

Record Check Requests

Wisconsin adult criminal history information is considered public record and is available pursuant to s. 165.82 Wis. Stats. Information is available by mail or online at http://wi-recordcheck.org.

Juvenile criminal history information is considered confidential and is not available unless specifically authorized by statute.

Criminal History Search Fee

165.82 Criminal history search fee. (1) Notwithstanding s. 19.35 (3), the department of justice shall impose the following fees, plus any surcharge required under sub. (1m), for criminal history searches for purposes unrelated to criminal justice or, before July 1, 1993, to s. 165.825:

(a) For each record check requested by a nonprofit organization, $2.

(ag) For each record check by a governmental agency, $5.

(ar) For each fingerprint card record check request requested by a governmental agency or nonprofit organization, $15.

(b) For each record check by any other requestor, $13.

(1m) The department of justice shall impose a $5 surcharge if a person requests a paper copy of the results of a criminal history search requested under sub. (1).

(2) Except as provided in s. 175.34, the department of justice shall not impose fees for criminal history searches for purposes related to criminal justice.

History: 1987 a. 27; 1989 a. 122.

Record Check Requests may be returned for incomplete information.

Identification Supplies Order Form

The Crime Information Bureau furnishes contributors with fingerprint cards, death notice forms, final disposition report forms, and postage paid addressed envelopes upon request.

The CIB preprints the fingerprint cards with the TIME jurisdiction number, name and address of the contributing agency. Fingerprint cards should be ordered before the contributor's supply is depleted to allow time for the printing. A minimum of three months' requirement should be ordered.

Each shipment of supplies will contain a "Supply Request/Order Form" DJ-LE-235 for future orders. This form may also be found at http://www.doj.state.wi.us/dles/cib/forms.

Obtaining Fingerprint Impressions

Impression Quality

Fingerprint impressions must be taken carefully to insure that an accurate fingerprint classification can be obtained by examination of the various patterns. It is necessary that each focal point (cores, ridge detail and all deltas) be clearly printed in order that an accurate search of the Automated Fingerprint Identification System can be performed. This also will provide the best fingerprint image for storage in the permanent data base of the AFIS. A high quality AFIS data base will increase the odds for a positive identification for both tenprints on an arrest card and latent prints lifted from a crime scene. IT IS NECESSARY TO HAVE FINGERPRINT IMPRESSIONS OF ALL TEN DIGITS AND THESE IMPRESSIONS MUST BE CLEAR AND DISTINCT. Should one or more of the fingerprints on a card be found not legible, the contributor will be notified as to the reason why the fingerprint image(s) were not searched or stored in the AFIS data base. (See Section regarding technical returns.)

The Right to Fingerprint

Wisconsin Statute 165.84 (1) states in part, "all persons in charge of law enforcement agencies shall obtain, or cause to be obtained, the fingerprints . . . of each person arrested or taken into custody for an offense of a type designated in s. 165.83 (2) (a), of all persons arrested or taken into custody as fugitives from justice, and fingerprints . . . of all unidentified human corpses in their jurisdictions . . . Fingerprints and other identifying data of persons arrested or taken into custody for offenses other than those designated in s. 165.83 (2) (a) may be taken at the discretion of the law enforcement agency concerned." (The entire Statute is reprinted in Section 1.)

There is no dispute over the authority of law enforcement to require positive identification from an offender in its lawful custody. United States v. Smith, 393 F. 2d 687 (6th Cir.), cert. denied, 393 U.S. 885 (1968); Pearson v. United States, 389 F. 2d 684 (5th Cir. 1968); United States v. Kelly, 55 F. 2d 67 (2d Cir. 1932). His entry into the criminal justice system, as the U.S. Supreme Court has observed, carries with it an obligation by the arresting law enforcement agency to know exactly who it is it holds and must produce at subsequent proceedings. United States v. Krapf, 285

F. 2d 647 (2d Cir. 1961); United States v. Kelly, 55 F. 2d 67 (2d Cir. 1932); United States v. Laub Baking Co., 283 F. Supp. 217 (D. Ohio 1968). Submission to fingerprinting in such circumstances may be compelled of the offender should he refuse or resist compliance. The Supreme Court has noted in such a case the accuracy of fingerprinting as a positive means of identification is not impaired by an offender's unwillingness to cooperate. Schmerber v. California, 384 U.S. 757, 764 (1966).[1]

The Fourth Amendment protects against what the courts refer to as wholesale intrusions upon the personal security of citizens. The Forth Amendment is not violated, however, by a law enforcement officer taking fingerprints from one who is under arrest and in custody. United States v. Iacullo (1955 CA 7 I11.), 226 F. 2d 788, cert den 350 U.S. 966, 100 L. Ed 2d 839, 76 S. Ct. 435; Kennedy v. United States (1965 USCA DC), 122 App. D.C. 291, 353 F. 2d 462. The United States Supreme Court has held that fingerprinting and other identification procedures do not violate the Fourth Amendment as long as the subject is validly arrested or properly charged with crime. United States v. Wade (1967) 388 U.S. 218, 18 L. Ed. 2d 1149, 87 S. Ct. 1926.

Wisconsin Statute **165.84, "Cooperation in criminal identification records and statistics"** is covered in the Introduction of this Manual.

Wisconsin Statute **970.02, "Duty of a Judge at the Initial Appearance"** states:

(7) If the offense charged is one specified under s. 165.83 (2) (a), the judge shall determine if the defendant's fingerprints, photographs and other identifying data have been taken and, if not, the judge shall direct that this information be obtained.

Obtaining Inked Impressions

Equipment for Inked Impressions

The FBI Identification Division has historically adhered to a policy of processing any legible set of fingerprints through its fingerprints files, however, only fingerprints taken with black printer's ink would be retained in the Identification Division files. The FBI has for many years recommended all fingerprint impressions be taken with black printer's ink to insure the fingerprints are clear, legible, and of a permanent nature. The FBI continues to recommend the use of black printer's ink, however, inkless chemical and electronic scanning processes for obtaining fingerprints have recently been developed which produce legible black fingerprint impressions on standard white fingerprint cardstock. The FBI Identification Division will now process and retain, in addition to fingerprints taken with black printer's ink, fingerprint impressions taken by inkless chemical and electronic scanning processes provided: 1) the fingerprints are recorded with a medium which provides uniform black impressions, clear in contrast, on standard white fingerprint cardstock (If other than black printer's ink is used, the endurance of the medium must be attested to as being permanent; this certification should come from the supplier of the process); 2) the fingerprint submission emanates from an authorized fingerprint contributor and the fingerprint card reflects all necessary data.

For those agencies and departments which continue to use the tried and proven process of recording fingerprint impressions with black printer's ink, the following is

[1] John Edgar Hoover, "The Role of Identification in Law Enforcement", FBI Law Enforcement Bulletin, April, 1973, pp. 24-25.

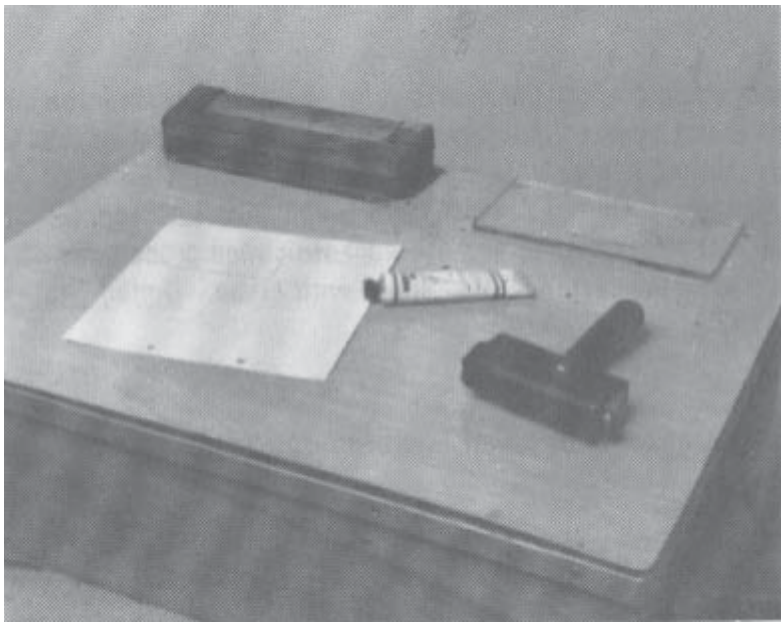
offered for your assistance, however, much of the material offered is applicable to any method of recording fingerprint impressions. The Crime Information Bureau (CIB) adheres to all guidelines that are required by the FBI.

The equipment required to take inked impressions is relatively inexpensive and long lasting. The material needed may be obtained locally, or from a commercial fingerprint supply company and consists of the following:

- *Inking plate* - scratch resistant metal plate or piece of 1/4" glass, 6" wide by 14" long
- *roller* - 6" wide and 2" in diameter, type used by printers
- *ink* - black printer's ink or commercial fingerprint ink
- *card holder* - for holding fingerprint cards
- *stand* - to mount inking plate and card holder, approximately 40" high
- *curved holder* - for printing crippled or bent fingers
- *spatula* - for inking crippled or bent fingers
- *cleaning solvent* - for cleaning slab and roller

All fingerprint cards and envelopes are furnished by the CIB upon request by bona fide agencies.

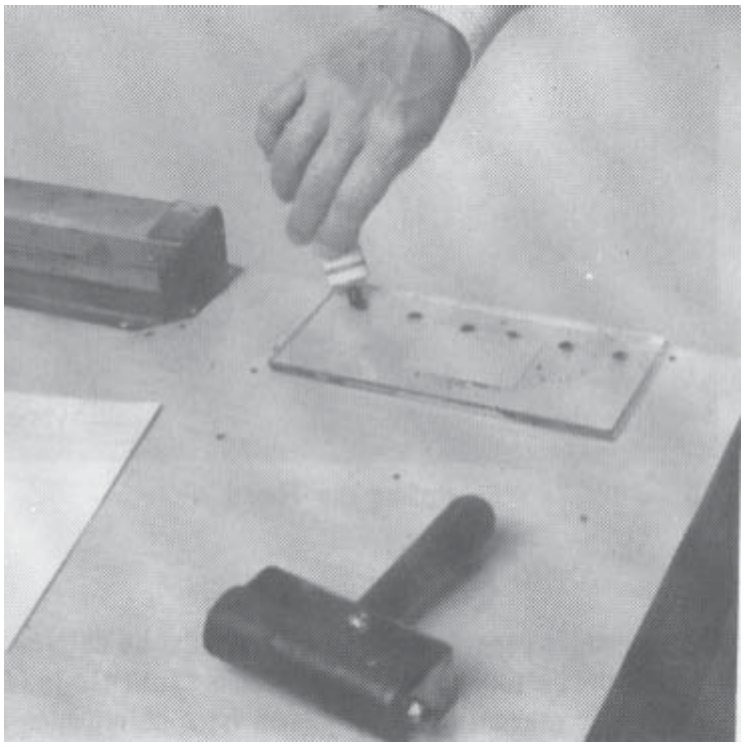
IMPORTANT: The inking slab and roller must be kept clean of a buildup of ink, lint, and dust, which will affect the quality of the inked impressions.



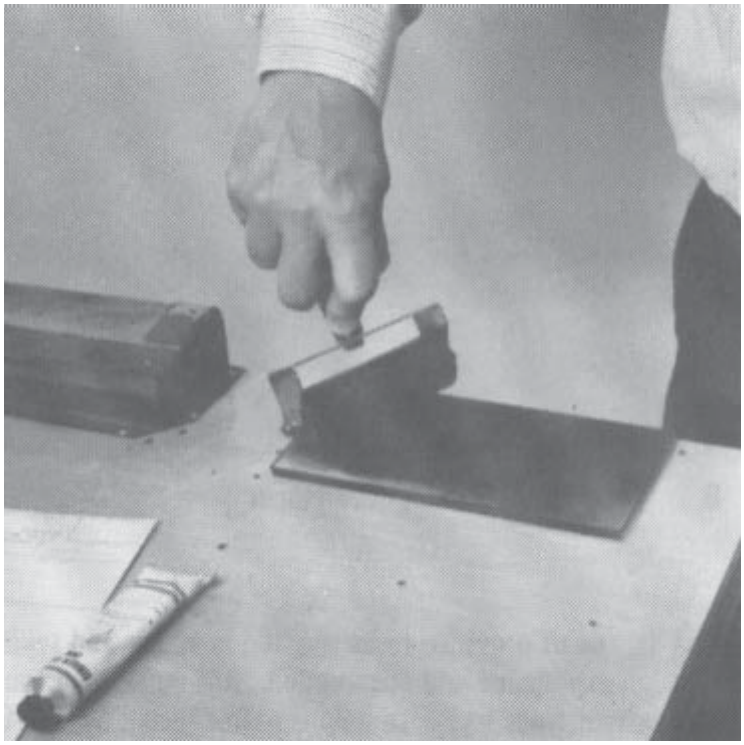
Fingerprint Stand

Fingerprinting Procedure

A small daub of ink should be placed on the inking plate and thoroughly rolled until a very thin, even film covers the surface.



