

TIME System Newsletter

Volume 2013-2

July 2013

INSIDE THIS ISSUE:

The March 2013 TIME System Newsletter introduced you to the new NCIC Violent Person File. The Violent Person File provides a place for your agency to enter individuals with convictions for violent offenses, or those that have threatened law enforcement personnel. The entering agency must ensure that the subject meets one of the following criteria prior to entry:

- 1) Offender has been convicted of assault or murder/homicide of a law enforcement officer, fleeing, resisting arrest, or under any such statute which involves violence against law enforcement.
- 2) Offender has been convicted of a violent offense against a person, including homicide and attempted homicide.
- 3) Offender has been convicted of a violent offense against a person where a firearm/weapon was used.
- 4) A law enforcement agency, based on its official investigatory duties, reasonably believes that the individual has seriously expressed his or her intent to commit an act of unlawful violence against a member of the law enforcement or criminal justice community.

NCIC Code Up-	10

The Violent Person File is automatically searched when the standard warrant/wanted person inquiry to NCIC is performed. To facilitate officer safety nationally, the Portal 100 software has been updated to allow your agency entry capability into this file. See the March 2013 Newsletter for more information, and feel free to contact a TIME System trainer in CIB if you have questions regarding this file.

On page 3 of this newsletter you will find an article titled Cancel vs. Clear, which discusses the process for removing a record from the TIME System. In anticipation of your questions, the terms Cancel and Clear have been used for over 20 years in NCIC policies. In the past, the TIME System had attempted to make this process simple for you by sending the appropriate transaction behind the scenes. We are no longer able to accomplish this in accordance with the NCIC policies and therefore have changed our practice as directed by the FBI following our 2012 audit. We have begun this change with the Protection Order File and as time and resources permit we will implement similar changes to the other files. If you currently cancel records from the TIME System, please familiarize yourself with this new terminology since you will now need to select the appropriate transaction.

The 2013 CIB Conference is scheduled for September 11th – 13th in Green Bay. Hope to see you there. Please feel free to contact me or any of the CIB staff to discuss your thoughts on how we can continue to improve.

Walt Neverman

Director, Crime Information Bureau

Update to Portal 100 Software

Agencies using the Portal 100 software to access the TIME System should be aware that an update to the software was deployed on June 19, 2013.

All Portal 100 users should check to ensure the current software version on their terminal is version 100.5.223. This information is available by clicking on the 'HELP' (question mark) icon in the Portal 100 message window and choosing 'ABOUT'.

Some of the features included in this update to the Portal 100 software are:

- A change to the default setting for NCIC responses on all person queries. Previously the default setting returned all felony records and only extraditable misdemeanor records. The default setting has been changed to return all felony records and all misdemeanor records.
- New transactions to enter, modify, supplement, and cancel Violent Persons. The Violent Person File was recently introduced by NCIC. For more information about criteria for entry, a sample response, etc. please see the March 2013 TIME System newsletter, page 8.
- Changes made to the cancel protection order form to allow for a choice between cancelling the entry and clearing the entry. For more information about the difference between cancelling a record and clearing a record please see the 'Cancel vs. Clear' article on page 3.
- Miscellaneous code table and help language and menu updates.

WI DL Photos – You CAN'T on WCAN

The Wisconsin Crime Alert Network (WCAN) allows local, state, federal, and tribal law enforcement agencies to send out crime alert bulletins to businesses and the public, targeting recipients based on type of business and location. The Wisconsin Crime Alert Network is a valuable tool for law enforcement.

Can Wisconsin driver's license photos be used in WCAN bulletins? The short answer is NO. The state statutes providing access to Wisconsin driver's license photos and governing their use (state statutes 165.8287 and 343.237) are very specific with regards to photo dissemination. In fact, each Wisconsin driver's license photo provided to law enforcement via the TIME system comes with the following caveat attached, which clearly states secondary dissemination of the photo is not allowed.

This photograph is subject to the requirements and restrictions of section 165.8287 of the Wisconsin statutes. The photograph shall not be used for any purpose other than the administration of criminal justice or traffic enforcement. Secondary dissemination is prohibited and the photograph shall be destroyed when no longer necessary for the purpose requested. The photograph shall not be used as part of a photo lineup or photo array.

Please ensure all TIME System and WCAN users are aware of this restriction.

Cancel vs. Clear: Which Is Which?

The recent update to the Portal 100 software included changes made to the cancel protection order form to allow for a choice between cancelling the entry and clearing the entry, leaving many users with questions about the change.

The process of removing a record from the TIME/NCIC Systems is undergoing a fundamental change in thinking, beginning with the Protection Order/Injunction File. Users have the option to either *cancel* the record or *clear* the record. So what is the difference?