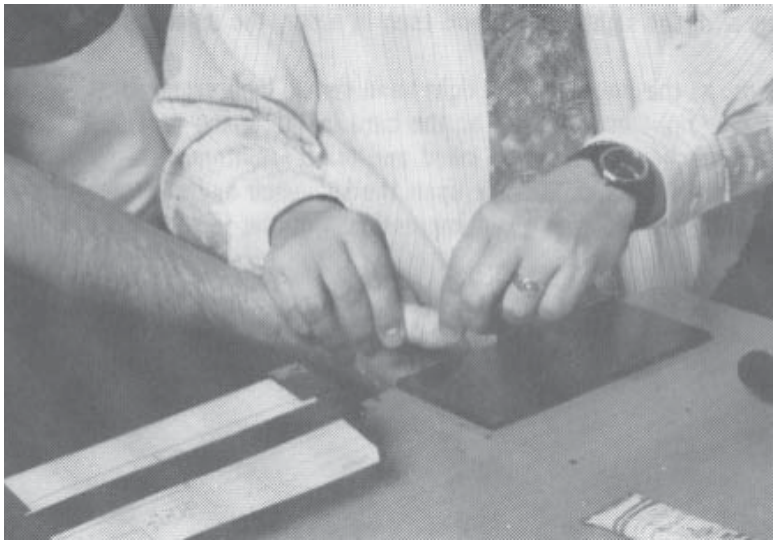
Inking the Plate



Distributing the Ink

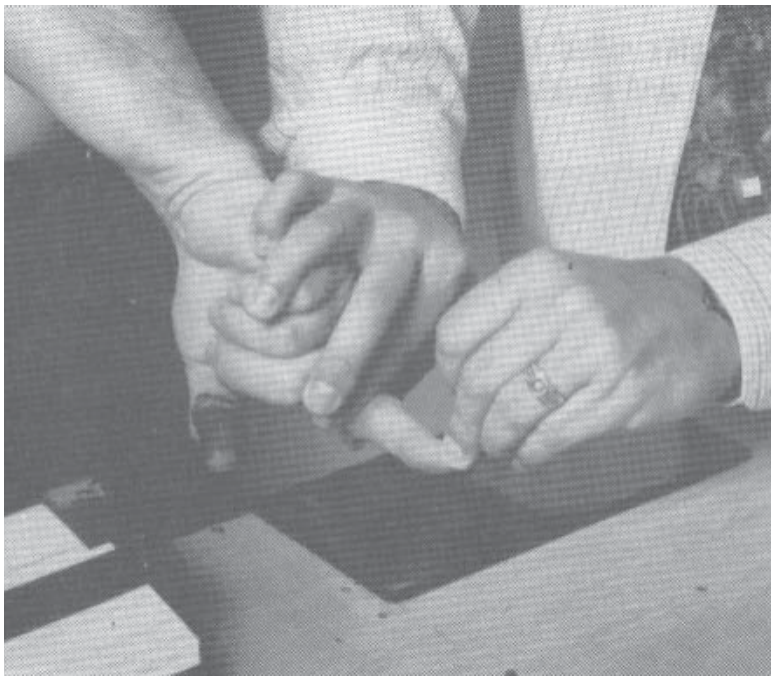
The person to be printed should stand in front of and at forearms length from the inking plate. The positions of both the person and the technician should be natural and relaxed (See Figure *Position for Printing*) if the best fingerprints are to be

obtained. In order to take advantage of the natural movement in making finger impressions, the hand should be rotated from the awkward to the easy position. This requires that the thumbs be rolled toward and the fingers away from the center of the person's body. This process relieves strain and leaves the fingers relaxed upon the completion of the rolling so they may be lifted easily from the card without danger of slipping, which smudges and blurs the prints. Figures *Inking the Finger* and *Rolling the Thumb* show the proper method of rolling impressions of the finger and thumb.



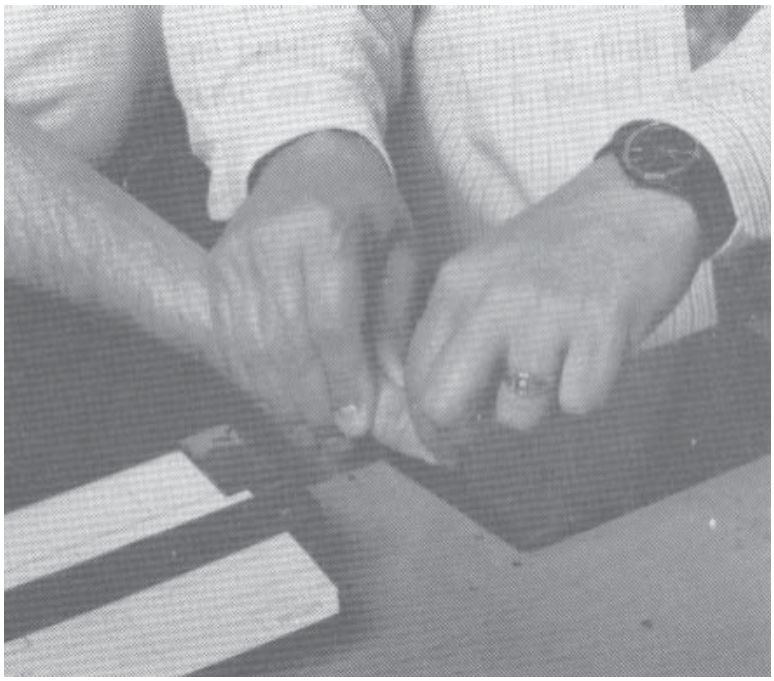
Position for Printing

The degree of pressure to be exerted in inking and taking rolled impressions is important, and this may best be determined through experience and observation. It is quite important, however, that the person being fingerprinted is cautioned to relax and refrain from trying to help the technician by exerting pressure as this prevents the technician from determining the proper amount needed. A method which is helpful in effecting the relaxation of a person's hand is by instructing him/her to look at some distant object and not to look at his/her hands.



Inking the Finger

Excessive perspiration will result in the failure of ink to adhere properly to the tips of the fingers. When this situation is encountered, the person's fingers should be individually wiped clean and immediately inked and printed. This process should be followed with each finger. It is also possible to wipe the fingers with alcohol or some other drying agent which will temporarily reduce the amount of perspiration and thus permit the technician to obtain clear, legible fingerprint impressions.

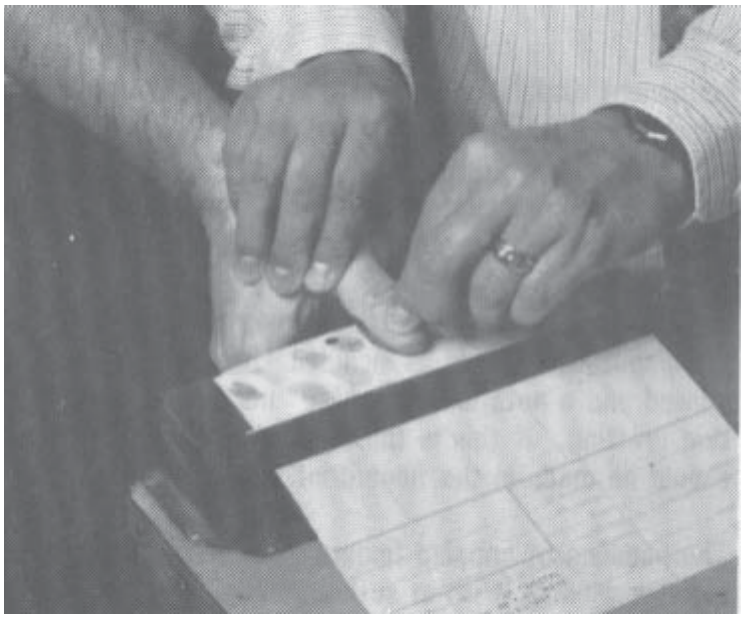


Inking the Thumb

In taking the rolled impressions, the side of the bulb of the finger (tip of finger to below first joint) is placed upon the inking plate and the finger is rolled to the other side (fingernail to fingernail) until it faces the opposite direction. Care should be exercised so each finger is inked evenly from the tip to below the first joint. It is better to ink and print each finger separately beginning with the right thumb, and then in order, the index finger, middle, ring and little finger.

To obtain "plain" impressions, all the fingers of the right hand should be pressed lightly upon the inking plate, then pressed simultaneously upon the lower right hand corner of the card in the space provided. The left hand should be similarly printed, and the thumbs of both hands should be inked and printed, without rolling, in the space provided. The "plain" or "simultaneous" impressions are used as a check upon the sequence and accuracy of the rolled impressions. Figures *Plain Impressions of the Fingers* and *Plain Impression of the Thumb* show the proper method of obtaining "plain impressions" of the fingers and the thumb.

Plain Impression of the Fingers



Plain Impression of the Thumb

Obtaining Electronic Impressions

The procedure for obtaining electronic fingerprint images is similar to those for obtaining inked impressions. The ink, inking plate and fingerprint card are replaced by the glass platen on the live scan fingerprint device.

The person to be printed should stand in front of and at forearms length from the glass platen. The positions of both the person and the technician should be natural and relaxed if the best fingerprints are to be obtained. In order to take advantage of the natural movement in making finger impressions, the hand should be rotated from the awkward to the easy position. This requires that the thumbs be rolled toward and the fingers away from the center of the person's body. This process relieves strain and leaves the fingers relaxed upon the completion of the rolling so they may be lifted easily from the platen without danger of slipping, which smudges and blurs the prints.

Just as with inked impressions, excessive perspiration will result in the fingerprint images not being clear. When this situation is encountered, the person's fingers should be individually wiped clean and immediately printed. This process should be followed with each finger. It is also possible to wipe the fingers with alcohol or some other drying agent which will temporarily reduce the amount of perspiration and thus permit the technician to obtain clear, legible fingerprint impressions.

With live scan fingerprint devices, the glass platens must also be kept clean and free of scratches.

In taking the rolled impressions, the side of the bulb of the finger (tip of finger to below first joint) is placed upon the glass platen and the finger is rolled to the other side (fingernail to fingernail) until it faces the opposite direction.

Rolling a finger on a glass platen

To obtain "plain" impressions, all the fingers of the right hand should be pressed simultaneously upon the platen. The left hand should be similarly printed, and the thumbs of both hands should be pressed on the platen without rolling. The "plain" or "simultaneous" impressions are used as a check upon the sequence and accuracy of the rolled impressions.

Plain impression on a glass platen

Procedures for Unusual Circumstances

Temporary Disabilities to Fingerprinting (Cut/Bandaged Fingers)

There are temporary disabilities affecting an individual's hand which are sometimes beyond the control of the identification officer. These can be fresh cuts, wounds, bandaged fingers, or blisters. An indication on the fingerprint card to the effect "fresh cut or bandaged" is not sufficient to retain in the AFIS data base. The same situation would occur if there were a blister on an individual's finger. The blister temporarily disfigures the ridge detail. When an injury is temporary, the prints, if at all possible, should be obtained after the injury has healed.

When a finger cannot be printed, a corresponding code should be entered in the fingerprint block of the missing finger. These codes are:

Reason	Code
Amputation	XX
Unable to print (bandaged, etc.)	UP

A partially scarred finger should be printed. If the forwarding agency is not sure of the reason a finger's image is missing, the UP code should be used. If an amputation is noted in the fingerprint block a corresponding entry should also appear as a missing finger or missing finger joint in Scars, Marks and Tattoos.

When a fingerprint card is received at the CIB with an indication in one or more of the fingerprint blocks that a finger was cut, bandaged, blistered, or otherwise temporarily disabled, the card will be "name searched" through the master name file and a search of the AFIS data base is performed. Should the search conducted not result in identification, the fingerprint card will not be retained in the AFIS data base if the index and middle fingers are cut, bandaged, etc. Under all circumstances the arrest information will be placed in the CCH data base. A copy of the fingerprint card showing the reasons why the fingerprint card was unsuitable for AFIS will be sent back to the contributing agency. The contributing agency should make an effort when possible to reprint the individual after the temporary disability has healed.

Occupational Problems to Fingerprinting

Occupational problems (bricklayers, carpenters, cheese makers, dishwashers, etc.) are definitely a challenge to the identification officer. In some instances, by means of softening agents (oils and creams), it is possible to obtain legible impressions. It is suggested in these cases a very small amount of ink or very light pressure on the platen be used. Persons who have extremely "soft skin" may be treated with agents to "firm" the fingers.

If it is not possible to accurately classify and file the fingerprint card in the AFIS data base, the name appearing on the card will be searched in the master name file and, if identification cannot be established, a copy of the fingerprint card showing the reasons why the fingerprint card was unsuitable for AFIS will be sent back to the contributing agency.

Permanent Disabilities to Fingerprinting

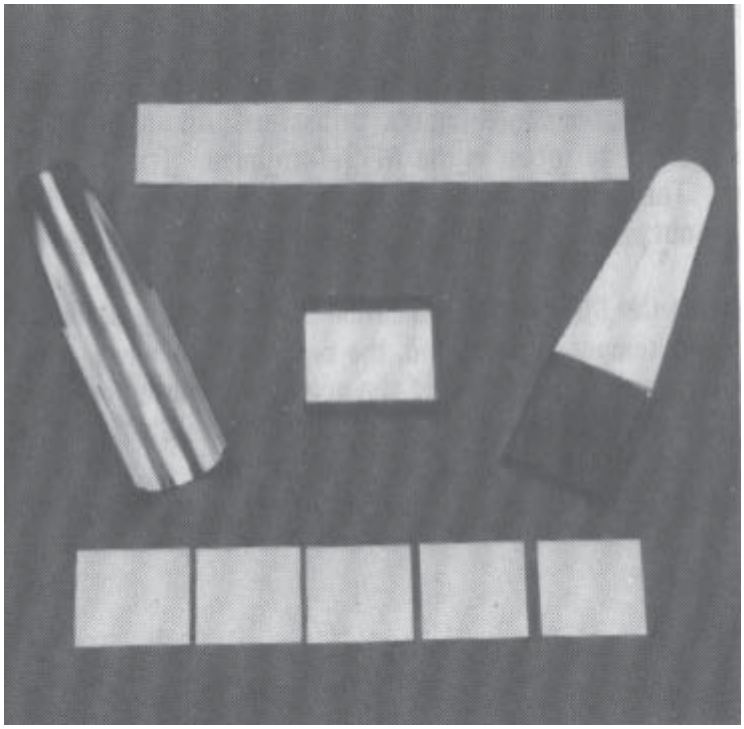
Permanent disabilities can, in most cases, be handled by the identification officer. These may include missing fingers (missing at birth or amputations), and crippled fingers (bent or deformed).

It should be noted that some individuals are born without certain fingers and the notation "missing at birth" must be made in the individual fingerprint block on the card.

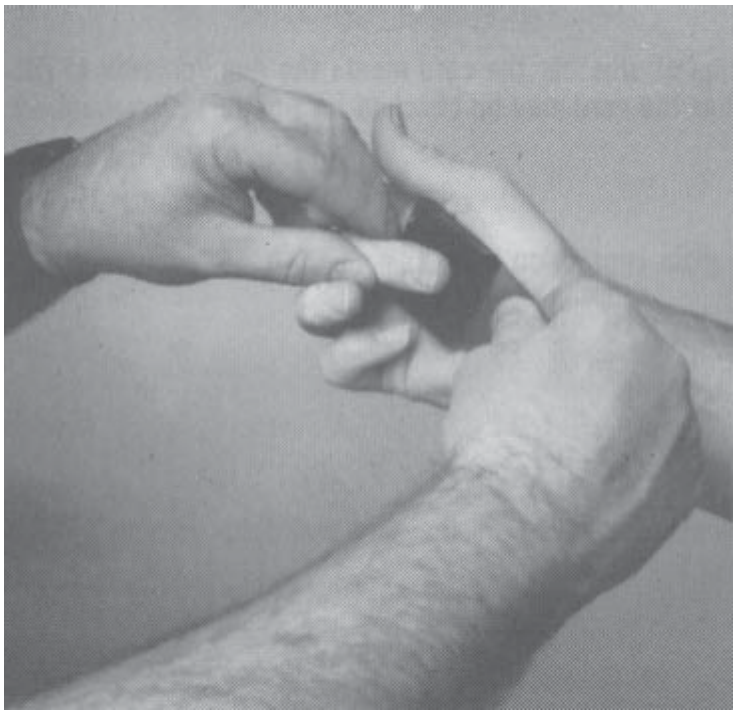
If the person has an amputation, the notation "XX" must be placed in the appropriate fingerprint block(s). The date of the amputation should be included. If a portion of the first joint of a finger is amputated, the finger should be inked and printed and a notation "XX" made. At times fingers that have been damaged are repaired through the process of skin grafting. If this is the case, the impression for the finger that has been grafted should be rolled and the proper notation should be made in the fingerprint block.

The handling of crippled fingers and certain deformities can be discussed as a group because they generally present the same problems. It is not sufficient in all cases to indicate "bent" or "crippled." If the fingers are bent or crippled so that they are touching the palm and cannot be moved, a notation to this effect should be on the fingerprint card in the proper individual fingerprint block. However, these extreme cases are rare. It is suggested special inking devices be used for obtaining the inked impressions of bent or crippled fingers.

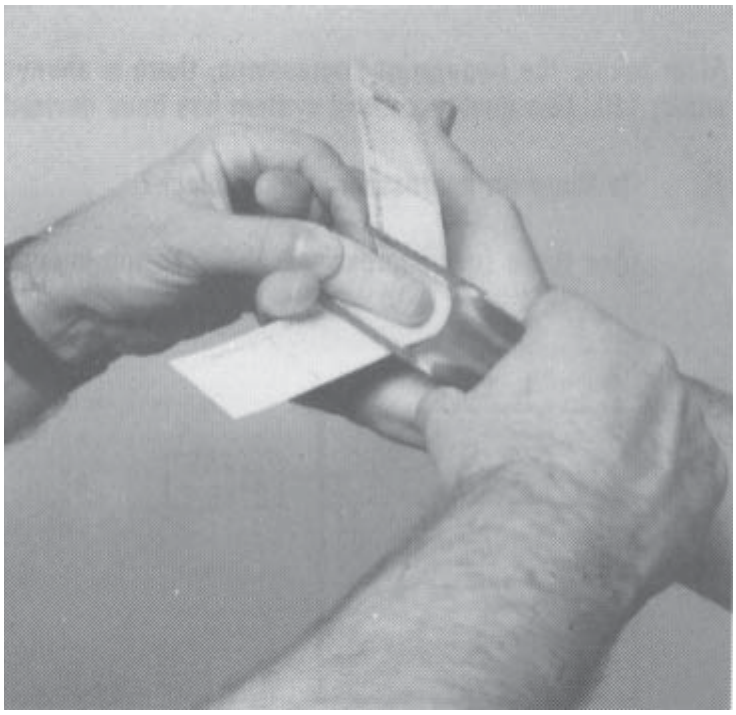
This equipment (see Figure *Equipment for Printing Crippled Fingers*) consists of a spatula, small roller, and a curved holder for the individual finger block. The card can be separated by cutting out the blocks on the fingerprint card and each crippled finger is taken as a separate unit and then pasted over the appropriate block on the fingerprint card for submission. See Figures *Inking a Crippled Finger* and *Obtaining Crippled Impression* for proper method of inking and obtaining of impressions of crippled fingers.



Equipment for Printing Crippled Fingers



Inking a Crippled Finger



Obtaining Crippled Impression

Fingerprinting Deformities (Extra or Webbed Fingers)

If a subject has more than 10 fingers, as occasionally happens, the thumbs and the next 4 fingers should be printed, and any remaining fingers should be printed in the additional information field on the face side of the fingerprint card with a notation made to the effect that these impressions are extra fingers. When a person with more than 10 fingers has an intentional amputation performed, it is invariably the extra finger on the little finger side which is amputated.

It also happens, not infrequently, that a subject will have two or more fingers webbed or grown together making it impossible to roll such fingers on the inside. Such fingers should be rolled, however, as completely as possible, and a notation made to the effect that they are joined.

Split thumbs, i.e., thumbs having two nail joints are classified as if the joint toward the outside of the hand were not present. In other words the inner joint is used, and no consideration whatever is given to the outer joint.

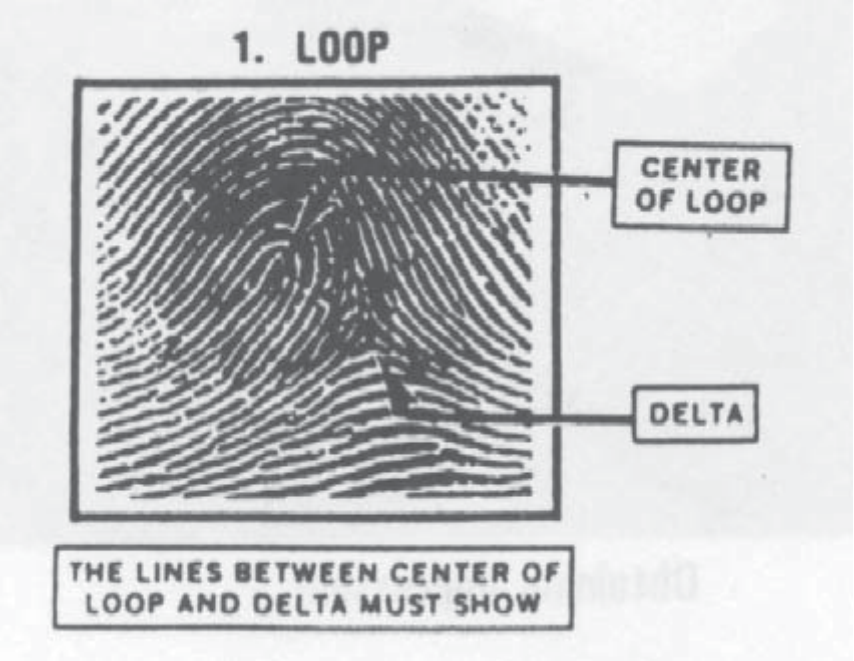
The above situations can also present a problem when taking prints on a livescan device. Basically, the same rules should apply. For any extra fingers, do not roll fingers and/or thumbs located on the outside of the hand. Only capture the inside thumb and the next 4 fingers of each hand. For all webbed fingers, capture only one side at a time to insure an image is in each box even though you will probably be unable to make a complete roll. A notation should be made in the "Additional Information/Basis for Caution" box of the fingerprint card.

NOTE: Agencies are urged to contact the Crime Information Bureau for assistance when unusual circumstances not covered in the Section are encountered.

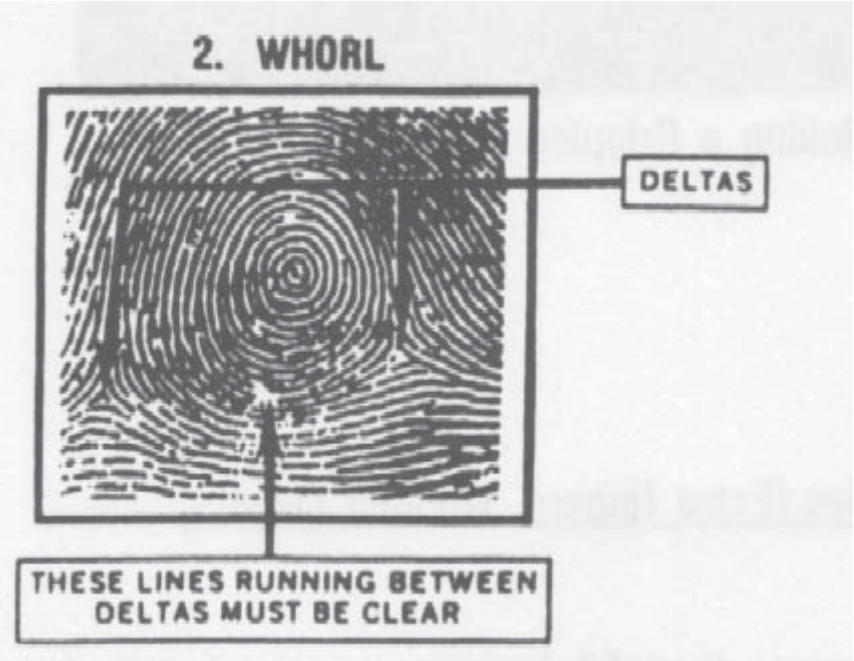
Quality Control

After taking the fingerprint impressions, there is always the question of whether the card meets the requirements of CIB and/or FBI. This quality control system has been devised in order that the card may be checked for possible discrepancies:

1. Is there an impression in each block?
2. Are there four impressions and a thumb impression in the plain impression block?
3. If the impression is a loop, is the core and delta present?



4. If the pattern is a whorl, are both deltas present?



5. Are the impressions uniform in tone and not too dark or too light?
6. Are the impressions clear and distinct?
7. Is the name correct and shown in proper order: last name, first name and middle name?
8. If the subject has an alias (nickname), enter it under "alias".
9. Is the subject's description filled in?
10. Is the subject's date of birth (DOB) noted?