A record should be *cancelled* when it is determined that the record is invalid for some reason. Perhaps the record entry was made in error, or the warrant has been dismissed by the court. Cancellation is the appropriate function to use in these administrative situations.

A record should be *cleared* when the record entry has achieved its purpose: the wanted person has been apprehended, the stolen vehicle has been recovered, etc. If hit confirmation on the record has occurred, clear is the appropriate function to use.

This change is necessary to meet NCIC requirements, and will be implemented one file at a time, beginning with the Protection Order/Injunction File.

If They Try to Buy, We Notify

If a person is attempting to purchase a handgun and is statutorily prohibited from doing so, the CIB Firearms Unit may notify law enforcement of this fact in accordance with state statute 175.35(2k)(g). Notification may be made to the agency that has jurisdiction for the location of the federal firearms licensee (gun dealer), the agency that entered the disqualifying record (wanted person entry, protection order entry, etc.) or the agency having jurisdiction for the location of a petitioner/protected person in the case of a protection order. Notification is made to these agencies via a TIME System administrative message.

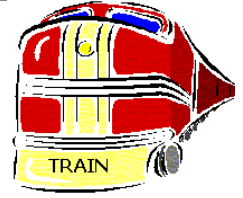

CIB has received numerous inquiries from agencies receiving these messages. This information is provided to law enforcement for their information. The information could be used to enhance officer safety, public safety, or even pursue criminal charges against the subject who attempted to purchase a firearm. Agencies should ensure all personnel know what agency policies are regarding these firearms purchase denial notifications.

eTIME Browser: It's So Refreshing

A brief reminder for eTIME browser users: you may need to refresh. While typically all responses to an eTIME browser query are received in seconds and their status displayed on the response summary page, at times a response may take a bit longer to arrive. If all responses are not immediately received, eTIME browser users may wish to click on the 'Refresh' button in their browser to receive updated information.

TRAIN Upgrade

CIB's online training website, TRAIN was recently upgraded. TRAIN is now compatible for use with the following browsers: Internet Explorer 6, 7, 8, and 9; Firefox 3.6.10, 8.0.1, and 9; and Safari 4. The upgrade will also allow for Windows 7 compatibility.

Users will also notice slight changes in the appearance of their TRAIN homepage, but the basic functionality of TRAIN remains the same (user vs. manager mode, accessing training, etc.). In addition, local agency administrators should be aware of the following information.

While the cosmetic look of TRAIN has changed, the basic functionality has not. The learner and manager modes remain, however they are represented by new icons (Learner = person icon, Manager = office chair icon, Reports = graph icon). Functions such as accessing training information, upcoming class information, etc. work as they did before and are found in the same locations. During the registration process, administrators may find it difficult to locate the 'Register Others' button. This function is still available, however it is now an option under the 'Other Actions' button found in the lower right hand corner of the screen of the class you wish to register others for.

Finally, the reporting feature of TRAIN has changed. The report manager function is now compatible with the browser versions listed earlier in this article, and the Microsoft Office Web Components software is no longer required for reports to function correctly. Both current and expired user certifications are now available in one report (they had previously been 2 separate reports).

TIME System Rates for Calendar Year 2014

To assist you in budgeting, published below are the TIME System rates for 2014. The TIME System Advisory Committee voted on April 17th, 2013 for no change in the rates for 2014:

System Access Fees	Current	Effective January 1, 2014
Full Service & MDT Access	\$50/month	no change
eTIME Access Only (Traditional*)	\$50/month	no change
eTIME Access Only (Non-Traditional)	\$100/month	no change
Non-Traditional	\$100/month	no change
Department of Corrections	\$6,000/month	no change
District Attorneys	\$6,000/month	no change

Note: Agencies with multiple access levels are billed at the highest System Access fee applicable.

System Support		
Per Certified Officer	\$3.50/month	no change
Minimum Officer Annual Billing	\$168/year	no change
BadgerNet		
Per TIME Circuit	\$620/month	no change

*Traditional agencies are those that also pay the per officer System Support fee i.e. Police and Sheriff Departments

Should you have specific questions about costs and fees applicable to your agency, please do not hesitate to contact Chris Kalina, TIME System Operations Coordinator, at 608-266-7394.

Hit Confirmation for Firearms Checks

The CIB Firearms Unit conducts background checks on those wishing to purchase a handgun in Wisconsin and those applying for Wisconsin Concealed Carry Weapons permits. The CIB/NCIC Wanted Person File is searched as part of these background checks. If a check results in a possible match to a wanted person record, protection order record, etc., the Firearms Unit will send a hit confirmation request to the entering agency *even though the subject is not in custody*. The hit confirmation request will state the following:

An individual descriptively matching this warrant is currently the subject of a firearms eligibility check and provided the following address: 123 Applicant Street, Anywhere, WI 12345. The subject is not in custody. Please advise if the warrant is a valid warrant. If yes, is this an arrestable misdemeanor or felony offense?