11. Is the subject's address properly noted?
12. Is your agency's name, address and the reason for fingerprinting this subject filled in?
13. Is the signature of the person taking the impressions in the correct section?
14. Is the date the impressions were taken noted?

This quality control system will decrease the percentage of fingerprint cards rejected by the CIB and FBI.

Questionable Identity

Immediate Query of Fingerprints

In **rush cases** involving persons of questionable identity, submission of a fingerprint record to CIB and the FBI is a quick way to see if the subject has a record in the AFIS system of either database. While this may not positively identify someone, it will let you know if they have a record under the name that was given or a record under a different name by fingerprint comparison.

Immediate CIB Fingerprint Query

CIB's Fingerprint Identification Section can be contacted Monday through Friday, from approximately 0600 to 1700. They will check both the subject's name and fingerprints through AFIS for existing records. The turnaround for results of the search should take place the same day, unless it is right at the end of the day and of course barring any problems with volume or system outages. You need to provide them with a name and phone number, as they call back with any results.

Steps for CIB Query

1. Call first! Contacts are either Curt Bauer at **608-261-8122 extension 2600** or Diane Larson at **extension 2603**. This is to let them know to expect the fax and get the search started as soon as possible.
2. If transmitting an electronic arrest fingerprint record to CIB, provide both PCN and TCN, so that CIB staff can locate the record within the workflow. Once the record has been located it can be given a #1 priority in the AFIS to speed up the response time. If you are sending the fingerprint record by fax, you will need to photocopy the ten-print card **one-to-one**.
3. Also, photocopy the ten-print card again at **144%**. This can be accomplished by rotating the fingerprint card on the photocopier to capture the fingerprint impressions only. All fingerprint images (rolled and slaps) will fit on an 8 ½ X 11 sheet of paper for faxing purposes. This is needed to allow the fingerprint images (ridge detail) to come across the fax much cleaner. CIB only needs the prints when blown up to this size, not the rest of the data. This rest of data can be taken from the one-to-one ten-print photocopy that

is also being faxed. Make sure to write the subjects name and DOB somewhere on the sheet.

4. Prepare a cover sheet with subject's name, DOB and the statement that you would like the person checked for any existing records. Make sure that you include a contact name and phone number in case staff at CIB needs to contact you.
5. Fax the one-to-one copy of the ten-print card, along with the copy at 144%, and the cover sheet to CIB at 608-267-8935.

Immediate FBI Fingerprint Query

Requests for a query of name and fingerprints from the FBI database are handled through the Special Processing Center in Clarksburg, WV. They are available 24 hours a day, 7 days a week. You do not have to call ahead, but if you want to or have questions, the number is **304-625-5584**. The turnaround for results of the search is 2 to 4 hours. You need to make sure to provide a name and fax number, as they will fax the results of the search back to you.

Steps for FBI Query

1. Photocopy the ten-print card one-to-one.
2. Photocopy the ten-print card again at **129%**, on **Super-Fine Resolution**. Make sure you write the subject's name and DOB somewhere on the enlarged copy. Again, they do not need the other data on the enlarged version, just the prints. You will have to follow the same procedure as in step 3 above in the "Steps for Query of CIB". (See attached example)
3. Create a cover sheet with the subject's name, DOB and the statement that you are looking for any existing record on the subject or the fingerprints. If you have multiple subjects, put a separate cover sheet between each of the subject's photocopies, with that subject's name and DOB, (per the FBI's request). Make sure that you include a contact name and fax number on the cover sheet, as they will fax the results of the search back to you. Also, be sure to include a phone number in case they have a problem and need to contact you.
4. Fax the one-to-one copy of the ten-print card, along with the copy at 129%, and the cover sheet to the FBI Special Processing Center at **304-625-5587**.

Fingerprint Patterns

Classification vs. Latent Identification

There is much confusion between fingerprint CLASSIFICATION and LATENT fingerprint identification. Although the two areas are definitely related, they should be viewed as two separate functions.

Fingerprint classification is a formula derived from pattern interpretation of the ten fingers in known sequence. There are only three basic fingerprint patterns. They are the arch, loop, and whorl. Fingerprint classification is therefore a means of placing an individual's fingerprint card in a specific location in the fingerprint file. It is much like an address where one or more individuals may reside. Classification alone is not a means of positive identification.

What makes fingerprints unique are the individual ridge details within the pattern. These individual ridge details include such things as ridge endings, forking ridges, enclosures, etc. These minute details make an individual fingerprint unique. Latent fingerprint comparison is based on these ridge details. A latent fingerprint may not have enough of the pattern area visible to be classified and yet there may be enough individual ridge detail to make a positive identification of a suspect. If an investigator has a latent fingerprint but no suspect, that latent fingerprint can be entered and searched against the AFIS data base, which stores the fingerprint images from the arrest cards that are sent to CIB to be added to the Criminal History files, for a possible match. This was nearly impossible in the past due to the time required to perform such a search. With AFIS, a search of the entire data base can now be completed in minutes. If the investigator has a limited number of suspects and their fingerprint cards are available, then a comparison can be accomplished without an AFIS search.

REMEMBER, a Fingerprint Classification Technician can work without latent impressions, but a Latent Fingerprint Examiner cannot function without clear and distinct fingerprint cards that are entered into the AFIS permanent data base. It is important to submit the best set of fingerprints to CIB in order to ensure a good quality data base which increases the probability of a latent fingerprint matching and solving a crime.

Fingerprint pattern interpretation is utilized by the Crime Information Bureau, Fingerprint Identification Section to search and store fingerprint images in the AFIS data base. These tenprint images are compared to images stored in the AFIS data base for positive identification. The examination and comparison of latent fingerprints is handled by the Crime Laboratory Bureau.

Henry System of Fingerprint Classification

Henry System Introduction

The intent of this section is to familiarize all agencies with general information relating to the technical process utilized in developing a fingerprint classification. It is impractical to provide a more detailed explanation. Persons who are interested should consult the Science of Fingerprints, published by the Federal Bureau of Investigation, United States Department of Justice, Washington, D.C., or call the Crime Information Bureau, Fingerprint Identification Section, with questions.

The classification of fingerprints provides for an orderly placing of fingerprint cards in a file with systematic filing of an original card. Any subsequent card containing the same inked impressions falls into the same section of the file and a search quickly yields the earlier record. The AFIS classification system used in the Fingerprint Identification Section of the Crime Information Bureau is based upon the Henry System.

The Henry classification formula is determined by the type of pattern appearing in each fingerprint impression, and the related ridge counts or tracings made of that pattern.

Fingerprint Pattern Types

Fingerprints fall into 3 large general groups of patterns, each group bearing the same general characteristics. The patterns may be further divided into sub-groups by means of the smaller differences existing between the patterns in the same general group. These groups are:

Arches

PLAIN ARCH

is that type of pattern in which the ridges enter upon one side, make a rise or wave in the center, and flow or tend to flow out upon the opposite side.

Plain Arch

TENTED ARCH

is that type of pattern which possesses either an angle, an up thrust, or two of the three basic characteristics of the loop.

Tented Arch

Loops

A LOOP is that type of pattern in which one or more ridges enter upon either side, recurve, touch or pass an imaginary line between delta and core and pass out or tend to pass out upon the same side the ridges entered.

RADIAL and ULNAR LOOPS

The terms "radial" and "ulnar" are derived from the radius and ulna bones of the forearm. Loops which flow in the direction of the ulna bone (toward the little finger) are called ulnar loops and those which flow in the direction of the radius bone are called radial loops. *The classification of loops is based on the way the loops flow on the hand (not the card), so that on a fingerprint card for the left hand, loops flowing toward the thumb impression are ulnar, and loops flowing toward the little finger are radial.*

Loop (Ulnar on left hand, Radial on right hand)

Loop (Radial on left hand, Ulnar on right hand)

Whorls

PLAIN WHORL

consists of one or more ridges which make or tend to make a complete circuit, with two deltas, between which, when an imaginary line is drawn, at least one recurving ridge within the inner pattern area is cut or touched.

Plain Whorl

CENTRAL POCKET LOOP WHORL

consists of at least one recurving ridge, or an obstruction at right angles to the line of flow, with two deltas, between which, when an imaginary line is drawn, no recurving ridge within the inner pattern is cut or touched.

Central Pocket Loop

DOUBLE LOOP WHORL

consists of two separate loop formations, with two separate and distinct sets of shoulders and two deltas.

Double Loop

ACCIDENTAL WHORL

consists of a combination of two different types of patterns with the exception of the plain arch, with two or more deltas, or a pattern which possesses some of the requirements for two or more different types or a pattern which conforms to none of the definitions.

Accidental

Other Fingerprint Definitions

Bifurcation

The forking or dividing of one line into two or more branches.

Core

The approximate center of the finger impression.

Delta

That point on a ridge at or nearest to the point of divergence of two type lines, and located at or directly in front of the point of divergence.

DELTA RULES:

1. When there are two or more possible bifurcation deltas which conform to the definition, the one nearest the core should be chosen.
2. The Delta may not be located in the middle of a ridge running between the type lines toward the core, but at the end nearest to the core.
3. The delta may not be located at a bifurcation which does not open toward the core.
4. Where there is a choice between a bifurcation and another type of delta, the bifurcation is selected.

Divergence

The spreading apart of two lines which have been running parallel or nearly parallel.

Sufficient Recurve

The space between the shoulders of a loop, free of any appendages which abut upon it at a right angle on the outside of the recurve.

Type Lines

The two innermost ridges which start or go parallel, diverge, and surround or tend to surround the pattern area.

Henry Classification with Extensions

The Classification Formula may be composed of the following divisions, each followed with the definition and examples of a classification line for the divisions when completely applied:

Primary

Each finger has a definite numerical value when a whorl type pattern is present. The total of these values make up the Primary.

The numerator is made up of the total sum of the values present in the even numbered fingers (2, 4, 6, 8, 10) plus one.

The denominator is made up of the total sum of the values present in the odd numbered fingers (1, 3, 5, 7, 9) plus one.

Secondary

The Secondary is composed of the pattern types present in the index fingers (2 and 7).

The number two finger is used as the numerator and the number seven finger is used as the denominator.

The Secondary is brought up to the classification line to the right of the primary.

Small Letter Group

Prints with an arch (a), tented arch (t) or radial loop (r) in any finger except the index fingers constitute the Small Letter Group of the secondary classification. Small letters consist of a, t, and r only.

Small letters are brought up to the classification in their respective relative positions to the index finger (2 and 7) when appearing in fingers 1, 3, 4, 5, 6, 8, 9, 10.

All small letters must be indicated in the classification formula.

Dashes are used in the classification formula to indicate an ulnar loop or a whorl intervening between the index finger and the first small letter, or between two small letters.

When 2 or more small letter patterns of the same type appears together, they are indicated as: 2a, 3a, 2t, 3t, 2r, or 3r.

Subsecondary

The Subsecondary is taken from fingers 2, 3, 4 (numerator), and 7, 8, 9 (denominator).

The Subsecondary is brought up to the classification line to the right of the secondary.

Definite values are assigned to the ridge counts in these fingers.

Whorl tracings are brought up as part of the Subsecondary.

A small letter to the right of the index finger eliminates the Subsecondary, with some exceptions.

Major

The Major is taken from the thumbs.

The Major is brought up to the classification line to the left of the primary.

Number six finger has only one set of values as a loop; it is always constant.

Number one finger has two sets of values as a loop.

Number six finger is used as the denominator. Number one finger is used as the numerator.

In a combination of loop and whorl, the first set of values is always used for the number one finger.

If whorls are present in both thumbs, the tracings are used.

A small letter (a, t, r) present in either or both thumbs eliminates the Major.

Final

The Final is brought up to the right of the subsecondary.

The Final is taken from number five finger if number five is a loop, either ulnar or radial. If number five is not a loop, the Final is taken from the number ten finger. If neither five nor ten is a loop, there is no Final, with some exceptions.

If the Final is taken from number five finger, it is brought up above the classification line. If the Final is taken from the number ten finger, it is brought up below the line.

If whorls are present in all fingers, the whorl in number five finger is counted and brought up as a Final. When counting whorls, always count as if they were ulnar loops. A whorl in the right hand is counted from left delta to core. In the left hand, count from right delta to core. When counting double loops a horizontal double loop is counted from the left delta to the nearest core. A vertical double loop is counted from the left delta to the upright loop. More than two cores, count from deltas, to core least number of ridges distant.

Key

The Key is brought up to the classification line to the left of the major.

The Key is taken from the ridge count of the first loop appearing in the classification other than fingers five and ten. Either ulnar or radial loop may be used for the Key.

The Key is always brought up above the classification line, regardless of the finger used.

If there are no loops present there is no Key.

NCIC Fingerprint Classification

The NCIC method of fingerprint classification is utilized in many ways by the criminal justice system to better establish the identity of an individual.

When a wanted person's fingerprint classification is available, the NCIC FPC should always be included in the wanted person's record for entry into the TIME System Warrant/Wanted Persons File.

While not a positive identifier, the NCIC fingerprint classification can be of assistance in eliminating a person as a suspected wanted person, or a suspect in a criminal investigation. It is also included on the Crime Information Bureau Identification Transcript as an additional identifier. The use of the NCIC FPC in communications is less subject to error in transmission than the Henry Classification and is convertible to the Henry Classification for searching fingerprint files.

The NCIC FPC formula is printed in a straight line of 20 alphabetic and numeric characters, beginning with the right thumb as number 1, and continuing through number 10 with the left thumb being number 6.

Two characters are to be used for each finger as shown in the following table:

Pattern Type	Pattern Subgroup	NCIC FPC Code
Arch	Plain Arch	AA
	Tented Arch	TT
Loop	Radial Loop	2 numeric characters. Determine actual ridge count and add fifty (50).

Pattern Type	Pattern Subgroup	NCIC FPC Code
	Ulnar Loop	2 numeric characters indicating actual ridge count. If ridge count in less that 10, precede the count with a zero (0).
Whorl	Plain Whorl	Enter "P" followed by tracing of whorl.
	Inner Tracing	PI
	Meeting Tracing	PM
	Outer Tracing	PO
	Central Pocket Loop	Enter "C" followed by tracing of whorl.
	Inner Tracing	CI
	Meeting Tracing	CM
	Outer Tracing	CO
	Double Loop	Enter "d" followed by tracing of whorl.
	Inner Tracing	dI
	Meeting Tracing	dM
	Outer Tracing	dO
	Accidental	Enter "X" followed by tracing of whorl.
	Inner Tracing	XI
	Meeting Tracing	XM
	Outer Tracing	XO
Missing or Amputated Finger		XX
Completely Scarred or Mutilated Pattern		SR

Wisconsin Offense Information

Offense Severity Codes

Select the appropriate severity code for the offense if more than one exists for a listed violation, i.e. felony or misdemeanor.

Code	Severity
F	Felony
M	Misdemeanor
N	Non-criminal

Select the appropriate classification level for the felony, misdemeanor or non-criminal offense being charged. On the actual fingperint card, only felony, misdemeanor or non-criminal needs to be indicated. The classification level is to assist in selecting the proper statute that is being alledged.

Code	Classification
A	Class A felony, misdemeanor or non-criminal offense
B	Class B felony, misdemeanor or non-criminal offense
C	Class C felony, misdemeanor or non-criminal offense
D	Class D felony or non-criminal offense
E	Class E felony or non-criminal offense
F	Class F felony
G	Class G felony
H	Class H felony
I	Class I felony
U	Unclassified felony, misdemeanor or non-criminal offense

Examples:

- FB is a class B felony
- FU is an unclassified felony
- MA is a class A misdemeanor
- ND is a class D forfeiture (Non-criminal)

Some of the offenses listed indicate a severity of "modifier". These statutes modify the underlying offense charge. A modifier cannot be the only offense alleged, it must be used in conjunction with another valid, chargeable offense.

Statute Tables

The following Wisconsin statute tables contain the following columns:

- Statute - the assigned statute number for the given offense.
- Severity - the severity of the stated offense; felony, misdemeanor or non-criminal, along with the severity classification.
- Literal - the literal description for the offense as found in the Consolidated Court Automation Program tables.
- NCIC - the NCIC code assigned for the offense. In cases where more than one possible NCIC code exists, the code best describing the offense should be used. Those NCIC codes ending in 99 should only be used if non of the other available codes apply.

The statute tables are sorted by two different means, numerically by statute number and alphabetically by literal description.

Statute Chapters 1 - 25

5708	Wiretap-Failure to Report
5799	Invade Privacy-Further Describe in Remarks field

Smuggling

Code	Offense/Charge
5801	Smuggle Contraband-Further Describe in Remarks field
5802	Smuggle Contraband to Prisoner-Further Describe in Remarks field
5803	Smuggle to Avoid Duty-Further Describe in Remarks field
5899	Smuggling-Further Describe in Remarks field

Election Laws

Code	Offense/Charge
5999	Election Laws-Further Describe in Remarks field

Antitrust

Code	Offense/Charge
6099	Antitrust-Further Describe in Remarks field

Tax Revenue

Code	Offense/Charge
6101	Income Tax-Further Describe in Remarks field
6102	Sales Tax-Further Describe in Remarks field
6103	Liquor Tax-Further Describe in Remarks field
6199	Tax Revenue-Further Describe in Remarks field

Conservation

Code	Offense/Charge
6201	Conservation-Animals-Further Describe in Remarks field
6202	Conservation-Fish-Further Describe in Remarks field
6203	Conservation-Birds-Further Describe in Remarks field
6204	Conservation-License Stamp-Further Describe in Remarks field
6205	Conservation-Environment-Further Describe in Remarks field
6299	Conservation-Further Describe in Remarks field

Money Laundering

Code	Offense/Charge
6300	Money Laundering-Further Describe in Remarks field

Exploitation/Enticement

Code	Offense/Charge
6401	Sexual Exploitation of Minor - Material - Transport
6402	Sexual Exploitation of Minor - Material - Photograph
6403	Sexual Exploitation of Minor - Material - Film
6404	Sexual Exploitation of Minor - Exhibition of Minor
6405	Sexual Exploitation of Minor - Sex Performance
6406	Sexual Exploitation of Minor - Via Telecommunications
6407	Sexual Exploitation of Minor - Prostitution
6408	Enticement of Minor for Indecent Purposes - via Telecommunications
6409	Enticement of Minor for Prostitution
6410	Enticement of Minor for Indecent Purposes
6499	Exploitation/Enticement-Further Describe in Remarks field

Crimes Against Person

Code	Offense/Charge
7099	Crimes against Person-Further Describe in Remarks field

Property Crimes

Code	Offense/Charge
7199	Property Crimes-Further Describe in Remarks field

Morals - Decency Crimes

Code	Offense/Charge
7299	Morals-Decency Crimes-Further Describe in Remarks field

Public Order Crimes

Code	Offense/Charge
7399	Public Order Crimes-Further Describe in Remarks field

Juvenile Offenders

Code	Offense/Charge
8100	Juvenile Escape From Custody
8101	Juvenile Abscond-Parole
8102	Juvenile Abscond-Probation
8103	Juvenile Custody

For in-state use only.

Disposition Codes

The following table contains the arrest disposition codes that are current recognized by the Crime Information Bureau.

Code	Disposition
252	Confined
300	Convicted
301	No Prosecution
302	No Prosecution First Offender Program
303	No Prosecution Read In
304	No Prosecution Restitution Ordered
305	No Prosecution Read In with Restitution
306	Released by Police
307	Dismissed
308	Diversion First Offender Program
309	Dismissed Read In
310	Dismissed Restitution Ordered
311	Dismissed Read In with Restitution Order
312	Dismissed Consolidated with Another Charge
313	Acquitted

Code	Disposition
314	Judgment Withheld
315	Not Guilty by Reason of Mental Defect
316	Incompetent to Stand Trial
317	Youthful Offender Act
319	Consolidated With:
320	Held Open
321	Amended by Prosecutor
322	Charge Issued
330	Extradited
331	Chg Venue/Federal Court
332	Deferred Prosecution/Sentence
333	Transferred to Juvenile Court
340	Deferred Prosecution
341	Sent Back
342	Pending
350	Hold For:
351	Turned Over To:
352	Confined
353	Referred to Juvenile Authorities
354	Released
355	Released to Guardian
356	Referred to Municipal Court
357	Turned Over to Military Authorities
358	Hold for Court
359	Record on File Court
360	Turned Over to Court
361	Turned Over to Federal Authorities
362	Turned Over to US Immigration
363	Hold for Tribal Court
364	Turned Over to Probation/Parole Authorities
365	Waived to Adult Court
366	Post Conviction Sentence
367	Direct Discharge to Court
368	Hold for Probation/Parole Authorities
369	Hold for Federal Authorities
370	Hold for Military Authorities

387	Guilty/No Other Sentence
399	Information Only
800	Dismissed/New File CF
801	Dismissed/New File CT
802	Information Files
890	Before 2005 Traffic Dispos Not Reported to CIB
990	Adjudicated Juvenile Delinquent
992	Change of Venue
993	Petition Dismissed
994	Petition Withdrawn
995	Case Closed
996	Case Closed (CCAP disposition)
997	Case Reopened
998	Amended by Prosecutor or Court
999	Disposition Not Reported

Sentence Codes

The following table contains the sentence codes that are current recognized by the Crime Information Bureau.

Code	Sentence
400	Prison
401	Prison Stayed
402	Jail Stayed
403	Probation
404	Probation (Non-State)
405	Probation Stayed
406	Jail
407	Jail with Release Privileges
408	Committed D.O.C. Treatment Sex Offender
409	Mental Health Institute
410	Place of Incarceration Unknown

Code	Sentence
411	Sentence Withheld Probation
412	Sentence Withheld Probation other than State
413	Conditional Probation (ss961.47)
414	Probation Original Sentence Stayed
415	Milwaukee County House of Corrections
416	Jail Stayed with Release Privileges
417	Milwaukee County House of Corrections w/Release Privileges
418	Milwaukee House of Corrections Stayed
419	Probation (Non-State) Original Sentence Stayed
420	Sentence Stayed, Prison
421	Sentence Stayed, Jail
422	Place of Incarceration Unknown w/Release Privileges
423	Electronic Surveillance
424	Sentence Stayed, Jail Release Privileges
425	Milwaukee County House of corrections Stayed w/Release Privileges
426	Milwaukee House of Corrections - Electronic Surveillance
427	Milwaukee House of Corrections - Electronic Surveillance - Release Privileges
428	Electronic Surveillance w/Release Privileges
429	Intensive Sanctions
430	Intensive Sanctions Stayed
431	Milwaukee House of Corrections - Electronic Surveillance - Huber - Stayed
432	Electronic Surveillance Stayed
433	Extended Supervision
434	Extended Supervision Stayed
435	Fine
436	Fine Stayed
437	Restitution
438	Community Service
439	Sentence suspended
440	License Suspended
441	License Revoked
442	Ignition Interlock
443	Alcohol Assessment
444	Costs
445	Court Ordered Condition
446	Court Ordered Fees
447	Court Ordered Expungement
448	Court Deferred Judgment No Sentence Imposed
449	Court Ordered Lifetime Supervision
450	Court Ordered Transfer
451	Court Ordered Stay of Order, No Disposition

Code	Sentence
452	Forfeiture
453	Supervised Release
454	DNR Restoration
455	DNR Revocation/Suspension
999	Unknown Sentence Code

Personal Descriptors

Name

Complete names are to be used if available. No unit of a name or alias should be abbreviated unless the complete name exceeds the maximum field length. Abbreviations such as FNU, LNU, MNU, NMI and NMN should not be used.

Apostrophes (O'Neal, O'Boyle) should be eliminated.

Name Suffixes

Suffixes are names that follow the last name, such as II, III, Jr., Sr., etc.

Examples: Smith, John Robert III, Smith, John Sr., Smith, John Jr.

Name suffixes should not be confused with abbreviations following the name indicating some type of degree, such as MD, PhD, DDS, DVM, JD, etc.

Name Prefixes

Prefixes precede the name and should not be included in he name field. Prefixes include Mr., Mrs., Ms., Miss and Dr. Titles or degrees of individuals, including foreign titles or degrees, and their abbreviations (Mr., Mrs., Miss, Ms., Prof., Ph.D., Capt., Lt., D.D.S., Dr., Rev., etc.) may be included as an alias when it is known or believed the title or degree may be used by an individual when identifying themselves. The location is the same as data showing seniority.

Examples, Brown, John William Rev., Smith, Robert L Mrs.

Alias or Maiden Names

When you know that the individual has used other names or dates of birth they should be listed in this block. Maiden names are considered alias names. The master name on a given record is the primary name submitted on the first fingerprint card for that individual. If Janet Beth Aldrone marries John Smith and legally takes his name, the next fingerprint card contributed for this subject should have the name Janet Beth Smith listing Janet Beth Aldrone in the alias field. "Nee", indicating a former name, should not be included in the alias field.

If a married person uses both last names, it should be contributed with both last names, separated by a hyphen or space, however the person lists their last name. When a name with a space or hyphen is received, alias names will automatically be

created for all possible variations of the hyphenated name. Last names may contain as many as three combinations of hyphens or spaces. First names may contain up to two combinations of hyphens or spaces.

Compound Names/Hispanic Names

For compound names enter both surnames with or without the hyphen.