This use of hit confirmation is allowed and required under TIME System policy, so all agencies should be aware they may receive such hit confirmation requests. If an agency receives such a hit confirmation request, they should respond to the request within the stated time limit. A valid wanted person record (felony or misdemeanor) or protection order with a firearms restriction can be the basis for denying a subject a Concealed Carry Weapons permit or gun purchase.

TIME System Misuse

Recently an agency contacted CIB to inquire if there a specific state statute or federal law that applies when a person accesses TIME/NCIC System information for purposes other than criminal justice.

As TIME System users know, the TIME/NCIC systems and the information obtained from them can only be used by law enforcement/criminal justice personnel and can be used only for law enforcement/criminal justice purposes. If these rules are broken (for example, an officer accessing DOT information for personal use) there may be internal, civil, and/or criminal penalties.

Each criminal justice agency authorized to receive NCIC/CIB information must have appropriate written standards for discipline of NCIC/CIB policy violators, however internal policy and discipline are not the only potential consequence. Depending on the circumstances and what type of information was improperly accessed, various federal and state laws may apply, including Title 28 CFR Chapter 1 Part 20 (access and use of III CHRI), Title 18 CFR Part 1 Chapter 123 (Federal Driver Privacy Protection Act), or various laws regarding computer misuse, misconduct in public office, bribery or privacy. Currently there is no specific state statute dealing with TIME System use violations.

In any such case agencies should consult a qualified attorney for their input on the situation and possible legal ramifications, for example your district attorney, prosecutor or corporation counsel.

Terrorist Screening Center

The Terrorist Screening Center (TSC) was created to consolidate the US government's approach to terrorism screening. The TSC maintains the US government's database on known or suspected terrorists (KST). Part of this database is checked by law enforcement across the country when they query NCIC. When an officer queries a name via NCIC, it is automatically run through the KST file. If an individual's name, like name, or similar demographic identifiers match an entry in the KST file, the officer will receive a hit. If an officer receives a hit indicating that the subject may be on a terrorist watchlist, one of three handling codes will appear on the NCIC response. ** The detention or arrest of an individual cannot be initiated based on the handling codes alone. Officers should follow the policies and procedures of their particular jurisdiction to affect any arrest via an NCIC hit. **

The TSC must be notified by law enforcement departments when their officers or employees receive a KST hit (confirmed or otherwise) during an NCIC query, as it is a vital step to gain real time intelligence on KSTs. While in some cases it is obvious that the individual run through NCIC is not the individual described in the handling code, it is still necessary to notify TSC of the hit. The TSC needs your assistance in this important law enforcement matter to ensure that important intelligence is being shared. The TSC can be contacted 24-7-365 to report a KST hit.

Procedure when an officer receives a KST in NCIC:

- Use caution and officer safety procedures throughout the encounter.
- Do not inform the individual they may be on a terrorist watch list.
- Report the hit by calling the TSC at the number listed in the record so the identity of the individual can be confirmed. Please note: the TSC still needs to be notified even if the hit is only a DOB or name hit (Soundex hits).
- The officer/department member will receive guidance on the KST from the TSC. (The officer should contact the TSC directly; however if they are unable, they may communicate with the TSC via their telecommunications section.)
- Communicate all requested information to the TSC (approximately 10 minute phone call).
- Follow agency internal procedures as required.

Handling code definitions (each code provides a specific course of action to follow):

Handling Code 1

***** Law enforcement sensitive information *****

Approach with caution, as this individual may be the subject of an arrest warrant.

Do not inform the individual they may be on a terrorist watch list.

If a warrant is returned, follow your agency's policies and procedures and immediately contact the TSC.

If a warrant is not returned, use caution and immediately contact the TSC, without otherwise extending the scope/duration of the encounter.

Handling Code 2

***** Law enforcement sensitive information*****

Approach with caution, as there may be a detainer available from the Department of Homeland Security (DHS) for this individual.

Do not inform the individual they may be on a terrorist watch list.

Immediately contact the TSC to ascertain if a detainer is available.

Attempt to obtain identifying information to assist the TSC in identifying the individual, without otherwise extending the scope/duration of the encounter.

Handling Code 3

***** Law enforcement sensitive information*****

Do not inform the individual they may be on a terrorist watch list.

Contact the TSC during this encounter.

If contacting the TSC would extend the scope or duration of the encounter, contact the TSC immediately thereafter.

Attempt to obtain identifying information to assist the TSC in identifying the individual, without otherwise extending its scope or duration.

Do not detain or arrest this individual unless there is evidence of a violation of federal, state or local statutes as the detention or arrest of an individual cannot be initiated based on the handling codes alone.

Unauthorized disclosure is prohibited.

Information that this individual may be on a terrorist watch list is the property of the TSC and is a federal record provided to your agency only for intelligence and lead purposes. This record, and any information contained within it may not be disclosed or used in any proceeding without the advance authorization of the TSC.

Wisconsin Department of Justice
2013 CIB CONFERENCE
START PLANNING NOW

Wednesday September 11th – Friday September 13th, 2013
Radisson Hotel & Conference Center, Green Bay

Do You Work for Multiple Agencies?

TIME System users that work for multiple law enforcement agencies and use the *e*TIME browser for TIME System access need to be sure they are doing so correctly.

If you need *e*TIME browser access at multiple agencies, each agency's TRAIN administrator will need to register you to complete the online course 'eTIME Operator Agreement' via the CIB online training website, TRAIN. This ensures the agency is aware of and has granted permission for your use of the *e*TIME browser. Once you have completed the online agreement, you will then need to complete and submit an *e*TIME registration screen for each agency.

These multiple registrations serve several purposes: 1) they ensure that each agency is aware of their employee's use of the *e*TIME browser, 2) they ensure that each query a user makes is attributed to the correct agency. Each registration adds the agency's ORI to a drop down box that appears when the user initially logs in to *e*TIME. This allows the user to specify at login which agency they are running queries for at the time, ensuring the correct agency is responsible for the *e*TIME activity that occurred. If you haven't already, make sure your employees have registered for *e*TIME under the proper ORI for your agency.

VINAssist & Portal 100

Agencies that use the Portal 100 software are reminded that the link within the software to the NICB's VINAssist program may not be functional on their terminal, and even if functional, accesses limited information. VINAssist allows users to 'decode' a vehicle identification number, verifying validity and revealing information about the vehicle.

As announced in a 2011 TIME newsletter article, if an agency is using a Windows 7© 64 bit operating system VINAssist will not function within the Portal 100 software. VINAssist does function in the Windows 7© 32 bit operating system.

In addition, the VINAssist software has not been updated to include new vehicle makes and models since 2011. In a future update to the Portal 100 software, the VINAssist link will likely be removed, as NICB no longer provides regular updates to the software. Instead, NICB has made this VIN decoding capability part of their online ISO ClaimSearch website. Law enforcement agencies should contact NICB for information on how to obtain online access: technicalsupport@nicb.org or 1-800-447-6282.

Inservice: It's Not Just for Recertification

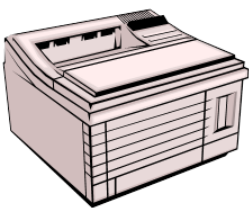

Agencies are reminded that TIME System Inservice training is available. Inservice training includes a review of selected TIME System topics, new or changed TIME System features and policies, and an opportunity for personnel to ask questions. Inservice sessions are offered on various dates/locations throughout the state, and are held in conjunction with TIME System recertification examinations, with the inservice being offered in the morning (8:30AM-12:00PM) and the recertification examination in the afternoon (1:00PM-4:00PM). Attendance at the afternoon recertification is *not* required in order to attend the morning inservice. Agencies may wish to take advantage of these inservice courses to ensure their operators are up-to-date on the latest system capabilities. Inservice is also available as an online class on CIB's training website, TRAIN.

Kids and Multiples – POIF Petitioners

TIME System agencies should be aware that they can and should enter children as petitioners when appropriate. The system does not limit petitioner information to adults only, and in many cases (child abuse orders, harassment orders, etc.) children are petitioners/protected persons. If their information is not contained in the entry, it can be difficult for law enforcement personnel investigating possible violations to determine who the protected person is. Listing the child petitioner's information in the remarks provides some information, but is not as valuable as listing the child as a petitioner. Information in the remarks field is not searched during a routine query, and potential hits could be missed.

The same is true for multiple petitioners. At times, a protection order/injunction may have multiple petitioners listed (multiple family members, business staff, etc.). The TIME System allows for supplemental entry of up to nine additional petitioners to a protection order/injunction file record.

Portal 100 Printer Settings

CIB continues to receive questions about the options located on the 'Printer Settings' tab of the Portal 100 software.

- **Print on Submit:** Prints all messages sent.
- **Send Form Feed After Each Message:** Sends a form feed character to the printer after each message, causing inkjet and laser printers to eject the page.
- **Eject Page after X Seconds:** Choosing this delayed form feed option will allow for several successive messages to be printed on a page before it is ejected. This allows you to specify how much time passes before the page is ejected.
- **Print Un-Reviewed Messages (URMs) After X Minutes:** Allows you to specify how much time passes before a received message will be automatically printed if it has not been reviewed by an operator.
- **Insert X Blank Lines Between Messages:** Allows you to set the number of blank lines inserted between printed messages.