For Hispanic names, which usually contain compound surnames (paternal and maternal), the full name including both surnames, if known, should be entered in the Name Field of wanted person entry. For example:

- Subject's Name - Jose Rodriguez-Gonzalez (Hyphenated)
  - Enter Name - RODRIGUEZ-GONZALEZ/JOSE
- Subject's Name - Jose Rodriguez Gonzalez (non-hyphenated)
  - Enter Name - RODRIGUEZ GONZALEZ/JOSE
- Subject's Name - Jose Rodriguez y Gonzalez (Spanish letter "y" in place)
  - Enter Name RODRIGUEZ Y GONZALEZ/JOSE

Additionally, each surname component of the full name should be entered individually as a separate alias in a supplemental record entry to the wanted person record already in file to ensure the possibility of a hit should either surname be inquired upon.

When entering each surname component individually as an alias, enter the hyphen or letter "y" if present in the name. Using the above name as an example, the following two aliases would be appended to the base record: RODRIGUEZ/JOSE and GONZALEZ/JOSE.

Other compound surnames should be entered in the same manner as described above.

Oriental Names

For Oriental names the last unit should be entered as the master last name. Each of the other units should be entered as a surname/alias of the wanted person supplement, with the other units shown as first and middle name. For example:

- NAI/DONALD/LEE
- LEE/DONALD/NAI
- DONALD/LEE/NAI

Single Names

For persons who use only one name; e.g., Moon, the name should be entered as the surname and X entered as the first name. For example:

- MOON/X

Gang or Street Names

These types of names usually consists of a single name, making them difficult to index or search. These single name gang or street identifiers should be placed in the

remarks section of the fingerprint card. Please identify the remark as a "street" or "gang" name.

No Middle Name

If no middle name or initial exists, leave the field blank. Using None, NMN or NMI will cause the middle name field to be populated by those identifiers, rather than properly leaving it blank.

Sex

Gender	Code
Female	F
Male	M
Unknown	U*

*Code valid for Query only.

Race

Race	Code
Asian or Pacific Islander - a person having origins in any of the original peoples of the Far East, Southeast Asia, the Indian subcontinent of the Pacific Islands	A
Black - a person having origins in any of the black racial groups of Africa	B
American Indian or Alaskan Native - a person having origins in any of the original peoples of the Americas and who maintains cultural identification through tribal affiliations or community recognition	I
Unknown	U*
White - a person having origins in any of the original peoples of Europe, North Africa, or Middle East	W

*Code valid for Query only.

Hispanic subjects should be entered or queried with the race code most closely representing the individual.

Place of Birth

The state (Mexican or U.S.), territorial possession, province (Canadian), or country of birth should be indicated. These codes can be located in the State and Country Data Codes section of this manual.

Date of Birth

Date of Birth - TIME System

MONTH	01 through 12
DAY	01 through 31
YEAR	1900 through 1999
Example: DOB Sept. 6, 1930	09/06/1930

Date of Birth - Fingerprint Submissions

MONTH	01 through 12
DAY	01 through 31
YEAR	00 through 99
Example: DOB Sept. 6, 1930	09/06/30

Height

Height must be expressed in feet and inches. Fractions of an inch should be rounded off to the nearest inch.

FEET & INCHES	INCHES	CODE	FEET & INCHES	INCHES	CODE
4' 0"	48	400	6' 0"	72	600
4' 1"	49	401	6' 1"	73	601

5' 10"	70	510	7' 10"	94	710
5' 11"	71	511	7' 11"	95	711

Weight

Weight must be expressed in pounds. Fractions of a pound should be rounded off to the nearest pound.

WEIGHT	CODE
94 pounds	094
186 pounds	186
210 1/2 pounds	211

Eye Color

Use one of the following codes to indicate eye color:

Eye Color	Code	Eye Color	Code
Black	BLK	Hazel	HAZ
Blue	BLU	Maroon	MAR
Brown	BRO	Multicolored	MUL
Green	GRN	Pink	PNK
Gray	GRY	Unknown	XXX

Hair Color

Use one of the following codes to indicate hair color/condition:

Hair Color	Code	Hair Color	Code
Bald (enter 166 or BALD in SCARMARKS)	XXX	Orange	ONG
Black	BLK	Pink	PNK
Blond or Strawberry	BLN	Purple	PLE
Blue	BLU	Red or Auburn	RED
Brown	BRO	Sandy	SDY
Gray or Partially Gray	GRY	Unknown	XXX
Green	GRN	White	WHI

Skin Tone

Use one of the following codes to indicate skin tone or complexion:

Skin Tone	Code	Skin Tone	Code
Albino	ALB	Medium Brown	MBR
Black	BLK	Medium	MED
Dark Brown	DBR	Olive	OLV
Dark	DRK	Ruddy	RUD
Fair	FAR	Sallow	SAL
Light Brown	LBR	Yellow	YEL
Light	LGT		

Scars, Marks, Tattoos and Other Characteristics

Only the following codes should be entered in this field. Numeric codes are for use with TIME System entries, alphabetic codes are for use on fingerprint cards. All spaces for alphabetic codes must be included exactly as shown.

The codes for scars, marks, tattoos and other characteristics are broken down into the following categories:

Artificial Body Parts and Aids

Artificial Part/Aid	Ident Code	TIME Code
Arm, artificial (non-specific)	ART ARM	543
Arm, brace, left and right arms	BRA LR ARM	545
Arm, brace, one arm (non-specific)	BRAC ARM	544
Arm, left, artificial	ART L ARM	001
Arm, left, brace	BRAC L ARM	084
Arm, right, artificial	ART R ARM	002
Arm, right, brace	BRAC R ARM	083
Back, brace	BRACE BACK	085
Cane	CANE	548
Contact Lenses	CON LENSES	003
Crutches	CRUTCHES	549
Denture, lower only	DENT LOW	005

Anticonvulsants (seizure medicines - includes: Dilantin, Mysoline, Phenobarbital, etc.)	TD ACONVUL	417
Antidepressants (mood-lifters - includes: Amitriptylene, Elavil, Triavil, Norpramine,Prozac, Zoloft, etc.)	TD ADEPRES	420
Anti-inflammatory Medication	TD ANTINFL	615
Bronchial dilators (includes inhalers)	TD BRNCHDL	629
Cardiac (heart) medications (includes: Digitalis, Digoxin, etc.)	TD CARDIAC	422
Hypnotics (sleeping aides - including: Barbituates, Chloral Hydrate, Glutethemide, etc.)	TD SYPNOTI	418
Insulin	TD INSULIN	537
Other Therapeutic Medications not listed (identify in MIS field)	TD OTHER	423
Ritalin	TD RITALIN	630
Tranquilizers (includes: Valium, Thorazine, Stallazine, etc.)	TD TRANQUI	419

Fingerprint Classification

Enter the twenty character NCIC fingerprint classification for the individual if available.

Finger	Positions	Finger	Positions
Right thumb	1 and 2	Left thumb	11 and 12
Right Index	3 and 4	Left index	13 and 14
Right middle	5 and 6	Left middle	15 and 16
Right ring	7 and 8	Left ring	17 and 18
Right little	9 and 10	Left little	19 and 20

When the fingerprint field is coded with data from III records the following applies:

- The FINGERPRINT CLASS is furnished on two lines. The first line represents the fingerprint classification of the right hand. The second line represents the left hand. The field should be coded using the information from the first line as positions 1 through 10 and the second line as positions 11 through 20.

The following codes apply to the FINGERPRINT CLASS:

Pattern Type	Pattern Subgroup	FPC Code
Arch	Plain Arch	AA
	Tented Arch	TT
Loop	Radial Loop	Two numeric characters. Determine actual ridge count and add fifty (50).
	Ulnar Loop	Two numeric characters indicating actual ridge count (less than 50).
Whorl	Plain Whorl

	Outer	PO
	Central Pocket Loop Whorl	
	Inner	CI
	Meeting	CM
	Outer	CO
	Double Loop Whorl	
	Inner	DI
	Meeting	DM
	Outer	DO
	Accidental Whorl	
	Inner	XI
	Meeting	XM
	Outer	XO
Complete Scar/Mutilated Pattern		SR
Missing/Amputated Finger		XX

Fingerprint Codes for Unidentified Persons

Classification for fingerprints for unidentified persons is the same with the following exceptions:

- The code NA is used when a finger cannot be printed because it has been amputated and not found with the body, and the amputation was related to the death of the individual. Ante mortem amputations that are not related to the death are indicated by using the XX code.
- The code NA is also used when a finger cannot be printed because it is burned or mutilated and the burning or mutilation was related to the death of the individual. Ante mortem burns, mutilations or scars that are not related to the death are indicated by using the SR code.

- If all ten of the deceased individual's fingers have been amputated and not found with the body, burned or mutilated and the amputation, burning or mutilation is related to the death, the code NFP may be entered. The NCIC computer will convert the NFP to ten NAs for insertion in the field.

Miscellaneous Identifying Numbers

The appropriate two-letter identifying code must precede the number and is separated from the number by a hyphen (-). Any alphabetic character(s) which is part of the number is to be included, except as noted in the following.

U.S. military services are now using Social Security numbers to identify military personnel. This use applies to active duty, reserve and retired service personnel. This number should be entered in both the **Miscellaneous Number and Social Security Number** fields. If a member of the Army National Guard has a social security number of 420-19-0210, it should be entered at 420190210 in the Social Security field and as AS-410190210 in the Miscellaneous Number field.

Miscellaneous Number Type	Code
Air Force Serial Number	AF
Air National Guard Serial Number	AS
Alien Registration Number	AR
Army Serial Number	AS
Canadian Social Insurance Number	CI
Driver License Number*	DL
Marine Corps Serial Number	MC
Mariner's Document or Identification	MD
National Guard Serial Number	AS
Navy Serial Number	NS
Originating Agency, Police or Identification Number	OA
Passport Number	PP
Personal Identification (state-issued only)	PI
Port Security Card Number	PS
Royal Canadian Mounted Police Identification or Fingerprint Section Number	MP
Selective Service Number	SS
Coast Guard Serial Number	CG
Veterans Administration Claim Number	VA

* See Operator's License Number section of manual for proper coding of driver's, or operator's license and identification card numbers.

Social Security Number

A number in the Social Security Number field is entered without dashes, 420-19-0210 should be entered at 420190210.

Operators License Number

Information from a license issued to operate a motor vehicle should be entered. Expired license information may be entered when current data is not available. Information from a state-issued identification card may be entered when operator's license data is not available, however a comment must be included in the **Remarks** or **Miscellaneous** field indicating operator's license number is identification, i.e. OLN IS ID.

For TIME System entries, enter the appropriate data in the appropriate fields: Operator's License Number, Operator's license State and Operator's License Year of Expiration.

For fingerprint submission, operator's license information is entered in the Miscellaneous Number field and should be preceded by the letters DL followed by a hyphen(-), the two-character abbreviation for the issuing state, then a space followed by the operator's license number, including any hyphens the number may contain.

As an example, a Wisconsin operator's license of H123-4567-8910-01 expiring in 2010 should be entered as:

Submission Type	Operator's License Number Field	License State Field	Expiration Year Field	Miscellaneous Number Field
TIME	H123-4567-8910-01	WI	2010	
Fingerprint				DL-WI H1230-4567-8910-01

Blood Type

Blood Type	Code	Blood Type	Code
AB Negative	ABNEG	B Negative	BNEG
AB Positive	ABPOS	B Positive	BPOS
AB Unknown	ABUNK	B Unknown	BUNK
A Negative	ANEG	O Negative	ONEG
A Positive	APOS	O Positive	OPOS
A Unknown	AUNK	O Unknown	OUNK
		Unknown	UNKWN

Circumcision

Circumcision	Code
Was Circumcised	C
Not Circumcised	N
Unknown	U

Footprints Available

Yes	Y
No	N

Body X-Rays Available

Body X-rays	Code
No X-Rays available	N
X-Rays for some, not all body parts	P
X-Rays available for all body parts	F

Corrective Vision Prescriptions

The CORRECTIVE VISION field may contain up to 40 characters and any character in the NCIC character set (except for a period) to indicate the appropriate corrective vision prescription for the individual.

A vision prescription usually contains two sets of values, one for the right lens and one for the left lens. The prescription for the right lens is usually prefixed with the characters OD or R. The prescription for the left lens is usually prefixed with the characters OS or L. Each prescription may contain up to five elements which describe the sphere, cylinder, axis, add (for bifocals), and prisms of the lens. Most prescriptions for juveniles will contain only the sphere, cylinder and axis.

The field is to be coded exactly as the prescription is written by the ophthalmologist, optometrist, optician or laboratory technician. However, some symbols cannot be accepted as used in prescriptions. In these instances, the following codes should be used for the symbol entry:

Prescription Symbol	Code
+ (plus)	P
. (decimal)	D
= (equals)	E
X (times)	X

The following are examples of vision prescriptions and proper coding:

Prescription	Code
OD-2.50=-.25x90 OS-2.00=-.25x95	OD-2D50E-D25X90 OS-2D00E-D25X95
R-1.75-.25x100 L-1.50-.25x85	R-1D75-D25X100 L-1D50-D25X85

Prescription	Code
OD PL=+1.00x180 OS+3.00=+1.00x170	OD PLE+1D00X1809 OS+3D00E+1D00X170

If the vision prescription contains more than 40 characters, the right lens information should be entered in the CORRECTIVE VISION or GLASSES field and the left lens information entered in the MISCELLANEOUS or REMARKS field.

Jewelry

Jewelry Description	Code
Ankle bracelet (includes ankle bracelets having a pendant)	AB
Belt Buckle	BB
Backpack	BK
Broach or pin	BP
Cigarette lighter, holder or case	CL
Comb (inc. hair combs, barrettes, mustache combs & picks)	CO
Cuff links	CU
Earring (includes clasp, pierced & pendant earrings)	ER
Key chain	KC
Money clip	MC
Necklace (includes neck chain with pendant or watch)	NE
Pocket watch chain (fob) or Vest chain	PC
Pocket knife	PK
Ring	RI
Tie chain, clasp or tack	TC
Watch (includes wrist, pocket & stopwatch)	WA
Wrist bracelets having pendants (includes ID & medical alert)	WB
Wallet or Purse	WP

Missing Person Codes

Missing Person Description	Code
Amber Alert	AA
Child Abduction	CA
Disaster Victim	DV
Missing Person	MP

Body Part Status

Body Part Status	Code
All body parts recovered (retired June 2008)	ALL
All body parts recovered – Decomposed	ALD
All body parts recovered – Fresh	ALF
Skeleton recovered	SKL
Recovered – Decomposed	D

Recovered – Decomposed	D
Recovered – Fresh	F

Dental Characteristics

This field describes each tooth, any restorations and other characteristics.

Dental Characteristics Prior to April 4, 2004

Dental Characteristics	Code
All 32 teeth are present, no teeth are decayed, no teeth have been restored and there are no unusual characteristics.	ALL
Dental characteristics are not available.	UNK

Dental Characteristics April 4, 2004 and After

Dental Characteristics	Code
All 32 teeth are present and are virgin teeth. May have caries by no restoration. NCIC will display “All 32 permanent teeth present with no restorations”.	ALL
Dental characteristics are not available for all 32 teeth. NCIC will display “Dental characteristics (DCH) are not available”.	UNK

The following tables contain descriptions of the codes to be used in a supplemental dental entry.

Dental Status Codes

Dental Status Codes Before April 4, 2004

Dental Status	Code
Missing, closed socket (healed)	A

Dental Status	Code
Missing, open socket (not healed)	P
Deciduous with permanent successor present	D
Deciduous without permanent successor present	E
Fractured or decayed at gingiva (crown not present)	F
Tooth apparently prepared but not restored	G
Impacted/incompletely erupted	I
Information not available	X

Dental Status Codes April 4, 2004 and After

Dental Status	Code
No available information	/
Missing. Tooth extracted during the life of the individual	X
Unrestored virgin tooth. Tooth may have caries but no restoration.	V

Dental Restoration/Caries Codes

Dental Restoration/Caries Codes Before April 4, 2004

Dental Restoration Material Description	Code
Temporary type filling (cement, etc.)	0
Amalgam	1
Gold, other types of cast metal or gold foil	2
Acrylic/composite/bonded composite or veneer	3
Porcelain fused to metal crown, porcelain fused to metal pontic or all porcelain crown	4
Any combination of 0, 1, 2, 3, and 4 above, for any one surface	5
Stainless steel crown	6
Temporary crown (acrylic, aluminum, etc.)	7
Not identifiable, not recorded or not remembered	8
Caries (decay) This code is to be used only when a tooth surface has caries and no restoration	9

Dental Restoration Codes April 4, 2004 and After

Restoration Location	Code
Mesial surface. Tooth surface nearest the midline of the dental arch.	M
Occlusal surface. Tooth surface used for chewing or incising.	O
Distal surface. Tooth surface farthest away from the midline of the dental arch.	D
Facial surface. Tooth surface facing the lip or cheek.	F
Lingual surface. Tooth surface facing the tongue of inside of the mouth.	L

Dental Removable Appliance Codes

Use before April 4, 2004 only

Dental Appliance	Code
Natural tooth replaced by acrylic tooth on acrylic partial denture (e.g., flippers, etc.)	A
Natural tooth replaced by acrylic tooth on metal frame partial denture	B
Natural tooth replaced by porcelain tooth on acrylic partial denture	C
Natural tooth replaced by porcelain tooth on metal frame partial denture	D
Natural tooth replaced by metal tooth on metal frame partial denture	E
Abutment tooth retaining partial denture, simple clasp (I-Bars, etc.)	F
Abutment tooth retaining a partial denture with precision or semi precision attachments	G
Full dentures, upper or lower, all acrylic teeth	H
Full dentures, upper or lower, all porcelain teeth	I
Full dentures, upper or lower, combinations of porcelain, acrylic and cutter bat teeth	J

Removeable applicance codes are not reported after on or after April 4, 2004.

Other Dental Characteristics Codes

Other Dental Characteristics Codes Before April 4, 2004

Dental Characteristics	Code
Tilted Mesially	A
Tilted distally	B
Tilted buccally, including protruding anterior teeth	C
Tilted lingually or palatally	D
Root canal therapy completed	E
Root canal therapy not completed	F
Metal post in canal or retentive pins	G
Rotated	H
Supernumerary tooth	I
Retained root tip	J
Shovel-shaped incisor	K
Retained amalgam or metal fragments imbedded in tissue adjacent to the affected tooth or tooth vicinity	L
Overhang of restoration at gingival margin	M
Diastema	N
Orthodontic band on tooth	O
Orthodontic bracket bonded to tooth	P
Functional appliances, e.g. bionator and palate expander, etc.	Q
Orthodontic arch wire	R

Dental Characteristics	Code
Excessive wear due to tooth brushing	S
Excessive occlusal wear (bruxism)	T
Severe bone loss, soft tissue pocketing or recession	U
Periapical pathology (granuloma, cyst, etc.)	V
Intrinsic staining, e.g. mottling, tetracycline, etc.	W
Torus mandibularis or palatinus (other exostosis)	X
Blade implant or individual tooth implant (metal, ceramic, etc.)	Y
Implant, subperiosteal	Z
Surgically placed wires, e.g., fracture repair procedures	3
Chipped	4

Other Dental Characteristics Codes April 4, 2004 or After

Dental Characteristics	Code
Crown. Any laboratory processed restoration such as a gold crown of porcelain crown.	C
Root Canal. Any type of endodontic procedure that has been done on the tooth.	R

Gang & Terrorist Member Criteria

This field is mandatory and must have one of the following designations: A, BC, BD, BS, BF, CD, CE, CF, DE, DF,EF, AG, BG, CG, DG, EG, FG, G, AH, BH, CH, DH, EH, FH, GH or H. The designations AB, AC, AD, AE, AF, AG, BG, CG, DG, EG, FG, AH, BH, CH, DG, EH, FH and GH can be used, but are optional because criteria A, G and H may support entry on their own. The designators below are consistent with the criteria required for entry of a Violent Gang or Terrorist member record:

Gang/Terrorist Identification	Code
Self-admitted group membership at time of arrest or incarceration	A
Identified as a group member by a reliable informant or individual	B
Corroborated identification as a group member by an informant or individual of unknown reliability	C
Frequents a documented group's area, associates with known group members, and/or affects group dress, hand signals, tattoos or symbols	D
Has been arrested with know group members for offenses consistent with group activity	E
Self-admitted group membership (at any time other than arrest or incarceration	F
Terrorist acting alone	G
Subject is suspected or believed to be associated with terrorism or a terrorist organization	H

Protection Order Entry Criteria

The following tables are unique to use for the Protection Order and Injunction file.

Protection Order or Injunction Type Codes

Order or Injunction Type	Code
Domestic Abuse Temporary Restraining Order (s. 813.12)	1
Domestic Abuse Injunction (s. 813.12)	2
Child Abuse Temporary Restraining Order (s. 813.122)	3
Child Abuse Injunction (s. 813.122)	4
Harassment Temporary Restraining Order (s. 813.125)	5
Harassment Injunction Prohibiting Firearm Possession (s. 813.125)	6
Harassment Injunction Without Firearm Restriction (s. 813.125)	7
Other (entry of applicable statute number is required)	8
Vulnerable Adult Temporary Restraining Order (s. 813.123)	9
Vulnerable Adult Injunction (s. 813.123)	10
Foreign Temporary Restraining Order	11
Foreign Injunction Prohibiting Firearm Possession	12
Foreign Injunction Without Firearm Restriction	13

Protection Order or Injunction Service Codes

Service Status	Service Code
Yes served	Y
No not served	N
Unknown	U

State & Country Data Codes

State & Country Code Usage

The appropriate code for state, territorial possession, Indian nation, province or country must be used for both entries and queries into the TIME System, NCIC and NLETS. Additionally, the appropriate code must also be used when submitting place of birth on arrest fingerprint cards and citizenship on applicant cards.

Electronic Fingerprint Submissions

Electronic Benefits

During the entire history of fingerprint submission, there has been only one reliable way to obtain a good, classifiable set of fingerprints, ink & roll.

While ink & roll has proved its reliability, it has its drawbacks. Image quality largely depends on the skill of the person rolling the prints, the type of inking system used and the cooperation of the person being fingerprinted. Often times, a set of fingerprints that looked classifiable when rolled are ultimately rejected at identification. By this time, the person fingerprinted has been released and getting them back to fingerprint again may be difficult, if not impossible.

Breakthroughs in capture equipment and compression algorithms along with standardization of formats now make electronic capture and submission of fingerprints not only possible but preferable. The major benefit of electronic fingerprint submission is the quality control built into the systems, both for image and data quality. Poor quality images have a much better chance of being identified prior to an individual's release, making re-fingerprinting possible.

The speed with which electronic fingerprints may be processed also greatly reduces the amount of time needed to make an identification and return the reply to the booking agency. Eventual implementation of *Lights Out* processing will allow for identification 24 hours a day, 7 days a week.

Finally, electronic submission reduces booking time. Before electronic capture, an agency wishing to book an individual for an offense reportable to both the state and FBI needed to ink and roll three fingerprints cards, one for the agency, one for CIB and one for the FBI, in addition to any required final disposition forms. Today, the images are captured once electronically and, in most instances, the text data for the arrest card is imported directly from the agency's record management system.

Electronic Submission Equipment

There are two very different types of devices used to submit fingerprint cards electronically:

Live Scan Workstation

Live scan workstations are inkless systems where the fingerprint impressions are scanned through a glass platen. Quality controls monitor image quality along with proper finger placement. Source data for the fingerprint card is either entered directly into the Live scan device or received through an interface with a records management system. Fingerprint cards may be printed locally.

Card Scan Workstation

Card scan devices still rely on a single inked fingerprint card. The inked card is placed on a flatbed scanner and converted to an electronic image. As with a Live scan, arrest data may be keyed or received through an interface with local RMS software.

Record Management Systems and Electronic Fingerprinting Interfaces

According to a recent survey conducted by the Wisconsin Division of Electronic Government (DEG), more than 250 law enforcement agencies plan to purchase a new record management system within the next twelve months. Many of these systems will interface with live scan devices, contributing arrest information and fingerprint images to the Crime Information Bureau. If your agency is planning such an purchase, it's recommended the record management system vendor complies with the Criminal Justice Information Services (CJIS) version 7 Electronic Fingerprint Transmission Specification (EFTS). A copy of this document may be found here: http://www.doj.state.wi.us/les/CCH/efts_70.pdf.

Those making RMS purchasing decisions occasionally fail to consider interface pieces that often accompany RMS installations. When these systems are interfaced with live scan devices and don't comply with the EFTS specification, additional resources and revenue are frequently required in order for them to perform as expected. *Records management systems that comply with the EFTS can save your agency costly changes later.*

In addition, electronic fingerprint submittals may be delayed or rejected if data elements fail edit checks. Implementers can avoid these problems by building edit checks into record management systems and fingerprint capture equipment. Here is a list of data edit checks currently being performed by CIB. http://www.doj.state.wi.us/les/CCH/edits.htm.

Please also reference Wisconsin Specs and tables for editing data items at the following: http://www.doj.state.wi.us/les/CCH/eFingerprint.htm http://www.doj.state.wi.us/les/CCH/type2car.xls.

For additional information, or assistance contact Joan Wolfe at (608) 264-9490 or email wolfejk@doj.state.wi.us .

Region Codes

The State of Wisconsin is divided into 9 regions that many of you are familiar with. When you contribute an electronic arrest record to CIB, this record contains the region code of the arrest event. This information is extremely valuable to Wisconsin Crime Labs, providing them with a means to narrow searches on latent fingerprints to a specific area of the state. When a Crime Lab Analyst is investigating a case from the Milwaukee Area, for example, they frequently search the AFIS database for

ten print records from that area first and then extend the search to the remainder of the state. Narrowing this search allows for a more rapid search, and increases the possibility of making a positive match.

Agencies submitting fingerprints electronically should always include the region code with all submissions. The region codes are as follows:

Region	Region Code	Region Members
Central Area	CEAR	Adams County agencies
		Clark County agencies
		Green Lake County agencies
		Juneau County agencies
		Marathon County agencies
		Marquette County agencies
		Portage County agencies
		Taylor County agencies
		Wood County agencies
		Waushara County agencies
East Central Area	ECAR	Brown County agencies
		Calumet County agencies
		Door County agencies
		Fond du Lac County agencies

		Eau Claire County agencies
		Jackson County agencies
		La Crosse County agencies
		Monroe County agencies
		Pepin County agencies
		Pierce County agencies
		St. Croix County agencies
		Trempealeau County agencies

Finger Logic & Sequencing Errors

Live scan software has built in logic that validates the slap impressions against the individual ten fingerprint images. This software examines the ten print images and

makes certain they match the proper finger sequence as captured in the slap images. Occasionally, agencies lower the threshold on quality assurance settings, or turn it off altogether. When this occurs, records are sometimes contributed with bad finger logic (images that are out of sequence), or of inferior quality. These records queue to error at CIB and CJIS, and must be manually reconciled. Please make certain your quality assurance settings are turned on, and are set to an acceptable threshold.

Preset Field Edits

All live scan and card scan devices are delivered with field edits to ensure that only valid data is transmitted. These edit tables are updated as the need arises by the machine vendors.

Edits should not be turned off. Doing so allows invalid data to be submitted to CIB. This invalid submission sends these cards into an error queue and requires CIB to contact your agency obtain the correct data.

If fingerprint image thresholds are set too low or turned off, unusable fingerprints may be submitted to CIB. If this happens, your agency will be contacted and requested to obtain a usable set of fingerprints for resubmission.

Resubmission of Queued Fingerprints

Occasionally the same person is arrested within a relatively short period of time. Rather than recapture the fingerprint images a subsequent time, some law enforcement agencies are recalling old fingerprints contained in their software queue, changing the charge and other information, and re-contributing the record. We also see this "re-contributing" if charge data is missing or a mistake is made within the record. Some agencies are correcting the text data and recontributing the record from their queue.

Live scan and card scan software generate the process control number, transaction control number and arrest tracking number. When this practice of recalling and re-contributing occurs, one of two things occur:

- • If the first record exists and is waiting to for our staff to verify the fingerprint images, or has another demographic error, the subsequent record that was contributed will queue to error requiring manual reconciliation. The second record may be the one with the correct information your agency had hoped to contribute. However, the first will likely enter the database until the second is reconciled.
- • If the first record has already been processed and posted to the Computerized Criminal History (CCH) database, a second arrest cycle will be created, and both will have the same arrest tracking number (ATN). Since both cycles have the same ATN, it's extremely unlikely either one will have a final disposition that can post to the database.

To prevent the same arresting tracking number, process control number and transaction control number from being generated a second time, we ask for your cooperation in capturing new images each time a person is booked.

If there is no charge information, or missing/errant arrest information please *do not re-contribute* the record a second time. Instead, call the CCH Supervisor, Kathy Lux at (608) 266-9561, luxka@doj.state.wi.us. The CCH unit will see that the record is corrected and moved along. (Or contact the CIB staff member responsible for

handling your county.) If you do not know who that person is, contact Ms. Lux and she will assist you to identify the staff member in her unit who handles your county.

Transaction Control Number

All requests coming from law enforcement agencies, submitting electronic fingerprint records, to the Crime Information Bureau need to provide a TCN number to the Fingerprint Identification Section when calling for a *"Rush"* search of a ten print record. The TCN number that is issued at the live scan and/or card scan device is used to track all records now being processed through the state's new AFIS. The TCN number can be located in the third field from the top, once the record being submitted is opened, at the live scan or card scan device.

Sample TCN: CO1234567890

When calling (608-266-7598 and/or 608-264-9485) or sending by fax (608-267-8935) to the Fingerprint Identification Section of the Crime Information Bureau, on a record that has been transmitted, please furnish the TCN number, full name, sex & race, date-of-birth, and time & date the record was sent to CIB. An agency contact, name and telephone number will also be needed for CIB staff to return AFIS search results.

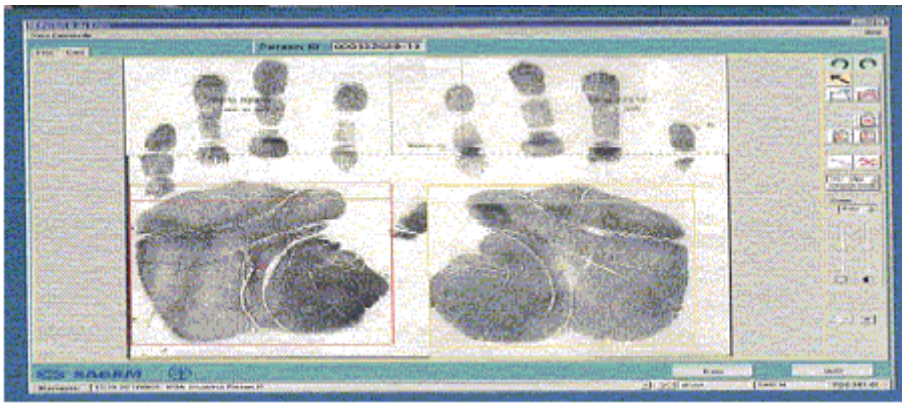
The above information is for AFIS results only. Requests for any corrections and/or additions that need to be made to a record that has been sent to CIB should (*with arrest tracking number [ATN] in hand*) call the Criminal History Records Unit at 608-266-9561 or fax the information (*with the ATN*) to 608-261-0660.

Palm Prints

Part of the current upgrade on the state's Automated Fingerprint Identification System (AFIS) is the capability to process, store and search palm prints. Wisconsin became the second state in the nation that is currently processing palm prints.

The capability to process palm prints has added another tool in solving crimes. Roughly 30% of all latent prints lifted at a crime scene are from palm prints. While there is roughly 100 palm prints on file at this time at the Crime Information Bureau, it is a new beginning for Wisconsin as it continues to move forward in fingerprint technology.

Any agency contemplating obtaining or updating electronic fingerprint equipment should consider obtaining a device that is capable of capturing palm prints in addition to fingerprints.



Fast ID

General Information on Fast ID

What is Fast ID?

The MorphoTouch Fast ID device uses biometric technology to capture the index fingerprints of a person, encode the fingerprints, and send the results to a standalone server at WDOJ. An open search is conducted, and if the fingerprints are located in the database, the following information is returned to the Fast ID device:

- State Identification Number (SID);
- Sex;
- Race;
- Birth date;
- Local Identification Number (LID)*

*LID was not indexed in WDOJ's former automated fingerprint identification system (AFIS). Fingerprint cards that are contributed today with a local identification number will index in AFIS using the first contributed LID.

Names are not stored in the WDOJ AFIS; therefore, cannot be returned.

If no identification is made, a "NO MATCH" result is returned. <u>You will also receive a "NO MATCH" result if the 10 print record that was contributed in still in process, or has queued to error.</u>

The message remains on the display until the operator presses any key to continue. These devices are capable of handling single amputated and bandaged fingers.

If an "IDENTIFIED" is returned to the device, press the "NEXT" button (2nd blue button from the top left) to view the SID, sex, race, and birth date. If you press NEXT again you will view the local identification number if one exists.

New master criminal records (a master criminal record is created when the first arrest fingerprint card is received for an individual) created prior to December 2002 will return a default month and year of birth value of **11/11/CCYY**. (CCYY being the correct century and year of birth). Here's an example: 11/11/1972. For those new master records received after December 2002, the correct month and birthdate will be returned as in this example: **06/17/1972.** In both instances, the correct month and birth date will appear on the rap sheet.

How Fast ID Works

CIB indexes fingerprint images and sends them to a biometric server. These smaller "buckets" of left and right index fingerprints result in more rapid searches since queries are not searching against the entire ten-print database. When a quality image is acquired from the Fast ID device, the MorphoTouch encodes these images and send a 1- to -many matching transaction request to the biometric server. This transaction request contains the minutia of the 2 fingers acquired by the device, not the actual image, and a result is returned to the device.

Where to Use Fast ID

Some practical applications for these fast identification devices might include:

- providing real-time identification of an arrested person with an unknown or questioned identity;
- identifying a suspect prior to keying errant arrest information into your records management system;
- authenticating a prisoners identity prior to release;
- confirming identity for high profile prisoners returning from court.

Training

These devices require minimal training. The vendor will provide instruction documentation at the time of installation. Copies of local law enforcement policy and procedure are available if your agency would like to review them prior to developing one of your own.

Databases Searched

These devices do not query the FBI's IAFIS or other databases. They query only the Wisconsin AFIS index finger database.

Search Limitations

Currently, there is no limit.

Requirements

Access to BadgerNet (10Mbits/s Ethernet network) – the same network connection as your live scan, card scan, or TIME system server/terminal. This may require your agency install a switch, and provide necessary category 5 cabling;

An IP address for the device;

A standard outlet/power source that supports 115v;

A mounting device should your agency desire one.

Communications Protocol

Communications used are HTTP. Sites with network security should use port 80.

Placement

Some locations you may wish to place the fast ID device might include:

- Pre-booking area or intoxilyzer room;
- Pre-release area;
- Near your records management terminal used to create booking records;
- Interview room;
- Defendant holding areas;
- Remote precincts;
- Intake

Security

The Fast ID device is password protected. The default password will be set to "12345" for each device. After 3 unsuccessful sign in attempts, access will be *restricted. Should this occur, call the Morpho help desk at (800) 526-2674.*

Unit Dimensions

7.5" l x 3"w x 2.25"h, weighing under 3 pounds. The power supply is 3" x 2 1/2" x 2", weighs approximately 1 pound, and should be supported on a flat surface.

No mounting devices are included. This is a stand-alone desktop unit.

It's recommended they not be mounted flat on a wall, since it creates awkward finger placement that may result in less identifications. We're told a 30% angle works well.

Power Specifications

- Input = 120 Volts, 60 Hertz, 25 Watts
- Output = DC 12 Volts, 1.2 amps

Using Fast ID

How to Use Fast ID

1. Press the upper left blue key under the word "LOGON".
2. Enter the password: "12345" the press the green "OK" key.
3. Press the upper left blue key under the word "IDENT".
4. Press any key to continue.
5. Place the person's right index finger on the platen making certain the fingertip touches the top of the finger guide directly below the zero.

6. Remove when prompted with "REMOVE FINGER ANALYZING". DO NOT ROLL the finger. Repeat with the left index finger when prompted with "PLACE LEFT INDEX".

- If the index finger is amputated, press the upper left blue key that says "AMPUT".
- If the index finger is bandaged or otherwise unprintable, press the second blue key from the left beneath the word "BANDAG".

You should see a message "SENDING DATA TO SERVER WAITING FOR REPLY". In most instances it takes approximately 60 seconds to receive a response.

- If there is no match, press the upper right blue key under the word DONE. Press the upper right blue key again under the word LOGOFF.

If further identification is necessary, write down the SID number. That number can be used to run a criminal history through the TIME System.

Troubleshooting

Should the device lock up during normal operation, press the upper left blue key, upper right blue key and the yellow button simultaneously. This will reboot the device.

If you have software version 1.0, a problem has been identified that occasionally tosses the user back to the logon screen when conducting a search. The device then fails. Should this occur, call the Morpho help desk at (800) 526-2674 and they can resolve the trouble by deleting the transaction. This problem was resolved in version 1.0.5.; all agencies will soon be upgraded to v1.0.5.

If you obtain a message "HTTP cannot connect to host" or other network error, check with your local network staff and make certain others aren't having network difficulty.

Try powering off the device, wait for a few minutes, and then attempt to connect. If you are still unable to connect, call the Morpho help desk at (800) 526-2674.

Should the WDOJ matchers or server fail, all law enforcement agencies will receive the a message via the TIME System. Likewise, when the system returns to

full function, your agency will receive a TIME System message indicating the system is functional.

Other problems can be directed to the Morpho Help Desk at 1-800-526-2674

Additional Information

For additional information, contact Joan Wolfe at (608) 264-9490 or email *wolfejk@doj.state.wi.us*
